Dura-Pad™ On-Deck Circles with Logos

DURA PAD™ ON-DECK CIRCLES, FUNGO CIRCLES & COACHES BOXES WITH LOGOS

Professional, Durable, Heavy-Duty Grade

DISPLAY YOUR TEAM, LEAGUE, OR SPONSOR'S LOGO IN BRILLIANT COLORS!

We are the U.S. Distributor of DURA-PAD™.

Used by every Major League Team and dozens of Minor League Teams, plus Little Leagues, Municipalities, Schools, Colleges, plus Olympic, World Series and All-Star Games.

"A WHOLE NEW MARKETING OPPORTUNITY"

THERE IS NO OTHER PRODUCT LIKE DURA-PAD™ ON-DECK CIRCLES ON THE MARKET! No other product gives the sharp, colorful graphics and the durability of **DURA-PAD™**.

DURA-PAD™ On-Deck Circles are manufactured through a multi-layered, high-tech process utilizing a compressed granular rubber base, seal coats, a strong poly fiber mesh core, polyurethane top coats, polyurethane white finish coats and specially formulated rubberized polyurethane paints which react with the polyurethane finish to create colorful and detailed artworks which are very resistant to scuffing and scratching. **Available in custom sizes and in ovals, rectangles, as well as circles.** **DURA-PAD™** On-Deck Circles are manufactured in Canada by Joe Albert of Sports Field Markings, the originator and artist who created **DURA-PAD™**. Prices are F.O.B., Ont., plus customs and freight.

6' On-Deck Circle—Pro Series

#DP-6PS \$1,500 each

5' On-Deck Circle—Pro Series

 Molded 5' circles
 Thickness: approximately 3/8"
 Finished cut size: 59"
 Weight: 35 lbs. (approximate)
 Shipping Weight: 50 lbs.
 Graphics: Digital Print.

Pad Durability for All Levels of Play: 5-10 Games.*

DURA PAD™ ON-DECK CIRCLES, FUNGO CIRCLES & COACHES BOXES WITH LOGOS PRO SERIES & SHORT TERM SERIES

SPONSORSHIP/ADVERTISING - Make your sponsor's logo stand out in brilliant colors!

DURA-PADS™ make an excellent fund raising vehicle that makes your sponsor's logo the only logo "in play" at home plate, seen at every at bat. Sponsor's name can also be placed around team or league logo, or vice versa. If selling advertising: multi-year contracts are recommended so that you don't need to redo artwork every year.

INSTALLATION & CARE

Install **DURA-PAD™ On-Deck Circles** on a firm surface. They can be left out year-round and can be glued to macadam or concrete. If removing after games: roll up (with paint side inside and rubber out), carry to storage, unroll and store flat.

[\[Care and Storage Sheet—PDF\]](#)

ARTWORK SPECIFICATIONS—Send us your camera-ready artwork & PMS colors (or color samples). Additional artwork charges will apply if you do not have finished layouts. Some special colors may have a surcharge; if so, we will advise you.

BEAM CLAY®

Dura-Pad™ On-Deck Circles

CARE AND STORAGE OF DURA-PAD™ ON-DECK CIRCLES

AFTER RECEIVING YOUR SHIPMENT OF DURA-PADS™, UNROLL THEM FROM SHIPPING TUBE AND ALLOW PADS TO SIT UNTIL FLAT, DO NOT FORCE FLAT.

DO NOT ROLL/UNROLL PADS IN FREEZING TEMPERATURES.

ALWAYS CARRY PADS. DO NOT DRAG BY ONE EDGE.

ALWAYS STORE PADS FLAT.

DO NOT FOLD PADS.

ALWAYS INSTALL PADS ON A FIRM SURFACE. DO NOT INSTALL ON A SOFT, MUSHY BASE AS THIS WILL NOT PROVIDE SUFFICIENT RESISTANCE TO PRESSURE FROM CLEATS AND CAN CAUSE PREMATURE WEAR.

IF INSTALLED PERMANENTLY BY GLUEING TO CONCRETE OR MACADAM, PADS REQUIRE A PROTECTIVE COVERING WHEN NOT IN USE.

PADS ARE ARTWORK. WHILE SCUFF RESISTANT, DO NOT ALLOW PLAYERS TO GRIND SPIKES INTO SURFACE, OR THEY WILL TEAR THROUGH.

WE RECOMMEND ORDERING EARLY AND STORING FLAT AT LEAST ONE MONTH BEFORE USE, AS DURA-PADS™ BECOME HARDER AND MORE SCUFF RESISTANT THE LONGER THEY AGE.

CLEAN BY MILD SCRUBBING WITH SOAP & WATER; DO NOT USE SOLVENTS SUCH AS PAINT THINNERS.

BEAM CLAY®

Dura-Pad™ On-Deck Circles

INSTRUCTIONS FOR RETURNING DURA-PAD™ ON-DECK CIRCLES FOR RESURFACING

- 1) Dura-Pad™ On-Deck circles being returned for resurfacing must be packaged individually on sonic tubes for shipping. The sonic tubes should be 12" diameter x 2" longer than the width of pads. For instance, 12" x 8' long for 6' pads.)
- 2) It is very important that you roll each pad face down on the outside of each sonic tube so that the black rubber bottom is facing out. This protects the painted surface from damage, plus rolling the surface inside doesn't stretch the surface; whereas, rolling the surface outside stretches the surface and may cause cracking.
- 3) Also important: Roll with the seam perpendicular to the tube so that the seam is rolled onto the tube not laying lengthwise along the tube.
- 4) Secure the rolled pad well with duct tape so that the pad will stay rolled up in shipping. Then wrap the roll in plastic and plastic wrapping tape. Leave the ends open so that the carrier can pick up the tubes with one fork of a forklift.
- 5) Let us know when ready and we'll arrange pick up and customs.

Sonic tubes are used for concrete pilings and should be available from any lumberyard, Home Depot/Lowes, or concrete supply store for approximately \$20 each.

Turn around time should be approximately 3 weeks upon receipt of pads for resurfacing versus approximately 4-6 weeks for new. While resurfacing will save time and money, you should only decide to resurface if the existing pads are in good condition and still usable. Please inspect them. If there are any major tears or pitting into the rubber over approximately 1" in diameter, there will be additional charges or the pads may not be fully repairable but you would still be responsible for the freight and customs charges to Canada.

BEAM CLAY®

Dura-Pad™ On-Deck Circles

DURA-PAD ON DECK CIRCLES

Digital Printed On Deck Circle Artwork Requirements

Vector File – EPS or AI (Adobe Illustrator) file format. (Preferred)

- ALL fonts MUST be converted to outlines to avoid font errors.
- Use Pantone swatches for color matching.
- Layered files are preferred.

Bitmap File – PSD (Adobe Photoshop), JPG or TIFF file format.

- Should be no less than 150 dpi at 100% in size.
- Layered files are preferred.

Other Requirements

- Can be Mac or PC formats.
- Include CLEAR instructions and a proof of what the final job should look like in JPG or PDF format.

A Note on Graphic Industry Standards

TIFF, JPG, and BMP graphics are bitmap image formats, comprised of individual dots of color, generally used to display images on a computer screen. Usually they are only a couple of inches in size when printed. Enlarging a bitmap image to the size of an On Deck Circle simply enlarges the individual dots of color. This results in bigger, chunkier dots, with no additional detail and gives poor print quality.

Vector format images are mathematically defined images comprised of lines and curves associated with coordinated locations on a graph. They can be scaled to any resolution or size without loss of quality, and because of that are ideal for large format printing, like an On Deck Circle because the image detail is clean sharp at any size.

Note

Bitmap images simply saved in an EPS file DOES NOT create a vector format file.

Artwork should be submitted as follows:
