CUT-N-LEVEL DRAG/SCREEN

The Cut-N-Level drag/screen is designed for grooming the surface of playing fields. It features flat steel cutting blades & a screen for rock removal. The cutting blades are slotted and attached to the main frame with bolts, allowing the operator to adjust the blades for the desired depth of cut. The Cut-N-Level drag/screen can be used to smooth and level the field, plus for rock removal as the need arises saving the extra man hours normally needed to do these jobs. Frame & Blades are galvanized. Weight 220 lbs. Size 6'W x 4'6"D.

#BSCLDRAG

\$875

LEVELS FIELD

By adjusting the blades the operator cuts down clay build-up. The clay is carried by the blades, as the drag passes over holes it is then deposited in the holes leaving a smooth & level surface.

PICKS UP STONES

Rocks and stones are removed by placing the screen (16 gauge x 1/2" opening) above the frame and adjusting the blade so that they scrape up rocks lying on the field. This directs the rocks onto the screen that is made of wire mesh. The clay sifts through, thus holding any materials too large to fall through.

HELPS DRY WET FIELDS

By adjusting the blades to shave the top layers of clay, the drag will mix wetter top clay with dryer lower clay. By rolling this mixture along and exposing it to the air, a dryer clay will deposit on the field.

DRAG KING™

Synthetic/Artificial Turf Groomers - Go Groomer Go—Inline Safety Magnet

G30 Inline Safety Magnet

Even the best maintained synthetic fields have potential dangers from unwanted foreign debris hidden within the surface infill. While the **Go Groomer Go™** properly grooms a synthetic turf field, the **G30 Inline Safety Magnet** goes the extra step to insure that hidden dangers, which are unseen by the naked eye, are properly removed. Best of all, the Inline Safety Magnet is compatible with all 3 **Go Groomer Go™** models and can be used while simultaneously grooming a synthetic field.

With the **G30 Inline Safety Magnet**, risk management is drastically lowered by improving the safety of the playing surface for those who utilize the synthetic turf facility.

Debris picked up by the Inline Safety Magnet on a high school's multipurpose synthetic field

Debris picked up by the Inline Safety Magnet on a university's soccer stadium field

Debris is easily and safely removed from the **G30 Inline Safety Magnet**

The **G30 Inline Safety Magnet** is not only a synthetic turf magnet, it is also the magnet you can't afford not to have. Time and time again the results of using the **G30 Inline Safety Magnet** on a synthetic turf field are astonishing. Some of the items picked up by the magnet are small but numerous such as hair pins and bobby pins. However, other items, which are much more dangerous are screws, nails, bolts, wires, earrings and other sharp, skin piercing objects (some of which are rusted). These items easily find their way onto the playing surface and into the synthetic infill but are just as easily removed by the **G30 Inline Safety Magnet**. Removing such items will drastically decrease the unlimited potential dangers and liabilities that could ensue as a result of an injury.
