CONTROL THATCH · PROMOTE HEALTHY TURF
· FAST GERMINATION ·
SMOOTH PLAYING SURFACES

HEAT TREATED

† **PARTAC® Premium Golf Course Top-Dressing** controls thatch while building the best growing medium and playing surfaces on golf course greens! **Heat treated** and composed of **uniform particles**, PARTAC® Premium Golf Course Top-Dressing restores the natural, beneficial bacterial action that breaks down thatch and helps prevent turf diseases, while maintaining the ideal balance for water retention and drainage.

† **Our Heat Process Does More Than Kill Weed Seeds!** It destroys insects, diseases and nematodes, while binding the sand, silt and clay in soil into **water stable aggregates** that hold their shape under moisture and compaction. Our heat treatment is a **pasteurization** process which retains beneficial bacteria without making our mixes hydrophobic. Our heat process **dries** the mixture so that particles this small can be screened to eliminate oversize and undersize particles which plug up pore spaces and to give you the most effective top-dressing without leaving debris to be raked off! PARTAC® Premium Golf Course Top-Dressing comes dry and spreads with ease. Plus, PARTAC® Premium Golf Course Top-Dressing weighs less, giving you **more top-dressing per ton!**

† Available in bulk or 50 lb. bags.

Cart / Walking Path Mixes & Stabilizer®

PARTAC®
NATURAL
PATHWAY & GOLF CART PATH MIXES

Use near greens (instead of macadam or concrete) for firm, smooth surfaces with great drainage that stop rather than bounce golf balls!

Available in 3/16" minus Burgundy Red, Grey, Tan or White crushed stone with either a 20% **Beam Clay® Binder** for smoother surface, or a 5% **Beam Clay® Binder** for a somewhat crunchier surface, or with **Stabilizer®** a natural organic binder "**Stabilized**" for an even firmer, yet more resilient surface—each with excellent drainage and resistance to erosion. Excellent natural surfaces for walking paths, jogging trails, driveways, or patios.

Also, the effect is subtle. The surface looks like natural aggregate. Upon further inspection you notice the aggregate holds together. **The Path when wet, is stable.** These binders will not transform the aggregate into concrete- you can still feel the crunch of the gravel under foot. It simply makes an aggregate stronger where you want a natural, rugged appearance, but you also want better performance. **Easy to maintain:** Recommended maintenance is to scarify and roll each spring. Otherwise, drag mat as needed to maintain smooth surface. Recommended depth is 1" - 3" depending on your base. If poorly draining soil, stabilize base first with 3/4" minus road stone.

3/16" Burgundy Red Cart / Pathway Mix

One cubic yard weighs approximately 2,700 lbs., plus add 20% for compaction. Each 1" compacted requires approximately 5 tons per 1,000 square feet.

SYNTHETIC GOLF & LANDSCAPE TURF

A perfect golf practice facility needs to perform authentically and consistently - our turf does just that. Practice your drive or perfect your aim anytime of the year — there's no downtime for regular maintenance. Whether you're practicing or playing, our synthetic turf performs so closely to natural grass, you may not notice the difference.

100% polypropylene or nylon with 1mm rubber backing (for a firmer feel), 5mm foam-rubber backing (for a softer cushion), or unitary backing. Adjust speed by adding more sand infill. Can be installed outdoors or indoors on a compacted aggregate base or on concrete or asphalt. Comes in 12' or 15' wide rolls. 10' minimum order length. Various options for fringe areas.

PLEASE NOTE: Synthetic Turf is normally rolled face out. No charge to "reverse roll" cut pieces with turf faced in—which makes it easier to install—doesn't need to be flipped over.

There is a \$50 charge per piece to cut the width (there is a 1/4" tolerance) and/or pre-trim the scrim fabric along edge and reverse roll so that each piece will unroll with turf side up. For full rolls, there is a \$50 charge for pre-trimming & reverse rolling.

If gluing to concrete, use Robert's 6700 glue from Home Depot if 65° or more. For 55°+, use Turf Claw™ or Nordot 34-G. If installing over compacted aggregate, you need to spike perimeter and tape (12" w) & glue seams. If installing over macadam, be sure glue is compatible with macadam or loose lay with 2-3 lbs. sand to weigh the turf down, plus tape & glue seams. If gluing unitary backing, make sure glue is polyurethane compatible.
