BEAM CLAY®

Synthetic Turf - For Baseball & Softball

WHOLESALE PRICE LIST
 EFFECTIVE: JANUARY 1, 2021

SYNTHETIC TURF FOR BASEBALL & SOFTBALL

Ideal for batting tunnels, dugouts, bullpens, walkways, coaching boxes and locker rooms. 100% polypropylene, with 1mm rubber backing (for a firmer feel, especially for loose lay applications), 5mm foam-rubber backing (for a softer cushion), SilverBack™ polyurethane backing. Can be installed outdoors or indoors on a compacted aggregate base or on concrete. Comes in 12' or 15' wide rolls. 10' minimum order length.

BASEBALL 36 PREMIUM - 36 OZ. POLYPRO PILE

The same premium grade of turf that our batting practice mats are made of. Great for any use you may have without getting into stadium grade products. 36 oz. pile, 12' & 15' wide stock in spring green (lighter multi-shade green) or pine (darker solid green). 12' wide stock also available in 12 additional colors.

BASEBALL 42 PREMIUM - 42 OZ. POLYPRO PILE

Needs 2-3 pounds of sand infill per square foot if not glued to concrete.

PL70715WC1MM	15' wide stock, pine or clay, 1mm rubber	\$3.45/SF
---------------------	--	------------------

BASEBALL 36 with 5mm foam and **BASEBALL 42** with 1mm rubber backing have the same feel. **BASEBALL 42** is thicker not taller. Both provide excellent resistance to spikes.

PLEASE NOTE: Synthetic Turf is normally rolled face out. No charge to "reverse roll" cut pieces with turf faced in—which makes it easier to install—doesn't need to be flipped over.

There is a \$50 charge per piece (**#CPTCUT**) to cut the width (there is a 1/4" tolerance) and/or pre-trim the scrim fabric along edge and reverse roll so that each piece will unroll with turf side up. For full rolls, there is a \$50 charge for pre-trimming & reverse rolling. (**#CPTTRIM**)

If gluing to concrete, use Robert's 6700 glue from Home Depot if 65° or warmer, Turf Claw™ if 55°+, or Nordot 34-G if 50°+. If installing over compacted aggregate, you need to spike perimeter and tape (12" w) & glue seams. Turf Claw™ can be shipped with your turf order. Check current pricing for tape & glue per quantity needed. If installing over macadam, be sure glue is compatible with macadam or loose lay with 2-3 lbs. sand to weigh the turf down, plus tape & glue seams. If gluing SilverBack™ polyurethane backing, make sure glue is polyurethane compatible.

For Batting Tunnels, all the above with foam backing are heavy enough to not be glued or spiked, but adding 2-3 lbs. sand per square foot is recommended for more weight to prevent shifting.

Batting Practice Mats are **recommended** for batting tunnels to reduce wear from cleats.

Synthetic/Artificial Turf Groomers - Go Groomer Go—Inline Safety Magnet

G30 Inline Safety Magnet

Even the best maintained synthetic fields have potential dangers from unwanted foreign debris hidden within the surface infill. While the **Go Groomer Go™** properly grooms a synthetic turf field, the **G30 Inline Safety Magnet** goes the extra step to insure that hidden dangers, which are unseen by the naked eye, are properly removed. Best of all, the Inline Safety Magnet is compatible with all 3 **Go Groomer Go™** models and can be used while simultaneously grooming a synthetic field.

With the **G30 Inline Safety Magnet**, risk management is drastically lowered by improving the safety of the playing surface for those who utilize the synthetic turf facility.

Debris picked up by the Inline Safety Magnet on a high school's multipurpose synthetic field

Debris picked up by the Inline Safety Magnet on a university's soccer stadium field

Debris is easily and safely removed from the **G30 Inline Safety Magnet**

The **G30 Inline Safety Magnet** is not only a synthetic turf magnet, it is also the magnet you can't afford not to have. Time and time again the results of using the **G30 Inline Safety Magnet** on a synthetic turf field are astonishing. Some of the items picked up by the magnet are small but numerous such as hair pins and bobby pins. However, other items, which are much more dangerous are screws, nails, bolts, wires, earrings and other sharp, skin piercing objects (some of which are rusted). These items easily find their way onto the playing surface and into the synthetic infill but are just as easily removed by the **G30 Inline Safety Magnet**. Removing such items will drastically decrease the unlimited potential dangers and liabilities that could ensue as a result of an injury.

PLEASE NOTE: Synthetic Turf is normally rolled face out. No charge to "reverse roll" cut pieces with turf faced in—which makes it easier to install—doesn't need to be flipped over. There is a \$50 charge per piece to cut the width (there is a 1/4" tolerance) and/or pre-trim the scrim fabric along edge and reverse roll so that each piece will unroll with turf side up. For full rolls, there is a \$50 charge for pre-trimming & reverse rolling.

If gluing to concrete, use Robert's 6700 glue from Home Depot if 65° or more. For 55°+, use Turf Claw™ or Nordot 34-G. If installing over compacted aggregate, you need to spike perimeter and tape (12" w) & glue seams. If installing over macadam, be sure glue is compatible with macadam or loose lay with 2-3 lbs. sand to weigh the turf down, plus tape & glue seams. If gluing unitary backing, make sure glue is polyurethane compatible.

BEAM CLAY®

Synthetic Turf for Bocce Courts

WHOLESALE PRICE LIST
 EFFECTIVE: JANUARY 1, 2021

BOCCE TURF™ - SYNTHETIC TURF FOR BOCCE COURTS

Can be installed over crushed aggregate base (3/4" minus) or glued to concrete or asphalt. Tape and glue needed for seams, if installing over crushed aggregate. 1/2" of fine stone dust recommended over crushed aggregate base for a smooth compacted surface. Permeable turf not recommended—can cause wash out in base. Perimeter drainage best—weep holes in frame if above ground at surface of turf, perimeter drains if below ground (3/4-1" plastic pipe at both sides of center line or at corners connected to drain will work. Foam backing recommended—helps lessen bounce and helps prevent dimples forming in the aggregate base. Scrim over foam backing recommended for glue down, without scrim over aggregate base (less curling). Turf (over aggregate base) can be nailed to pressure treated 2x4's installed vertically around perimeter and/or a bounce board can be added to frame to hold turf down to prevent edges from curling—up but not so tightly to prevent drainage unless there are weep holes.

Here are some guidelines for choosing turf:

Most Popular - Bocce 25 oz. Nylon and 24 oz. Polypro with shorter and denser fibers and 5mm foam backing are the most popular, followed by 36 oz. Polypro and 36 oz. Nylon.

Bounce - 5mm foam backing gives less bounce. 1mm rubber gives more bounce. Bounce has a lot to do with the face of the turf as well: more turf in the face (greater pile height and density) will cushion the bounce more. Adding round sand will decrease bounce. Adding angular or sub-angular sand will increase bounce.

Speed - 24 oz. Polypro is the fastest surface, followed by 36 oz. Polypro. Speed can be increased by adding either sand and adjusted on any except 24 oz. Polypro, which is too dense and short. Adding up to 2 lbs. sand per square foot allows you to get the speed and bounce you prefer.

Memory - Nylon turf DOES NOT have "memory" Polypropylene does. What this means is if you walk on Polypropylene turf every day for a year or more, eventually it will mat down. It "remembers" being mashed down and eventually doesn't come back up. However, Nylon turf will look the same after each use — it doesn't remember being mashed down and goes back to its original state after each use. However, this come with a price. Nylon is more expensive.

There is no charge to cut the length or reverse rolling, so that each piece will unroll with turf side up. **There is a \$50 per piece cutting charge** to cut the width and/or pre-trimming the scrim & selvage fabric along edge. There is up to 2" extra width per stock roll & typically 6" extra length per cut roll.

Cutting width: There is a 1/4" tolerance. You may be better to cut width on site with a utility knife, especially if there is any variation in width of court.

1 mm rubber backing does not expand or contract as much as other backings and is especially used for loose lay applications. Scrim on foam backing keeps the foam from cracking when stored rolled up in warehouse. Scrim will not curl if gluing down but will curl if installing over crushed aggregate without securing the perimeter. Use foam back with scrim for gluing to concrete or macadam. Use foam without scrim for installing over crushed aggregate unless securing perimeter. If gluing unitary backing, be sure glue is polyurethane compatible. Robert's 6700, NORDOT 34-G, and Turf Claw are polyurethane compatible but always double check the label to be sure.

Concrete should be cured, clean and dry. Concrete shall be free of paint, dirt, grease, oil curing or parting agents, and other contaminants, including sealers, that may interfere with the bonding of the adhesive. Whenever a powdery or porous surface is encountered, a primer compatible with the adhesive shall be used to provide a suitable surface for the glue-down installation. Patching of cracks and depressions shall be made with an appropriate and compatible latex or polymer fortified patching compound. Do not exceed manufacturer's recommendations for patch thickness. Large patched areas must be primed.

Recommended Glues

General Maintenance

OUTDOOR USE

Sweep the synthetic turf as needed frequently with a broom to remove surface soil, and hose down occasionally with water. Do not use a rotary brush machine.

INDOOR USE

Vacuum the grass like carpeting as you would any other type of carpeting to pick up surface soil.

STAIN REMOVAL

Synthetic turf is resistant to stains. However, spills do occur, and the resulting stains should be removed as soon as possible. In most cases, they can be removed with either detergent suds or a solvent-based cleaning agent. Follow the **STAIN REMOVAL CHART** for specifics.

Stain Removal Chart

WATER-BORNE AND MISCELLANEOUS STAINS

Acid, Alcohol, Animal Urine, Alkali, Blood, Coffee, Tea, Cola, Soot, Chocolate, Dye, Glue, Fruit Juice, Ice Cream, Latex Paint, Milk, Mustard, Rust, Water Colors

REMEDY

Sponge with detergent suds and cold water. This method will be effective even after 24 hours. Note: It is important to use just enough fluid to irrigate solid particles out of fabric. Too much fluid will leave a "ring." Clean from outside of stain in toward center so as not to leave a ring.

PERSISTANT STAINS

Chewing Gum
 Crayon
 Nail Polish
 Lipstick
 Metal Polish
 Furniture Stain
 Tar
 Oil Paints

REMEDY

Spray with Freon Aerosol and Scrape
 Sponge with dry cleaning solvent
 Sponge with acetone.
 Sponge with dry cleaning solvent
 Sponge with dry cleaning solvent
 Sponge with dry cleaning solvent
 Scrape Excess, Sponge with dry Cleaning Solvent
 Blot Immediately, Sponge with turpentine or paint remover. Blot with detergent and water. Re-sponge with cold water to remove detergent

EMULSIFIED STAINS

Cosmetics, Ink, Shoe Polish

REMEDY

Sponge with detergent and cold water. Apply solvent. Clean solvent residue with soap and water. Re-sponge with cold water to remove detergent

Note: in some cases it may be necessary to repeat any of the above procedures to insure thorough cleaning

Synthetic Turf for Tennis Courts

WHOLESALE PRICE LIST
 EFFECTIVE: JANUARY 1, 2021

TENNIS TURF™ - SYNTHETIC TURF FOR TENNIS COURTS

A perfect tennis court needs to perform authentically and consistently—our turf does just that. Tennis turf is designed to act like natural grass, reducing the risk of injury to your joints and giving you a fun, reliable court.

Can be installed over crushed aggregate base (3/4" minus) or glued to concrete or asphalt. Tape and glue needed for seams, if installing over crushed aggregate. 1/2" of fine stone dust recommended over crushed aggregate base for a smooth compacted surface. Perforated turf not recommended—can cause wash out in base. Perimeter drainage best.

24 oz. Polypropylene , 12' wide, pine green or clay SilverBack™ Polyurethane	PL35712WSB	\$2.10/sf
36 oz. POLYPROPYLENE artificial turf. Available in 14 colors.		
12' wide, pine or spring green, SilverBack™ Polyurethane	PL70512WSB	\$2.75/sf
15' wide, pine or spring green, SilverBack™ Polyurethane	PL70515WSB	\$2.75/sf
15' wide, spring green, 1mm rubber	PL70515W1MM	\$3.25/sf
12' wide, clay, red, white, blue, orange, yellow, black, purple, crimson, maroon, brown, navy, SilverBack™ Polyurethane	PL12WCSB	\$2.95/sf

PLEASE NOTE: Synthetic Turf is normally rolled face out. No charge to "reverse roll" cut pieces with turf faced in—which makes it easier to install—doesn't need to be flipped over.

There is a **\$50 charge per piece to cut the width** (there is a 1/4" tolerance) and/or pre-trim the scrim fabric along edge and reverse roll so that each piece will unroll with turf side up. For full rolls, there is a \$50 charge for pre-trimming & reverse rolling.

1 mm rubber backing does not expand or contract as much as other backings and is especially used for loose lay applications.

Scrim on foam backing keeps the foam from cracking when stored rolled up in warehouse.

Scrim will not curl if gluing down but will curl if installing over crushed aggregate without securing the perimeter.

Use foam back with scrim for gluing to concrete or asphalt. Use foam without scrim for installing over crushed aggregate unless securing perimeter.

If gluing unitary backing, be sure glue is polyurethane compatible.

Robert's 6700, TurfClaw and NORDOT 34-G are polyurethane compatible but always double check the label to be sure.
