Double Man Overspeed Trainer

This overspeed training device is the safest overspeed trainer you will find. By attaching this device to 2 runners you can overspeed the runner in back with comfort and security. The back runner allows the front runner to stretch the elastic up to 3 times its length. This then allows the back runner to be pulled forward with the help of the elastic. 20' safety sleeve elastic with 2 swivel belts and stretches to 60'.

STDOT UPS 6 lbs.\$126.00

Single Man Overspeed Trainer

Single person overspeed training device. Athlete is attached to anchor and the anchor is attached to a secure object. In order to create resistance the athlete prepares by moving away from the point of anchor. The added resistance pulls the athlete faster forcing the athlete's stride to lengthen and pace to quicken. After the overspeed training device has performed its role, the athlete pulls the quick release strap, and the device separates from him/her. The athlete then tries to maintain that speed and stride beyond the point of anchor. This trainer is 30' long and stretches to 90'.

STSOT UPS 7 lbs.\$171.00

"Safety Sleeve"

The "Safety Sleeve" technology system is used on our overspeed training aids for safety and performance. The elastic cord is encased in a heavy webbing to ensure a safe workout. You will find this system on the following products: **STDOT, STSOT, STA105, and STA150.**

Accelerator 105

Great for keeping athletes low out of the start. Perfect acceleration training aid. The 10' safety sleeve elastic can stretch to 30'. Works both forward and backward. Comes in either 105 to 149 lbs. or 150 lbs. and up. Includes Slastix, one universal harness, and one anchor. Ideal for all athletes.

STA105 105-149 UPS 5 lbs.\$233.00
STA150 150 and up UPS 5 lbs.\$284.00

Resistance Trainer

Simply attach handle/strap assembly to shoulder harness and hold on. This allows the runner the most realistic resistance while running. 10' long strap with no pinch 10" handle connected by durable clip to a universal, fully adjustable padded shoulder harness.

STRT UPS 1 lb.\$91.00

Tandem Tow

This training aid allows both athletes to run together. Back runner holds back front runner. Athletes can at any time quickly spin around and switch roles going back the other way. 10' long strap with large 3" wide loops at each end.

The best liners for your purpose and your budget.

All Stackhouse four-wheel liners (except LPFP50) use a heavy duty, 20 gauge steel body with an attractive powder coated blue finish. The liner body has been designed so that its wedge shape ensures a constant flow of chalk to the bottom of the liner. Our liner gut, which is driven by the liner wheels, has an auger at each end that forces the chalk into a six-bar expulsion wheel which ensures a consistent flow of chalk. A fingertip control allows you to adjust the thickness of your line and control shut-off of chalk. The liners ride on rubber diamond-tread wheels that use steel hubs and bearings for minimum rolling resistance. The liners offer both a 2" and 4" line for baseball, football, and soccer fields. These features, combined with the 5 models we offer, allow you to pick the best liner for your purpose - within your budget.

Auger gut design ensures consistent flow of chalk

WALL PADS

Safety is our highest priority...

Stackhouse Athletic has always believed that safety is the highest priority in any sport. That's why we offer a series of padding for this very purpose. By padding walls, poles, beams and other hard surfaces, you are decreasing the possibility for injury. Padding is most commonly applied in gyms, wrestling rooms and other activity areas. Whether inside or outside, Stackhouse has the padding for all of your needs. See below for Stackhouse padding applications, and if you don't see what you need, please call your local dealer with your specific requirements.

Wall Pads

Whether you're covering four walls corner-to-corner in a wrestling room, or a wall behind a basketball hoop, our standard wall pads can be made to fit any room. All of our wall pads are made of foam bonded to 7/16" high density oriented strand board (OSB) and covered with 14 oz. vinyl that is folded and stapled to the back of the strand board. 1" lip at the top and bottom of each pad make for easy mounting to any surface. (Mounting hardware provided by installer or end user.) Vinyl is available in colors shown in graph. Special sizes and cut-outs available upon request.

Outdoor Steel Volleyball System
Originally designed for park and recreation districts who were looking for a system that could be left out year round, this 2 3/8" galvanized steel system works well for anyone looking for a top quality outdoor system. Can be installed in either sand or asphalt. For sand installations simply order additional length to uprights for stability. Can be installed permanently or into 2' ground sleeves for a finished height of 8' 6" so both men's and women's volleyball may be played. Anti-whip winch is used to bring net to the correct tension. System includes standards, ground sleeves and net only. (Nylon covers optional, call for details).
