**TIRES, RIMS, AND WHEELS**

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice. However, if the tire type cannot be supplied we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

NOTE: Dealers should contact an Application Specialist if they plan to use a tire not offered on the price list. Some tires may require axle oscillation stops or other machine modifications.

NOTE: All tires are tubeless, include rims, and come in a set of 4.
