**STEERING AND FILTRATION**

Standard filtration systems provide case drain filtration and low pressure filtration. Case drain filters are monitored with the VIMS system. A quantity of (3) filters are put on the case drain of the brake pump, steering pump, fan pump and motor, implement pump, and AOC motor. A quantity of (5) filters are put on the output side of the steering pilot pump, AOC pumps, and fan motor. Deluxe filtration upgrades the system by placing (7) high pressure screens on the output side of the steering, brake, implement and fan pumps, the fan motor, and the secondary steering pump (if equipped).

L	329-3316	<b>STEERING,SECD / FILTRATION,STD</b> . . . . . 0		NC
		Secondary steering system provides limited steering control in the event of a loss of power or a loss of hydraulic flow. The system includes a ground speed driven secondary pump that supplies hydraulic power to the steering system. This feature may be required by local regulations. Please contact your Caterpillar marketing representative with any questions. Provides standard filtration.

**TIRES, RIMS, AND WHEELS**

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice. However, if the tire type cannot be supplied we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

NOTE: All Tires are tubeless, include rims and come in a set of 4.
