**TIRES, RIMS, AND WHEELS**

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice. However, if the tire type cannot be supplied we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

NOTE: All tires include rims & come in a set of 4. Tires are tubeless & non-directional unless otherwise stated.

NOTE: Other tires are available upon request.

**BUCKETS**

REQUIRED BY: AM-S

Buckets must be ordered Installed on a Machine Order.  
 For questions on buckets intended for Machine Orders please contact your Marketing Subsidiary Machine Coordinator.

Loose buckets should be ordered on a MISC Order through Caterpillar Work Tools - Wamego using source code OP-0672.

For availability of loose buckets please email [worktools@cat.com](mailto:worktools@cat.com)  
 If you are going to order a loose bucket from CWTS and a machine from Aurora and if you need them shipped at the same time then you need to cross-reference the MSO's with each other.

"GET" is NOT automatically included on bucket orders. "GET" must be entered on the order with your bucket selection, unless text for bucket states otherwise. Please make the "GET" selection from the "GET" listed immediately following the bucket listing.

Recommend use of bolt-on adapter option, adapter and segment option, or bolt-on cutting edge option for general purpose buckets and material handling buckets.

Material density will determine the appropriate capacity bucket. Refer to the Spec log. Exceeding maximum payload may cause loader instability.

ALL BUCKETS ARE ALSO AVAILABLE ON A MISCELLANEOUS ORDER.

110% FILL FACTOR: This capacity is calculated considering GETs installed.
