TIRES, RIMS, AND WHEELS

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice. However, if the tire type cannot be supplied we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

NOTE: All tires include rims & come in a set of 4. Tires are tubeless & non-directional unless otherwise stated.

NOTE: Other tires are available upon request.

OPERATOR ENVIRONMENT

INTEGRATED OBJECT DETECTION SYSTEM.

The Cat Integrated Object Detection adds radar and alarms to the standard on-board rear vision camera to notify the operator when something is close to the rear of the machine. This system is configured with zones, and objects in those zones trigger various levels of alarms. A display screen in the cab provides visual confirmation of the objects detected by the radar, so operators can make informed decisions.

NOTE: C5 radars (below) are the preferred MWL system. C6 radars are available for regions where required, and depends on radar approval. For a list of approved countries, please visit: <https://dealer.cat.com/detect>

BUCKETS

Buckets must be ordered Installed on a Machine Order.
 For questions on buckets intended for Machine Orders please contact your Marketing Subsidiary Machine Coordinator.

Loose buckets should be ordered on a MISC Order through Caterpillar Work Tools - Wamego using source code 0P-0672.

For availability of loose buckets please email worktools@cat.com

If you are going to order a loose bucket from CWTS and a machine from North Little Rock and if you need them shipped at the same time then you need to cross-reference the MSO's with each other.

Material density will determine the appropriate capacity bucket. Refer to the Specalog. Exceeding maximum payload may cause loader instability.
