- A must for younger players just learning the game
- Eliminates coming off the L.O.S. flat footed, heel placement first, raising up, over-striding, getting feet too close together, and stepping in the center of the body (wt. 15 lbs.)

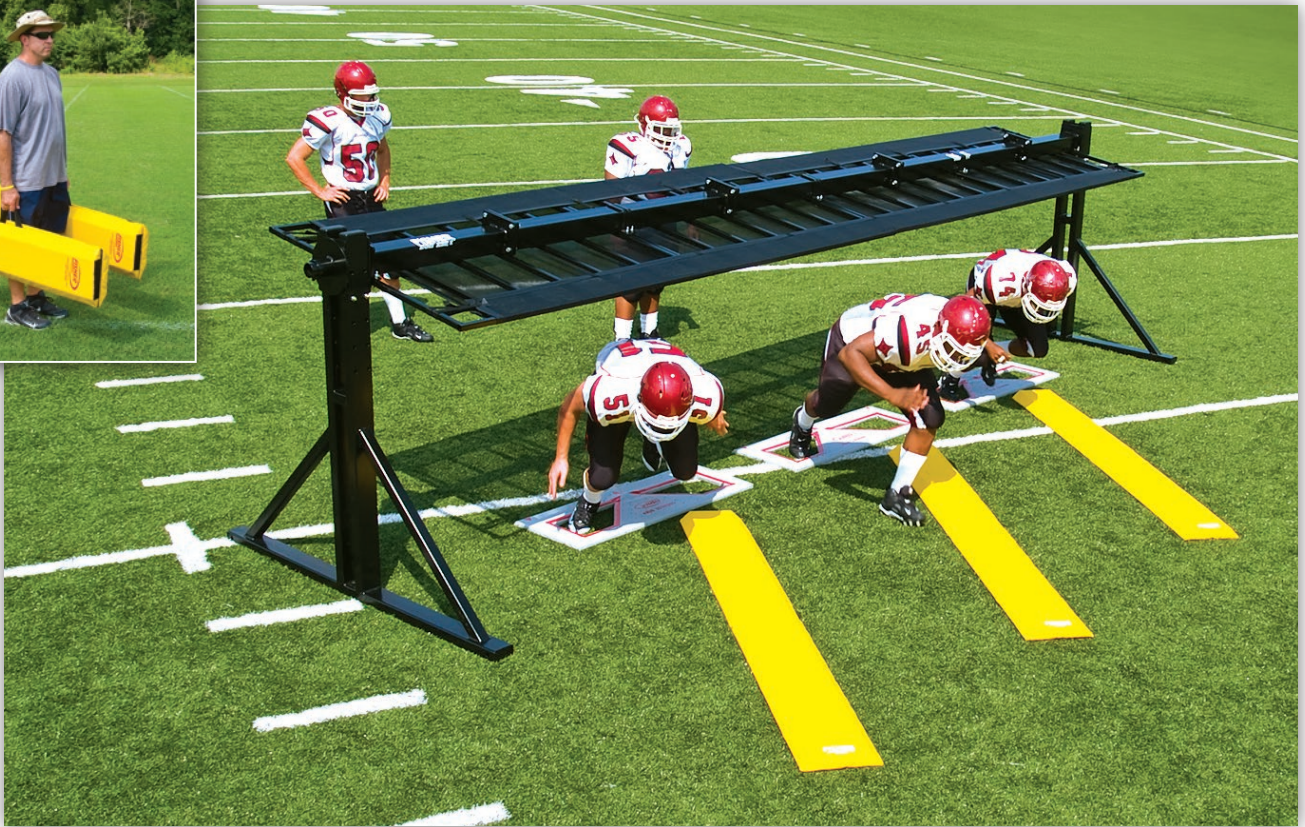

Created by Sam Betz, Coaching Veteran

- Create a 6" power step that will force players to come off their toes, not their heels or flat footed
- Forces players to step at a 45° angle for slants and position blocks (reach block, cut off block)

PITCHING AIDS

360° PITCHING TARGET

Effective Velocity, by definition, is the study of pitch speed and how location changes the reaction time by forcing the hitter to hit the ball at a contact point that is different than they were ready for. When a pitcher throws the ball "inside" or "outside", the speed of the pitch changes because the hitter needs to adjust to the location. A pitch can change up to 3 MPH for every 6" inches that the ball changes laterally. The **360° Pitching Target** helps a pitcher with location, thus fine-tuning his Effective Velocity.

Features:

- 40 oz. black vinyl
- Steel frame construction
- Ships via Ground
- Easy to assemble
