1. The front end loader option requires the joystick and minimum of five rear remote valves on the tractor. When the loader option is enabled:

- If five rear remote valves are present, the loader is operated by joystick using rear remote valves four and five,

- or, if six rear remote valves are present, the loader is operated by joystick using rear remote valves four, five and six.

2. Front end loader controls are allocated as follows:

- Rear remote valve four control  
raise/lower,
- Rear remote valve five control  
dump/crowd,
- Rear remote valve six, if equipped,  
controls the third function.

3. When the loader option is enabled, automatic functions for the joystick are disabled.

4. In the case where a joystick is added as a dealer installed accessory, the tractor may have five or six rear remote valves and four paddles. Paddle four is inoperative in this situation.
