

# 2017 Price List

To price a size not listed, simply multiply the width by the length to get the S.F. Then use the price of the next highest S.F. unit within that structure type.

4P PYR example: 23' x 23' x 8' EH = 529 S.F. PYR unit. Therefore the next highest S.F. PYR unit with an 8' EH = \$4,879

4P HIP example: 19' x 24' x 8' EH = 456 S.F. HIP unit. Therefore the next highest S.F. HIP unit with an 8' EH = \$4,246

All Prices assume soil profile type based on Table 1806.2 of IBC 2012 Class 5 soil material. If soil encountered varies from assumed type or expansive soil or local fill is encountered, it is recommended that a geotechnical engineering analysis be conducted at the expense of the customer.
