CARBON-LITE™

COMMERCIAL VACUUM

Mosquito's new Carbon-Lite™ is simply the lightest, most powerful commercial backpack vacuum available today. New exotic Poly Carbon™ material combined with the industry's most powerful Pulse Power™ motor gives you unmatched performance. At Mosquito our attention to detail and commitment to innovation never ends. Our latest product, the Carbon-Lite™, is the beginning of a true revolution in industrial backpack vacuum design and performance.

Mosquito's state of the art design studio overlooks our production stations in Huntington Beach, California USA. Furthering our commitment to quality our new Carbon-Lite™ boasts an impressive 88% of components manufactured in the US. Combine that with the industry's longest warranty and the choice is clear.

THE CARBON-LITE

- The body: New use of Poly-Carbon™ material. Lighter and stronger. The Carbon-Lite™ is approximately 22% lighter than the ProTeam Pro 10.
- The motor: Our new Pulse Power™ motor has 121" of lift, approximately 42% more than ProTeam!
- The hose: Our exclusive Never-Clog tapered hose is an industry first and patent pending. The hose starts at 1 1/2" and grows to 3 1/4" as it enters the vacuum. A 9" straw doesn't get stuck. Try that with the competition.
- Components: Titanium and aluminum components, strong and lightweight.
- Cooler: The backrest is suspended away from the vacuum, keeping your back cooler.
- Blower: The Carbon-Lite™ doubles as a blower on the 10qt. This innovative feature is further enhanced with the use of the crevice tool on the end of the hose.
- Tools: The Z-Glide tool upgrade is standard on the Carbon-Lite™.
- Extension Cord: Our exclusive Premium Ultra-Glide cord slides easily across floors and resists cord twisting. Available only from Mosquito!
- [YouTube](#) training tutorials for each feature, benefit and comparison.

vs.

CHINA TOOLS

1. BODY

Premium nylon, impact and wear resistant.

(pictured, ring is offset for size)

2. COMPRESSION RING

AFT's larger groove and nylon material guarantee smooth effortless motion.

1. BODY

Molded from soft plastic. This two-piece design is susceptible to premature wear. You can twist/rotate the post from tool.

2. COMPRESSION RING

This tool has a small groove and soft material which allows the ring to gall the plastic causing premature failure and poor tool rotation.

3. MOLDING

1-Piece design, flawless performance and wear characteristics.

LARGE

4. HAIR / DEBRIS

AFT's smooth channel eliminates hair snags and debris clogs.

3. MOLDING

This 2-piece design is innovative but flawed. It allows the manufacturer to use metric or standard adapters on the same mold. The design is wear susceptible and leaks air through the seam.

SMALL

4. HAIR / DEBRIS

Look closely, this 2-piece design has two major hair snag areas. From the outside it looks normal but the cut away clearly shows the design flaw.

5. INSIDE DIAMETER

This smooth bore design is larger with 14% more air flow.

5. INSIDE DIAMETER

This 2-piece press fit design steps down in size restricting air flow.

Super HEPA

Carpet, Hard Floor, General Cleaning

Vacuum 60% faster with the Super Mosquito HEPA. Extremely high air-flow speeds your cleaning, increasing productivity, reducing costs and effort. Great for use in schools, office buildings, hospitals and high traffic areas. Highly effective in removing fine dust and particles embedded deep in the carpet fibers.

Mosquito Super Vac Fact Super HEPA Vacuums have a motor that has thermal protection. If under any circumstance the motor exceeds its working temperature the vacuum will shut-off until it cools. This eliminates any chance of motor damage.

BACKPACKS

Floor Sander / Construction Mosquito HEPA

Floor Sander / Construction environments demand different motors than traditional backpack vacuums. Standard vacuums use light weight single stage high-speed motors that use air flow to cool motor windings. This is excellent for normal vacuuming but quickly shows its weakness in floor sanding environments. Our Floor Sanding / Construction vacuum has a Torque Master two-stage motor with higher inches of lift, high air flow and the ability to endure heat generated by floor sanding/construction environments.

**Construction
New Improved 3.0**

- New motor
- New waist belt
- New switch location
- New reusable motor gasket

**Now with
115" of Lift**

Available in
6 & 10 Quart Vacuums

Why a different motor?

1. Sanding creates hot air and fine dust.
2. Conventional motors cool with airflow.
3. Fine dust starves airflow as it clogs the filters
4. It takes a special motor to stay cool without airflow
5. The Torque Master 2-Stage Motor stays cool with limited airflow.

What makes the Torque Master motor different? The Torque Master motor has 1/3 more motor windings that reduce the motor revolutions but gives it more power. To generate high airflow it adds an additional fan or second-stage. This creates additional inches of lift (similar to torque) to move air even when the recovery bag is compacted with fine particles

3-GALLON SPOTTER / EXTRACTOR

Innovative, powerful, clever. It's what we hear about our new 3-gallon spotter. Designed with simplicity and durability in mind and performance only found on large extraction equipment. Options of standard or super vacuum motors, 201 degree stainless steel in-line heater, 55, 120 and 170psi solution pumps leave this spotter clearly in a category of its own. Now add the industry's first "Noise Diffusing Exhaust Manifold" and a new definition of clever is an understatement.

3-GALLON SPOTTER / EXTRACTOR

Mosquito's use of premium components includes sealed marine-grade bearings, epoxy coated vacuum fans, pumps with chemically resistant viton seals, and stainless steel latches. The list goes on and on. To put it simply, each component must excel in its function or we won't use it. Mosquito is setting a new standard in design excellence and yes, Mosquito is American designed, manufactured and owned.

USA

Hidden handle stays out of the way until you need it

Easy access recovery tank port with clear lid; allows you to monitor foam and liquid levels

Balanced carrying handle

20ft \odot certified cord

Top-mounted controls

Foam-shield™ captures airborne moisture/foam in the recovery tank and returns it to liquid for disposal

650-0005

Brass quick-disconnect

Stainless steel rotary latch

Mosquito's stainless steel heater with dual ceramic thermostats and 1000 watt element

Mosquito's exclusive DTS dual thermostat system with bimetallic thermal cut off switches regulates temperatures within 9 degrees

In-line clear view filter eliminates motor damage caused by liquid starvation to the pump. It's stainless steel and washable

500-0002

Molded-in stand pipe eliminates leaks

Ametek Lamb side discharge motor with epoxy coated fan blades and sealed bearings

Double wall solution tank encapsulates the pump and vacuum motor further reducing noise in addition to the "Noise Diffusing Exhaust Manifold"

55psi FloJet, 120psi & 170psi AquaTec pump models available

Non-marking sealed ball bearing wheels

Shown with Stainless steel hand tool 900-0040

Stainless steel tools with Viton seals

Single rotary latch allows for quick removal of the recovery tank for easy disposal

Molded-in cord wrap with quick-release. Just pull from a bottom corner and you're ready to go! No unwinding required

Balanced easy carry handle - dispose of liquids quickly and easily

Ducted air intake channels cool air to the motor

Cord strain relief is recessed inside the cord wrap

- 1 Red arrows show heated / high-pitch air exiting the motor into the exhaust manifold.
- 2 Orange arrows show air moving through the exhaust manifold. High frequency noise is deflected against sound absorbing material, as air is gradually released.
- 3 Yellow arrows show air exiting the noise diffuser without the high pitch noise of the fan blades.

Industry First

Mosquito's exclusive "Noise Diffusing Exhaust Manifold" suppresses high-frequency sound with its noise-canceling technology. Motor exhaust is directed through exhaust grates which redirects sound waves while gradually releasing exhaust. No back pressure is generated from this device as it scrubs 8dB and 11dB sones from the final exhaust. This is an industry first and the beginning of a new generation of extractors from Mosquito.

WET/DRY

16-GALLON WET/DRY

Mosquito's 16-Gallon Wet/Dry sets another standard in its class. In an industry with dozens of competitors, we found it exciting to find so little innovation over the years. Our design team quickly found obvious improvements to enhance reliability and ease of use. Take a look at our highlighted improvements and features below. We're sure you'll be as excited as we were bringing this truly innovative product to market.

Industry First

Accordion Stretch Hose

Our new accordion stretch hose, eliminates the need to carry an extra hose. Our new hose expands as you need it and instantly retracts when you hold your hand over the end, another industry first.

Industry First

Mosquito's exclusive "Noise Diffusing Exhaust Manifold"

Suppresses high-frequency sound with its noise-canceling technology. Motor exhaust is directed through exhaust grates which redirects sound waves while gradually releasing exhaust. No back pressure is generated from the device as it scrubs 7dB and 9 sones from the final exhaust. This is an industry first and the continuation of our new generation of extractors from Mosquito.

Ribbed Polyurethane Squeegee Blades

650-0014

Our Ribbed Polyurethane Squeegee Blades are the industry's finest. Flexible and wear resistant for the perfect combination to remove liquids from the cleaning surface.

Warranty - lifetime tank
3 years parts & labor

Motor cooling fan air inlet

Single latch access

Carry handle

Caster with brake

Ergonomic handle

USA

Molded-in splash protection

Industry First Dry bag storage

2-Stage motor Most Powerful in its Class

Skid-Plate Pedal

Industry First

Indestructible 10" wheels
US Patent Pending

Powder coated metal squeegee assembly with ribbed Polyurethane blades

Industry First

Automatic Vacuum Shut-off

Motor failure is never pleasant. This is caused by motors ingesting liquids. Our new magnetic motor shut-off never lets liquids get close to your vacuum inlet. Traditional wet/drys use ball floats that actuate when liquids in the recovery tank float the ball close enough to the vacuum inlet to restrict vacuum. This almost guarantees liquids are ingested into the motor. Our automatic vacuum shut-off keeps your motor from ingesting liquids and extends your motor life.

Automatic shut-off

No Ball Float

Standard Tool Kit with Onboard Storage

Industry First

Single 50' cord wrap with rotating top holder for quick release

MOSQUITO 16-GALLON WET/DRY

Part No.	Machine
16-1000	16-Gallon Wet / Dry with Standard Tool Kit

WET/DRY COMPARASION

This comparison sheet is designed for reference only. The comparisons shown below are the most significant differences between Mosquito and it's 4 biggest competitors. Mosquito is continually improving it's performance, components, and weight. Of course Mosquito is known for it's customer pleasing aesthetics. At Mosquito we are always striving for accuracy. It's important to know and evaluate your competition.

EXTRACTORS

BLUE LINE

More Power, Less Cost

Simplicity at its finest. Our new value based extractor gives you all the great Mosquito design and performance without premium accessories. In short, we went back-to-basics and stripped down our standard extractor eliminating costly accessories to develop our new entry level extractor.

As with all Mosquito products we're proudly designed and manufactured in
 Huntington Beach California, U.S.A

12-GALLON EXTRACTOR

Innovative, powerful, clever. "Simply the most innovative extractor ever designed."
Is this quote possible? Yes, it's not only possible, it's true! No extractor design has ever incorporated so many advanced features and patented innovations in a single design. Mosquito urges you to compare our Mosquito 12-Gallon Extractor side-by-side to any competitor. The conclusion is self-evident. We are designed, manufactured and assembled in the **U.S.A.**

"Noise Diffusing Exhaust Manifold"

- 1 Red arrows show heated / high-pitch air exiting motor into the exhaust manifold.
- 2 Orange arrows show air moving through exiting motor into the exhaust manifold. High frequency noise is deflected against sound absorbing material, as air is gradually released.
- 3 Blue arrows show air exiting the exhaust without the high pitch noise of the fan blades.

Mosquito's exclusive "Noise Diffusing Exhaust Manifold" suppresses high-frequency sound with its noise-canceling technology. Motor exhaust is directed through exhaust grates which redirects sound waves while gradually releasing exhaust. No back pressure is generated from the device as it scrubs 8dB and 11dB sones from the final exhaust. This is an industry first and the beginning of a new generation of extractors from Mosquito.

Not Bronze or Silver.
"GOLD"

Molded-in vacuum tubes. Lifetime guarantee. No pvc or glued joints to leak.

When designing an extractor, it's important to have the recovery tank larger than the solution tank. This keeps foam and solution away from the vacuum inlet, extending motor life.

Mosquito's extractors automatically turn off the vacuum motors when liquids reach a preset distance from the air intake. Our competitors use inferior ball floats that allow liquids/foam to become dangerously close to the air intake, which is a very poor and old design.

This critical dimension keeps foam and liquid from sucking into the vacuum tube.

Our extractor has twice the standard controls. All are on the control panel.

It's just common sense. Mold-in the cord-wrap and make it a quick-release.

Mosquito's built in priming system allows you to simply rotate a valve (pictured) on the control panel and your pump is primed. No hose to lose or complicated procedure to follow.

Our competitors don't see the value of this feature. We use it everyday.

EXTRACTORS

If you become aware of competitors updates or inaccuracies please let us know immediately, so we can update our database. Additionally, if we need to include another competitor, let us know. 714-899-9600

1200PSI EXTRACTOR

1200-PSI HARD SURFACE EXTRACTOR

This powerful portable extractor is designed for high-pressure cleaning of tile, grout, and concrete or dial it down to 400psi and it's perfect for carpet extraction. Using one 3-stage and one 2-stage vacuum motor in combination with the air inlets in parallel gives this extractor the best combination of lift/air-flow ever produced in an extractor. Combine this with our patented "noise-diffusing exhaust manifold," control mounted priming valve, molded-in stand tubes and you have perfection! We encourage you to do a side-by-side comparison of our extractor and the competition. Analyze every component, every feature, ease of maintenance and your decision will never been easier. We hope you enjoy using our extractor as much as we enjoyed building the most advanced extractor available today.

Specifications

- 12G-1200
- Vacuum Motor: Single 6.6 High Output
- Pump: 1200psi (Adjustable down to 400 psi)
- Solution Pump: 12-gallon solution & recovery tanks
- Water Lift: 170 inches
- Power cords: (2) 25 Ft 12/3 guage
- Volt: 110
- Amp Draw: Cord one - 16 amp | Cord two - 14 amp
- CFM: 99
- Weight: 105 lbs dry
- Dimensions: 48H x 19W x 30L
- Vacuum Hose: (1) 25 Ft Sold separately
- Solution Hose: (1) 25 Ft Sold separately
- Standard Accessories: 25 Ft vacuum & solution hose
- Spinner: Sold separately

SX-15 sold separately

Warranty: Lifetime on body, 1-year on motor and pump

Industry First

"Noise Diffusing Exhaust Manifold"

Patents Pending

- 1 Red arrows show heated / high-pitch air exiting motor into the exhaust manifold.
- 2 Orange arrows show air moving through the exhaust manifold. High frequency noise is deflected against sound absorbing material, as air is gradually released.
- 3 Blue arrows show air exiting the noise diffuser without the high pitch noise of the fan blades.

Mosquito's exclusive "noise diffusing exhaust manifold" suppresses high-frequency sound with its noise-cancelling technology. Motor exhaust is directed through exhaust grates which redirects sound waves while gradually releasing exhaust. No back pressure is generated from the device as it scrubs 8dB and 11db sones from the final exhaust. This is an industry first and the beginning of a new generation of extractors from Mosquito.

MOSQUITO 12-GALLON 1200psi EXTRACTOR

Part No.	Machine
12G-1200	1200psi / Single 6.6 High Output (Machine only)

AUTOMOTIVE EXTRACTOR

AUTOMOTIVE 12-GALLON EXTRACTOR

Innovative, powerful, clever. "Simply the most innovative extractor ever designed." Is this quote possible? Yes, it's not only possible, it's true! No extractor design has ever incorporated so many advanced features and patented innovations in a single design. Using one 3-stage vacuum motor in combination with the air-inlets in parallel gives this extractor the best combination of lift/air-flow ever produced in and automotive extractor.

Mosquito urges you to compare our Mosquito 12-gallon extractor side-by-side to any competitor. The conclusion is self-evident. We are designed, manufactured and assembled in the **USA**.

Patents pending

Stainless hand tool & hoses included

Specifications

- **12A-1203H**
- **Water lift:** 137 inches
- **Weight:** 107 lbs dry
- **Vacuum motor:** 5.7" single 3-Stage Ametek
- **Single Power cord:** 25 Ft 12/3 guage 
- **Dimensions:** 48H x 19W x 30L
- **Pump:** 120psi Aqua Tec
- **Heater:** 1,200 watt heater
- **Standard accessories:** 15 Ft vacuum/solution hose
4 inch stainless steel upholstery tool

Warranty: Lifetime on body, 1-Year on motor and 2 Years on pump

Standard tool kit

4" Wide

Stainless steel hand tool w/ brass valve & Jet 900-0040

15ft. Solution hose assembly 201-0010

1 1/4" x 15ft. Vacuum hose w/cuffs 200-0011

OPTIONAL

Stainless steel hand tool w/ clear view head, brass valve & jet

4" Wide

For heated & non-heated extractors 900-0041

OPTIONAL

1 1/4" x 25ft vacuum hose w/-cuffs & solution hose assembly

201-00015

MOSQUITO 12-GALLON AUTOMOTIVE EXTRACTOR

Part No.	Machine
12A-1203H	120psi / Single 3-Stage Vac / 1200 Watt Heater (with Standard tool kit)

AUTOMOTIVE EXTRACTOR

AUTOMOTIVE 12-GALLON EXTRACTOR

Mosquito's stainless steel heater with dual ceramic thermostats and (2) 600 watt elements

Mosquito's exclusive DTS dual thermostat system with bimetallic thermal cut off switches regulates temperatures within 9 degrees

In-line clear view filter eliminates motor damage caused by liquid starvation to the pump, stainless steel, washable

"My name is Monty Bisson; founder, designer and president of Montgomery Designs / Mosquito company. After 21 years of designing and building vacuums, I've watched my competitors and myself succumb to the greed of off-shore manufacturing. Today our country is vulnerable, our talent unemployed, and profits empowering foreign competition. If you care, buy American. If you want power, quality and the longest warranty in the industry buy American-made Mosquito products!"
