

Included:

- MA 25 Unit
- Headset
- AC Adapter
- Audiogram Pad
- MA25 Operators Manual
- FREE Carrying Case

MAICO MA 25 PORTABLE AUDIOMETER

The super-light MA 25 weighs in at only 3.6 lbs and is small enough to hold in the palm of your hand. Although the MA 25 is tiny, it offers a full range of testing opportunities. Frequency levels range from 250 Hz to 8000 Hz and signal intensities from -10dB to 90dB HL. Because it is a portable audiometer, the MA 25 is engineered to be tough and reliable. The unit itself is extremely user-friendly and the over-sized knobs make adjusting frequency and hearing level easy. Other features include simple push-button operation for right/left, pulse, tone and warble. To provide you with more versatile opportunities, the MA 25 runs on 3 AA batteries or included AC adapter. A leather-like case is included for convenient portability.

- #29702 MA 25 Portable Audiometer..... \$935.00 ea
- #29728 Patient Response Switch.....\$65.00 ea
- #29746 Audiogram Tear Pad (50-pad).....\$6.25 ea
- #25122 AA Alkaline Batteries (4/pkg).....\$4.89 pk

MA 25E & MA 27E PORTABLE AUDIOMETER

Extends the functionality of the MA 25 and MA 27:

- Automated Hughson-Westlake.
- Results recalled from internal memory following test.
- PC compatible with SNAP software.
- Includes Patient Response Kit & USB cable.

- #29727 MA 25e Portable Audiometer..... \$1028.00 ea
- #29739 MA 27e Portable Audiometer..... \$1125.00 ea

Included:

- MA 27 Unit
- Headset
- AC Adapter
- Audiogram Pad
- Operation Manual

MAICO MA 27 PORTABLE AUDIOMETER

The MA 27's dependability has made it a favorite of hearing professionals for years. Rugged, all-in-one housing and reliable engineering means it's the audiometer you can count on. The unit features state-of-the-art audiometric circuitry to ensure accurate and fast test results. Switch between tone, pulse or warble by simply pressing a button. Large fingertip control knobs provide access to a full range of frequencies and hearing levels. The MA 27 is very easy to transport. The rigid, yet light-weight case with built-in handle and storage compartment not only protects the audiometer, but also allows you to pick-up-and-go in a hurry. Ample storage holds included headphones and other accessories. Now includes frequency 125 Hz whereas current started at 250 Hz.

- #29738 MA 27 Portable Audiometer..... \$1029.00 ea
- #29728 Patient Response Switch.....\$65.00 ea
- #29746 Audiogram Tear Pad (50-pad)..... \$6.25 ea

Included:

- MA 1 Unit
- Headset
- 2 AA Alkaline Batteries
- Audiogram Pad
- Operation Manual
- Carrying Case
- Device Stand

MA 1 AUDIOMETER

The MA 1 air conduction screening audiometer is small enough to hold in the palm of your hand with its super-lightweight design. This unit offers one hand operation that can easily be tucked into its included carrying case, along with the binaural headset. Although small, it offers a full range of testing screening, with test frequencies of 500Hz, 1000Hz, 2000Hz and 4000Hz. Signal intensities range from 15 to 50 dB HL.

Features:

- Air conduction screener.
- Easy one hand push button operation.
- Traditional binaural DD 45 headset included.
- Engineered to be touch and durable.
- Carrying case included.
- Powered by 2 AA alkaline batteries (not included).
- 1-year limited manufacturer warranty.

- #81185 MA 1 Air Conduction Audiometer . \$749.00 ea
- #25122 AA Alkaline Batteries (4/plg).....\$4.89 pk
- #29746 Audiogram Tear Pad (50-pad)..... \$6.25 ea

Maico Audiometry & Tympanometry

Included:

- MA 28 Unit
- Headset
- AC Adapter
- Audiogram Pad
- MA28 Operation Manual
- USB Cable
- B71 Bone Conduction
- Patient Response Switch

MA 28 AIR • BONE CONDUCTION AUDIOMETER

The MA 28 offers combined testing, intuitive operation and reliable technology. Pure tone testing checks your ability to hear tones of different pitches in each ear. The MA 28 is designed with state-of-the-art audiometric circuitry, which ensures fast, accurate test results. Bone Conduction audiometry is conducted by placing a bone oscillator behind the ear instead of using headphones. This is a helpful test in determining if hearing difficulty is conductive or sensorineural in nature. The RadioEar B71 bone conductor comes standard with the MA 28, an international gold standard accessory. MAICO engineers products with quality components, ensuring lasting performance and reliability.

Features:

- Large fingertip controls and easy turn dials.
- Full color screen with oversized viewing area provides easy to read test results.
- All-in-one sturdy travel case allows maximum portability.
- Device weighs only 6 lbs. with accessories.

#29755 MA 28..... \$1949.00 ea

Included:

- Easytym unit
- Probe tip and probe tip replacement
- Rechargeable battery
- Power supply unit
- Eartip box with eartips
- Calibration cavity
- Carrying case
- Maico impedance software

Shown with Eartip Kit (Item #29735) Sold Separately

EASYTYMP HANDHELD SCREENING TYMPANOMETER

This is the ideal handheld screening device for pediatric audiology in the school setting. The EasyTym is an automatic impedance unit, well suited to perform tympanometry and screen acoustic reflexes. With a unique, space-saving design, the EasyTym provides you with fast, accurate middle ear measurements. The detection and documentation of middle ear pathologies has never been easier or more efficient.

Features:

- NOAH Compatible.
- Ergonomic Design.
- Full color, high resolution graphic result display.
- Probe Tone: 226 Hz (standard), 1000 Hz (optional).
- Ipsi reflex frequencies: 500 HZ, 1 KHz, 2 KHz, 4 KHz.
- Rechargeable docking station; supplied with extra battery.

DIGITAL PILOT TEST : SELECT PICTURE AND PURE-TONE AUDIOMETRY UNIT

Select Picture Audiometry

The Digital Pilot Test screens children as young as three years old by presenting the hearing test as an interactive game. As a game, the test is easy for children to understand. As a test, the procedure gives you unmistakable responses for accurate results. You can even see the test progress on the LCD screen.

Pure Tone Audiometry

The Digital Pilot Test is also a complete pure tone audiometer which can be used to screen older children. With manual screening, you can choose the speed at which you present the tones. Easy fingertip operation gives you the flexibility to choose the frequency and hearing levels. Results can be recorded on the included score pads.

English/Spanish Digital Pilot Test

It's as simple as looking at the pictures. The child listens to 10 sentences presented at descending decibel levels. After each sentence, the child points to the corresponding picture on the picture board, and you record the result.

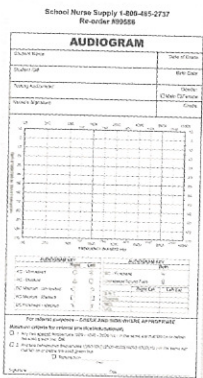

Printer sold separately.

#29712 *Digital Pilot Test includes Free Soft Sided Carrying Case*..... \$2225.00 ea

EQUIP WIPE TOWELETTES

Personal wipes to sanitize and clean your vision and hearing equipment. An alcohol free product that is safe for use on personal equipment, respirators, face shields, goggles and more.

#18292 100 per box.....\$5.95 bx

PHONE GUARDS

These phone guards, or ear cushion covers, fit most models of headphones used during a hearing exam. The phone guards slip over the ear cushion to keep the user's ears comfortable, clean and healthy.

#29375 500 per box.....\$67.50 bx

Hearing Screening

MADSEN ALPHA OAE

The single touch that starts the test also starts an entertaining cartoon to keep the child engaged and quiet during the test. The cartoon helps to create a friendly, relaxed test environment to decrease test time and increase the number of complete EN Alpha's high quality and full color touch screen is appealing to the screener and the child. Designed to overcome challenges and instill confidence, one concern you never have to worry about is accuracy. The MADSEN Alpha is equipped with a built-in probe check cavity, allowing the screener to check the probe in an instant. Simply insert the probe in the built-in cavity and get an automatic and immediate status indication.

Features

- The MADSEN Alpha OAE is DPOAE only. Includes a single protocol and a predefined pass/refer criteria that will produce results in seconds.
- Six protocols - including a mix of automatic stopping criteria and complete frequency range tests.
- Docking station for charging. Includes a Print-to-PDF feature. Optional label printer also available.

Alpha OAE 4 includes Transportation bag, OAE starter kit, 3.7V battery, external battery charger kit, cable clip set, power supply, small tip kit, coloring book kit, fun pack and user manual.

Alpha OAE+ 6 includes Carrying case with inlay, OAE starter kit, docking station, power supply, cable clip set, 3.7V battery, fun pack, coloring book kit, solution DVD and user manual and printing tool application software.

SENTIERO OAE AND PURETONE AUDIOMETER

The Sentiero gives you two options for student hearing screening on the same piece of equipment. Choose between Audiometer screener or Otoacoustic emission screening on the Sentiero. For fast objective OAE screening results, simply insert the probe in the ear and press start on the color touch screen. Your OAE

test results will appear in seconds. Simply plug the headphones into the handheld Sentiero and you are ready to perform pure tone screening. Sentiero OAE provides 4 frequency DPOAE screenings with unique multichannel testing (two frequencies simultaneously) to provide quick screening and FMDPOAE to provide better signal amplitude.

Sentiero audiometer is a class 4 pure tone audiometer.

Set includes Sentiero, DPOAE Probe, DPOAE Starter ear tip kit, Power supply, USB cable, Carry case, User manual, Print via PC, directly print utility (PDF), and Pure Tone audiometer DD45 headphones.

- #80250 Sentiero with Audiometer..... \$4479.00 ea

ACCESSORIES

- #80251 Sentiero Printer \$250.00 ea

WELCH ALLYN OAE HEARING SCREENER

The Otoacoustic Emission (OAE) Hearing Screener technology is designed to address the challenges practitioners face when screening infants, newborns, toddlers, preschool and school-age children. Objective screening, paired with breakthrough technology, make the Welch Allyn OAE Hearing Screener an ideal tool when testing for otoacoustic emissions. The OAE rapidly screens newborns and infants with minimal cooperation required. The testing process is fast, just three button pushes. Turn on the device and complete tests on both ears in approximately 8-16 seconds per/ear. 1 year manufacturer warranty.

Features:

- Fast, Accurate results - 8-16 seconds per ear.
- Objective Testing - no patient response required.
- Easy-to-use - simple user interface makes testing as easy as three button pushes.
- Noise Management - patented technology increases screening accuracy in noisy conditions, saving time and costs.
- Plain Language Results - no interpretation, easy to understand, pass/refer results.
- Database Manager - included software provides easy transfer of test results to database.
- Test Storage - capable of storing 250 tests for convenient test result retrieval.
- Long Battery Life - rechargeable lithium ion battery provides a charge for 15 hours, up to 3,000 tests.

AUDIOSCOPE 3 SCREENING AUDIOMETER/OTOSCOPE

With the Welch Allyn AudioScope 3 you can screen your patients quickly and accurately-and with more flexibility. It's a simple procedure that takes only seconds and in many instances may be third party reimbursable. You can even use the instrument to visualize the patient's ear canal before and during the screening.

Because AudioScope 3 has three screening levels in one unit (20, 25 and 40 dB HL), you can screen all of your patients with a single instrument. And the tones are presented at random intervals so your patients can't second guess their hearing screening. This varied timing means improved results. Welch Allyn has also built in a 1000 Hz pretone, presented at 20 dB HL above the screening level, so your patients have the opportunity to "practice" listening before they're actually screened.

PORTABLE VISION SCREENER PLUSOPTIX S12C

The all new 4th generation mobile vision screener from Plusoptix offers an objective vision screening at an affordable price. Vision screening can be performed on any child because the compliance needed in a short fixation on the camera. Screen children as young as 6 months old in less than a second.

Features:

- Binocular, non-invasive screening of both eyes.
- Intuitive, icon based touch screen operation.
- Choice of validated referral criteria.
- Automated documentation in full-size database.
- Calibration and maintenance free.
- Uses rechargeable AA batters (included).
- Measurement in less than one second.
- Children can be measured starting at 6 months of age.
- Possibility to measure over glasses and contact lenses.
- Measurement results are compared to age specific thresholds and a "Pass" or "Refer" vision screening result is displayed.
- Trade in offer for current screening devices. Please call 800-485-2767 for additional information.
- Optional Warranty Extension available, \$295 year.

Plusoptix Vision Screening devices provide reliable measurement values of:

- Refraction (spherical equivalent)
 - Pupil diameter and pupil distance
 - Symmetry of corneal reflexes
- With these measurement values it is possible to detect most prevalent childhood vision disorders that may lead to the development of amblyopia (lazy eye) including:
- Hyperopia (farsightedness)
 - Myopia (nearsightedness)
 - Astigmatism (blurred vision)
 - Anisometropia (unequal refractive power)
 - Anisocoria (unequal pupil size)
 - Strabismus (Eye misalignment)

Optec Vision Screener

The Optec® Series Vision Screeners conducts comprehensive visual screenings in just a few minutes. In addition to the ability to screen under a variety of conditions, including monocular, binocular, near, distance, and daytime both the Optec 5000P and 5500P can also function as a peripheral vision test. These models are lightweight, portable, and feature a convenient light-emitting diode (LED) lighting system. Tests include: Adult and pediatric visual acuities, color and depth perception, as well as vertical and lateral phorias. The Optec Series conducts simple, accurate and repeatable tests in minimal time; remote control or manual option available.

*Includes a standard slide package, a set of 12 test slides. Available option to create a customized slide package from over 150 test slides in our slide library. Contrast sensitivity slide packages are also available for purchase upon request.

FEATURES INCLUDE:

- Lightweight and portable, weighing less than 15 lbs, requiring only 2 square ft of space, scratch resistant and washable surface made of ABS plastic.
- Two independent viewing ports for distance (20 feet) and near (16 inches) testing.
- Distance/Near Lens Systems.
- See and point observation doors on both sides.
- No training or certification required.

Visual screening and peripheral vision test standards that meet the standards set by the American National Standards Institute (ANSI).

STEREOPSIS TESTS: EASY TO USE FOR ALL AGES

ORIGINAL STEREO FLY

Recognized as the gold standard for Stereo Depth Perception testing. Evaluate both gross stereopsis (355 to 700 seconds of arc) and fine depth perception. Graded circle test (800 to 40 seconds of arc), Animal test for children (400 to 100 seconds of arc).

- #63170 Original Stereo Fly..... \$169.00 ea
- #63175 Pediatric Glasses..... \$24.99 ea

RANDOT*

Designed as a matching game in which the patient matches the pictures on the left side with those on the right. Tests and evaluates stereo depth perception for both gross stereopsis evaluation (500 & 250 seconds of arc) using six geometric forms from random dot backgrounds. Graded circle test (400 to 20 seconds of arc).

- #63171 Randot..... \$179.00 ea
- #63175 Pediatric Glasses..... \$24.99 ea

STEREO BUTTERFLY

The Stereo Butterfly tests and evaluates random dot stereo depth perception for both gross stereopsis (2500 to 1200 seconds of arc) and fine depth perception. Graded circle test (800 to 40 seconds of arc), Animal test for children (400 to 100 seconds of arc).

- #63172 Stereo Butterfly..... \$169.00 ea
- #63175 Pediatric Glasses..... \$24.99 ea

RANDOM DOT 'E'

Designed specifically for use with children as young as three years of age and up. The patient is asked to distinguish between a "raised E" and a non-stereo target. Recommended by the American Academy of Ophthalmology and the American Academy of Pediatrics.

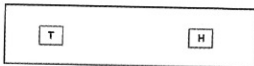

- #63173 Random Dot 'E'..... \$129.00 ea
- #63174 Replacement Stereo Glasses..... \$27.50 ea
- #63175 Pediatric Glasses..... \$24.99 ea

These slide packages have been formed to meet the recommended testing requirements for each following state.

TITMUS V SERIES FEATURES

Compact and Portable

- Features a built-in handle for ease of transport. Carrying case with wheels included.

Ergonomics

- Unique design that accommodates both adults and children, either standing or seated. Ensures patient is in a comfortable position for testing - needed for efficient and accurate testing.

Testing

- Tests at 20 feet (6 m) for FAR and 14 inches (35 cm) for NEAR vision. A variety of tests are available to screen for visual acuity, muscle balance (horizontal and vertical phoria), depth perception, color perception, and binocular vision. Total of 16 tests per vision screener (based on slide selected).

Fluorescent Light Source

- Improves slide illumination, replicates actual daylight conditions and provides true color testing. Light will give years of extended service.

Membrane Control Panel

- Instrument controls located at your fingertips for ease of operation. Ease of placement - helps where space is limited. Indicators on panel for far/near, patient head position, eye occlusion, test slide position.

Foam Headrest

- Soft headrest to ensure correct head position. Easy to clean.

Head Sensor

- Electronic check to ensure correct head position. Patient cannot see tests, if head is incorrectly positioned.

Peripheral Vision Testing

- Can perform peripheral vision testing in the horizontal visual field at 85, 70, 55 degrees and nasal 45 degrees for each eye.

Night Vision Testing

- Can screen vision at night-driving conditions.

Intermediate or Plus Lenses (Optional)

- Five additional lenses are available to identify vision problems at actual working distance (intermediate vision) of 19, 22, 26, 32 and 40 inches. Plus lenses with values of +1.00, +1.50, +1.75 and +2.25 are also available for testing children's vision.

Trade-In your old Titmus, Stereo Optical, or Keystone vision screener when purchasing a NEW Titmus V Series V2 or V4, and you will receive a rebate from Honeywell! Please call 800-485-2737 for details.

Purchase a V2 with Trade-In = **\$250.00** Rebate
Purchase a V4 with Trade-In = **\$600.00** Rebate

School Nurse Supply, Inc. is one of few Authorized Distributors of the Titmus V Series vision screeners in the market today. All warranties are valid **ONLY** when a purchase or repair is made from Honeywell or an Authorized Honeywell Distributor.

SLIDES FOR PEDIATRIC MODEL

#19118 V2..... \$2395.00 ea #19123 V4..... \$2895.00 ea

SMPS-B2 — Binocularity
Tests performance of both eyes together.

SMPS-30-1 — Acuity Right and Left Eye
The "E" points in a different direction for each eye.

SMPS-30-2 — Acuity Right and Left Eye
The "E" points in a different direction for each eye.

SMPS-30-3 — Acuity Right and Left Eye
The "E" points in a different direction for each eye.

SAS-2 — Acuity Right and Left Eye
Conventional Tumbling "E" symbol. Child states which way the "E" points in each square. Acuity levels of 20/20, 20/30, 20/40 and 20/50.

SPS-3 — Heterophorias
Muscle imbalance — vertical and lateral — is tested at predetermined pass/fail levels. This test is administered first at far, then at near.

SPCD-1 — Color Perception
Titmus Pseudo-Isochromatic Plates reliably detect gross color anomalies, but does not classify the type of deficiency.

SA-BRL-4 — Visual Acuity
Results calibrated at 20/20, 20/30, 20/40, 20/50, 20/70, 20/100 and 20/200. Tests can be administered binocularly or with either eye occluded.

SLIDES FOR PROFESSIONAL MODEL

#19120 V2..... \$2395.00 ea #19124 V4..... \$2895.00 ea

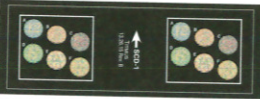

SA-APS-1 Allen Picture Test
Line 1 — Binocularity — Tests performance of both eyes together. Lines 2, 3, 4 — Acuity — Right and Left Eye Calibrated at 20/30, 20/40 and 20/50.

SAS-2 — Acuity Right and Left Eye
Conventional Tumbling "E" symbol. Child states which way the "E" points in each square. Acuity levels of 20/20, 20/30, 20/40 and 20/50.

SPS-3 — Heterophorias
Muscle imbalance — vertical and lateral — is tested at predetermined pass/fail levels. This test is administered first at far, then at near.

SCD-1 — Color Perception
Consists of six accurately and authentically reproduced Ishihara Pseudo-Isochromatic plates. Detects color deficiency but does not classify.

SA-BRL-4 — Visual Acuity
Results calibrated at 20/20, 20/30, 20/40, 20/50, 20/70, 20/100, and 20/200. Tests can be administered binocularly or with either eye occluded.

SLP-1 — Lateral Phoria
Measures Esophoria or Exophoria in 1 prism diopter steps.

SVP-1 — Vertical Phoria
Measures right or left Hyperphorias in one-half prism diopter steps.

SA-BRL-2A — Visual Acuity
Results calibrated at 20/20, 20/30, 20/40, 20/50, 20/70, and 20/100. Tests can be administered binocularly or with either eye occluded.

You also have the option to BUILD YOUR OWN unit! Customize you Titmus V2 or Titmus V4 with any 8 slides that you see on pages 241 & 242. Please call 800-485-2737 for details.

SLIDES FOR SCHOOL MODEL

#19121 V2..... \$2395.00 ea #19125 V4..... \$2895.00 ea

SF-1 — Binocularity Both Eyes
To determine whether both eyes are being used together.

SAS-2 — Acuity Right and Left Eye
Conventional Tumbling "E" symbol. Child states which way the "E" points in each square. Acuity levels of 20/20, 20/30, 20/40 and 20/50.

SPS-3 — Heterophorias
Muscle imbalance — vertical and lateral — is tested at predetermined pass/fail levels. This test is administered first at far, then at near.

SPCD-1 — Color Perception
Titmus Pseudo-Isochromatic plates reliably detect gross color anomalies, but does not classify the type of deficiency.

SA-BRL-4 — Visual Acuity
Results calibrated at 20/20, 20/30, 20/40, 20/50, 20/70, 20/100, and 20/200. Tests can be administered binocularly or with either eye occluded.

SLP-1 — Lateral Phoria
Measures Esophoria or Exophoria in 1 prism diopter steps.

SVP-1 — Vertical Phoria
Measures right or left Hyperphorias in one-half prism diopter steps.

SA-BRL-2A — Visual Acuity
Results calibrated at 20/20, 20/30, 20/40, 20/50, 20/70 and 20/100. Tests can be administered binocularly or with either eye occluded.

SLIDES FOR ILLINOIS MODEL

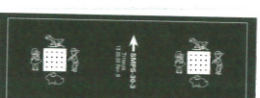

#19132 V2..... \$2395.00 ea #19134 V4..... \$2895.00 ea

SMPS-30-1 — Acuity Right and Left Eye
The "E" points in a different direction for each eye.

SLIDES FOR PENNSYLVANIA MODEL

#19141 V2..... \$2395.00 ea #19142 V4..... \$2895.00 ea

SA-APS-1 – Allen Picture Test
Line 1—Binocularity—Tests performance of both eyes together. Lines 2, 3, 4—Acuity—Right and Left eye calibrated at 20/30, 20/40 and 20/50.

SA-BRL-2A – Visual Acuity
Results calibrated at 20/20, 20/30, 20/40, 20/50, 20/70 and 20/100. Tests can be administered binocularly or with either eye occluded.

SMPS-40-1 – Acuity Right and Left Eye
The symbol “E” points to a different image for each eye.

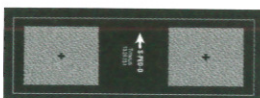

SMPS-40-2 – Acuity Right and Left Eye
The symbol “E” points to a different image for each eye.

SMPS-40-3 – Acuity Right and Left Eye
The symbol “E” points to a different image for each eye.

SSLA-1 – Monocular Acuity
Tests the performance of the eye individually.

S-PED-D – Depth Perception
Three symbols with a cross in the middle of the slide provides for fixation.

SCD-1 – Color Perception
Consists of six accurately and authentically reproduced Ishihara Pseudo-Isochromatic plates. Detects color deficiency, but does not classify.

ROLLAWAY CARRYING CASE

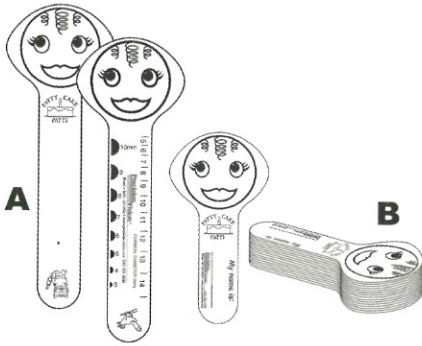

This rollaway carrying case comes complete with foam inserts, allowing you to protect your Titmus VSeries vision screener as you transport it. Used with both the Titmus V2 and V4 models, this sturdy case provides stylish portability and helps to ensure the longevity of your Titmus vision screener.

Receive a FREE case with your purchase of any Titmus V2 or V4!

#19127 Rollaway Carrying Case..... \$136.00 ea

Headrest Tissues for Vision Screeners

#55284 500 per package..... \$9.45 pk

REUSABLE OCCLUDER (A)

Paddle has face on both sides. Handle has a bird, little star, corneal diameter scale and pupil gauge. The oval shape makes it more effective. Measures 2.5" x 7".

#66019 1 per pkg.....\$9.95 ea

DISPOSABLE OCCLUDER (B)

These disposable occluders are directed toward pediatric vision testing. Each occluder has a Patti Pics face and a place for the child's name. This helps to make pediatric vision testing more fun for the child, and easier for the adult. Each occluder is made from heavy paper stock, making them disposable for disease control but durable enough to withstand handling.

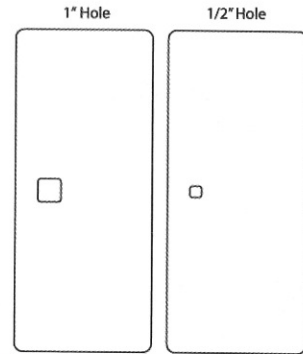

#66018 500 per pkg.....\$25.00 pkg

HAPPY FACE OCCLUDERS

These colorful, temporary eye patches are very useful for occluding one eye to keep young children from peeking during vision screening and testing sessions. These fun patches are very affordable, easy to use and reduce test time. Sold in rolls of 250 patches.

#66021 250 per roll.....\$25.00 ea

PLASTIC ISOLATION MASK SET

These isolation masks are constructed of plastic to make sliding over charts a breeze. Set features two masks with different size openings in each.

#66026 2 per pkg.....\$14.95 set

SPECTACLE VISION OCCLUDER (LEFT)

These occluders are made from a high impact plastic that can withstand multiple uses and cleanings. Each occluder includes a riveted pinhole flipper and an angled handle. Occluder can be used for covering either eye.

#66061 Spectacle Occluder.....\$15.00 ea

VISION AND HEARING SCREENING CABINET

This cozy cabinet is the perfect place to do all of your vision and hearing screening. A sturdy, retractable shelf flips up to support a vision screener and folds away when not in use. Hearing station reduces noisy, classroom/office ambient sounds with 2" foam lining and a drape that wraps around the student. This cabinet is available in white only. **Shipped directly from manufacturer, please allow 4-6 weeks for delivery.**

Dimensions: 29"L x 27 1/2"W x 61"H
*#66095 Screening Cabinet.....\$1049.00 ea

HYPEROPIA GLASSES

The degree of farsightedness and need of reading glasses can be tested with these hyperopia glasses. Great for vision testing, hyperopia glasses can be used to aid students during a test. Colors may vary.

Vision Screening

PRECISION VISION ILLUMINATOR CABINET

This illuminator cabinet is very mobile and provides the ability of testing in many different environments. The cabinet also has many available features for easier testing, including an optional five leg adjustable base stand (shown at far right) that is adjustable for sitting or standing. Additional features are rear storage pocket and included nylon dust cover. Cabinet is great for testing in 10 foot testing areas and can be wall mounted. Comes in 2 colors and weighs only 6 lbs. Dimensions: 14"H x 9"W x 4"D. **Charts not included.**

- #66003 Cabinet - Almond..... \$199.00 ea
- #66004 Cabinet - Black..... \$199.00 ea

LED ILLUMINATOR CABINET

This small cabinet uses long-life LEDs to edge illuminate the light panel. Offers uniform lighting across the chart face when light conditions are poor. Great for testing distances ranging from 40 cm to 4 meters. It's ultra-thin at only 1.2 inches and weighs only 4.5 lbs. It can be wall mounted, used with a floor stand, or with its magnetic table stand (sold separately). A chart pocket in the rear holds charts when not in use. Power cord is included. Dimensions: 10.5"W x 1.2"D x 14.25"H.

- #66016 LED Cabinet..... \$269.00 ea
