UNDERCARRIAGE

UNDERCARRIAGE

CAT Abrasion can be used in most of the HD sealed and lubricated applications.

Center tread idlers now run on the bushings instead of the links, eliminating link scalloping, substantially increasing link life, O&O costs are significantly reduced by elimination of bushing turns and increased components wear life.

Customers should carefully select between CAT Abrasion and SALT undercarriage based on expected application. For attachment guiding / guarding (for CAT Abrasion and SALT configurations), see the Track Guiding Guard Arrangements section.

It is recommended the machines use SALT undercarriage in high debris packing applications.

TECHNOLOGY PRODUCTS

BLADE CONTROL ORDERING

1) Cat GRADE with Slope Assist - Machine Integrated System that provides slope/angular guidance to the cutting edge for both blade slope and mainfall applications. This feature does not require a base station, laser transmitter, design file, or additional hardware. A sensor and valve calibration is required to be functional and is completed at the factory for machines ordered with blades. This system includes an upgraded machine display and an angle sensor on the blade.

Cat GRADE with Slope Assist includes ARO (Attachment Ready Option): Allows machine to easily be upgraded to Cat GRADE with 3D integrated grade control systems or AccuGrade GNSS, Laser or UTS blade mounted grade control systems. ARO includes IMU sensors, EC520 controller, wiring and blade mounting brackets. Upgrading to Cat GRADE with 3D after factory build requires TD520 display, GNSS receivers and antennas, bracket, data corrections solution, Sitech provided grade license files and Caterpillar provided SEA, part number 567-4125. Dealer to provide price for additional hardware and software.

For example, GNSS systems require a GNSS base station. Laser systems require a laser transmitter. UTS requires a Universal Total Station. AccuGrade electronics kits and site infrastructure must be ordered separately from Cat and/or SITECH dealer.

2) GRADE W/3D: CAT Grade with 3D is a factory installed, integrated grade control system with machine mounted sensors and GNSS antennas mounted to the roof of the cab. Includes TD520 Grade display, GNSS receivers and antennas with GPS, Glonass, Galileo, and Beidou constellations, IMU's, Grade license files, and Caterpillar provided SEA. Additional requirements via Cat/ Sitech dealer includes data corrections solution, measure up and calibration.

Requires an "off-board" radio network or GNSS base station to be functional. Additional requirements via SITECH dealer include on-board data radio installation and measure up.
