

## CATERPILLAR MACHINE PRICE LIST

**D6**D6 TRACK TYPE TRACTOR  
EAST PEORIA, IL, USA (SAP)Ship Weight  
lbsLIST PRICE  
AT DEALER

Standard Equipment:

**POWERTRAIN**

Enhanced Full Auto Shift  
Torque Divider, Lock up  
Transmission, Electronically Controlled Powershift, 4 Speed  
Shift Management  
Automatic Directional and Downshift Controlled Throttle, Load Compensated  
Engine Decelerator and Brake Pedals Programmable/Selectable bi-directional shifting  
C9.3B diesel engine  
EPA/ARB Tier 4 final certified engine with aftertreatment  
Air cleaner, Strata tube precleaner with dust ejection  
Air filter w/electronic service indicator  
Aftercooler, air to air (ATAAC)  
Coolant, extended life  
Fan, hydraulic reversing, cold weather  
Final drives, double reduction planetary  
Radiator, aluminum bar plate  
Fuel priming pump, electric  
Parking brake, electronic  
Starting aid, ether ready, automatic  
Turbocharger  
Fuel water separator  
Ecology drain

**UNDERCARRIAGE**

Carrier rollers, lifetime lubricated  
Clamp Master Link  
Equalizer bar, maintenance free  
Guards, End Track Guiding  
Idlers, Center Tread  
Rollers, lifetime lubricated  
Track, lifetime lubricated  
Track roller frames, tubular  
Track adjusters, hydraulic  
Sprocket rim segments, replaceable

**ELECTRICAL**

LED lights, 6 standard  
Alarm, backup  
Alternator, 150 AMP  
Batteries, 2 maintenance free 12V (1400 cca) (24V system), heavy duty  
Converter, One 15A ,12V Outlets  
Connector, Diagnostic  
Horn, forward warning  
Light, work, underhood

**OPERATOR ENVIRONMENT**

One piece cab, sound suppressed,  
Integrated roll over protection(IROPS), adjustable operator controls and armrests, cab mounted modular HVAC system, and screen ready.  
Cup holders  
Lunchbox storage  
Electro-hydraulic implement steering controls  
Foot pads, dash  
Mirror, rearview  
Seatbelt, retractable 76mm(3 in)  
Wipers  
Glove box

**TECHNOLOGY PRODUCTS**

Full color LCD display, 254mm (10 inch) integrated with rear camera  
Product Link, cellular PLE743  
Remote Troubleshoot  
Remote Software flash  
Operator ID (dealer must enable)  
Machine Security System with Passcode (dealer must enable)  
Remote Control Ready

**OTHER STANDARD EQUIPMENT**

Ripper ready rear hydraulics  
30 minute cab removal  
Ladder, rear access  
Mounting provision for grease gun, shovel and fire extinguisher  
Engine enclosures, perforated hinged, removable  
Bottom guards, hinged, removable  
Ground level service center with remote electrical disconnect, secondary shutdown switch & hour meter  
Hood, perforated  
Hydraulics, independent steering and implement  
Hydraulics, load sensing, dozer lift and tilt  
Radiator doors, perforated, hinged, louvered  
S.O.S sampling ports  
Vandalism protection for fluid compartments and battery box

## CATERPILLAR MACHINE PRICE LIST

**D6**

USE	REF NO.	<b>LANE 2 / 3 MANDATORY</b>	Ship Weight lbs	LIST PRICE AT DEALER
-----	------------	-----------------------------	--------------------	-------------------------

**UNDERCARRIAGE (CONT.)****UNDERCARRIAGE SYSTEMS**

- 1) Heavy Duty Extended Life (HDXL): For use in all applications. Track bushings can be turned and re-sealed mid-life. Press-fit bushings and PPR2 pin retention are Particularly well suited for impact applications such as forestry, waste, rock, or v-ditching. Heavy Duty Extended Life with Duralink.
- 2) CAT ABRASION For use in low to moderate impact applications and moderate to high abrasion underfoot. A rotating bushing reduces bushing and sprocket wear rate. Relieved Tread Idlers provide longer link wear life and improve finish grading by reducing link scallop. Not for use in high impact.

**TRACK ROLLERS AND GUIDE GUARDS**

The undercarriage selection provides options for track rollers guide-guards to prevent track derailing on side slopes or rough underfoot. Guards also prevent flow of debris into the track. Derailing and debris can put damaging loads into the track and undercarriage system. Choose a guide-guard arrangement based on underfoot and applications as described below.

**TRACK ROLLERS**

- 1) SINGLE FLANGE(S): Bottom rollers have flanges that guide only on the outside edge of each track chain. Cat Abrasion Undercarriage uses all single flange track rollers (SSSSSSS).
- 2) DOUBLE FLANGE(D): Bottom rollers have flanges that guide along the outer and inner edges of each track chain. They provide basic guiding but will not fully prevent track derail if used on side slopes steeper than 4:1. Flange diameter is the same as Single Flange, which allows for full UC system wear before flanges contact track pin bosses.
- 3) TALL DOUBLE FLANGE(T): Bottom rollers have taller outer and inner flanges to better engage the track. Tall flanges provide superior guiding for slopes steeper than 4:1 and minimize track derail. The taller flanges can contact track pin bosses in the last 10-15% of UC system wear life.

**TRACK GUIDE GUARDS**

- 1) CENTER GUIDE: Light track guiding with single center track guide guard. HDXL center guide undercarriage has bottom rollers (SDSDDSDS). For applications with side slopes 4:1 and shallower, ground objects up to 1"; and little, if any, V-ditching.
- 2) PARTIAL GUIDE, TALL FLANGE: Moderate track guiding with two center track guide-guards. HDXL partial guide with tall flange UC includes tall double flange bottom rollers in all positions except end rollers (STTTTTTS). For frequent use on side slopes between 4:1 and 2:1; ground objects 1" to 3"; and low to moderate V-ditching.
- 3) FULL GUIDE: Heavy track guiding with full length track guide-guards HDXL full guide undercarriage includes tall double flange bottom rollers in all positions except end rollers (STTTTTTS). For applications with side slopes 2:1 and steeper; with ground objects greater than 3", and frequent v-ditching. Not for use in applications with wet, heavy, packable underfoot material.

**UNDERCARRIAGE (CONT.)**

**TRACK GROUPS**

- 1) MODERATE SERVICE(MS): Moderate Service shoe is the best shoe for low to medium impact and abrasive conditions. It gives the best penetration and traction, resists wear and bending and is available in various widths and modifications.
- 2) EXTREME SERVICE(ES): Extreme Service shoes should be used wherever the Moderate Service shoe bends or breaks, or when links outlast shoes. Extreme Service shoes are both stronger to resist bending and breaking and have more allowable wear and material than the Moderate Service shoe.
- 3) CENTER(CTR): CAT ABRASION track includes center holes which reduce extrudable packing between the shoe and the bushing since the holes allow the sprocket to punch out dirt and debris. Recommended for applications where debris tends to pack in the track causing the track to tighten and accelerate bushing wear.
- 4) TRAPEZOIDAL(TRAP): HDXL track includes trapezoidal holes which reduce extrudable packing between the shoe and the bushing since the holes allow the sprocket to punch out dirt and debris. Recommended for applications where debris tends to pack in the track causing the track to tighten and accelerate bushing wear.

-----	---------	----------------------	-----------------	----------------------

**TECHNOLOGY PRODUCTS**

A complete range of tools are available to match customer EA applications and dozing automation needs.

1) SLOPE INDICATE: Provides operator real time machine cross slope and mainfall information on the primary display.

2) BLADE LOAD MONITOR: Provides real time feedback of the current load vs. the target machine load to fully utilize machine capacity. Feature not operational indoors or in areas where a GPS signal is available.

3) STABLE BLADE: Complements the operators blade inputs to attain finish grades quicker with less effort.

4) SLOPE ASSIST: Helps operators reach cross slope and mainfall targets by automatically maintaining the dozer blades established blade angles. This feature does not require a base station, laser transmitter, design file, or additional hardware.

5) TRACTION CONTROL: Automatically prevents excessive track slip to improve efficiency and reduce burden on operator. Feature not operational indoors or in areas where a GPS signal is not available.

6) AUTOCARRY: Automates blade lift to maximize blade load, improve load consistency, and reduce track slip. Feature not operational indoors or in areas where a GPS signal is not available.

7) ARO (Attachment Ready Option): Allows machine to easily be upgraded to Cat Grade with 3D integrated grade control systems or Accugrade GNSS, laser, or UTS blade mounted Grade Control Systems. ARO includes IMU sensors, EC520 controller, wiring, and mounting brackets. Upgrading to Cat Grade With 3D after build requires grade display, GNSS receivers and antennas, data corrections solutions, SITECH provided Grade license files, and Caterpillar provided SEA, part number 513-5980. Dealer to provide price for additional hardware and software.

8) GRADE W/3D: Cat Grade with 3D is a factory installed, integrated grade control system with chassis mounted sensors and GNSS antennas mounted to roof of cab. Includes grade display, GNSS receivers and antennas, GRADE license files, and Caterpillar provided SEA. Additional requirements via Cat/SITECH Dealer include data corrections solution and measure up calibration.

Note: Availability varies by country. Contact your Caterpillar Marketing representative with questions  
 ARO w/ Assist: Includes G6:M6. Reference: <https://dealer.cat.com/en/products/technology/construction-technology> for certified countries.  
 GRADE 3D: Includes MS955 and RZ2. Reference: [Dealer.cat.com/en/products/technology/construction-technology/grade](https://dealer.cat.com/en/products/technology/construction-technology/grade) for certified countries.

**TECHNOLOGY PRODUCTS (CONT.)**

**PRODUCT LINK**

Product Link enables the remote transmission of information about the location, operation, and condition of your equipment. Efficiently and effectively monitor the performance of your assets to help keep your jobs on schedule, maintain equipment condition, and reduce the costs of owning and operating your fleet. Availability varies by country please reference <https://Dealer.cat.com/PL/Certification> for certified countries. Please contact your Caterpillar marketing representative with questions.

Cab selection determines Product Link network manager. CAB, STANDARD uses PL602. All other cab selections use PL702.

L	577-7697	PROD LINK, PLE643/PLE743 RADIO . . . . . 0		NC
		Product link radio package PLE643/PLE743 provides a cellular PL243 radio. When the radio is used in combination with a PL602 network manager (to make a PLE643 system) or PL702 network manager (to make a PLE743 system) hours, health, utilization, and productivity information is collected and transmitted. The system also provides support for remote services and other advanced features.		
L	577-7698	PROD LINK, PLE683/PLE783 RADIO . . . . . 0		\$476
		Product link radio package PLE683/PLE783 provides a dual mode PL083 radio for use where travel between areas of both cellular and satellite coverage is required. When the radio is used in combination with a PLE602 network manager (to make a PLE683 system) or PLE702 network manager (to make a PLE783 system) hours, health, utilization, and productivity information is collected and transmitted. The system also provides support for remote services and other advanced features.		

**FUEL SYSTEMS**

**FUEL FILL SYSTEMS**

L	522-7680	FUEL TANK, BASIC . . . . . 0		NC
L	500-4769	FUEL TANK, FAST FILL . . . . . 0		\$900
		Fuel tank ready for an optional 526-7834 NOZZLE, FAST FILL or refilling pump equipment		

**GUARDS**
