COUPLERS, CAT PIN GRABBER (PG)

The use of a quick coupler on an excavator with certain combinations of linkages (boom & stick) and work tool attachments has the potential for interference with the cab and or the front of the machine during operation. Always check for interference when first operating the machine with a quick coupler and a new work tool.

For more information on Cat Pin Grabber Couplers and hydraulics refer to media number GEJQ1298 or contact the sales support team in Americas North via email at worktools@cat.com

GRAPPLES, G120 CONTRACTOR

Ensure that the host machine is configured with a Extreme Service Stick designed for hydro mechanical work tool applications. If the host machine is not configured with the heavier stick then install line relief valves that are typically used for Thumb applications such as 6E-5234 for the work tool (bucket) cylinder circuit. The lower pressure setting will reduce the amount of torsional force applied and greatly increase the reliability of the lighter stick.

GRAPPLES, TRASH GRAPPLES

Ensure that the host machine is configured with a Extreme Service Stick designed for hydro mechanical work tool applications. If the host machine is not configured with the heavier stick then install line relief valves that are typically used for Thumb applications such as 6E-5234 for the work tool (bucket) cylinder circuit. The lower pressure setting will reduce the amount of torsional force applied and greatly increase the reliability of the lighter stick.

HYDRAULIC THUMBS

MINIMUM STICK LENGTH OF 2.9M

To have an Operational Thumb you will need to order one part number from each group:
 -Thumb Group
 -Bracket Group (if machine does not have thumb ready stick)
 -Thumb Connector Lines

Machines REQUIRE these Hydraulic Functions to Operate the Thumb:
 1. Double or Combined Function Hydraulics

For ordering assistance for both Thumbs and Hydraulics
 1. dWING: <https://gwtapps.cat.com/dWING/>
 2. Refer to the following media numbers:
 a. GEJQ2365: Thumb Product Bulletin
 b. GEJQ0215 for hydraulics
 3. For ordering assistance please contact the sales support team via email at worktools@cat.com

324/326/328/329/330/330GC/335 EXCAVATOR (CONT.)

COUPLERS, CAT PIN GRABBER COUPLER

The use of a quick coupler on an excavator with certain combinations of linkages (boom & stick) and work tool attachments has the potential for interference with the cab and or the front of the machine during operation. Always check for interference when first operating the machine with a quick coupler and a new work tool. For more information on Cat Pin Grabber Couplers and hydraulics refer to media number GEJQ1298 or contact the sales support team in Americas North via email at worktools@cat.com

NOT FOR USE WITH: Mechanical Pulverizers or Mechanical Shear

HYDRAULIC THUMBS

To have an Operational Thumb you will need to order one part number from each section:

- Thumb Group
- Bracket Group (if machine does not have thumb ready stick)
- Thumb hydraulic lines

Machines REQUIRE these Hydraulic Functions to Operate the Thumb:
 1. Double or Combined Function Hydraulics

For ordering assistance for both Thumbs and Hydraulics
 dWING: <https://gwtapps.cat.com/dWING/>

- Refer to the following media numbers:
- a. GEJQ2365: Thumb Product Bulletin
 - b. GEJQ0215 for hydraulics

For ordering assistance please contact the sales support team in Americas North via email at worktools@cat.com

COUPLER, CAT PIN GRABBER COUPLERS

The use of a quick coupler on an excavator with certain combinations of linkages (boom & stick) and work tool attachments has the potential for interference with the cab and or the front of the machine during operation. Always check for interference when first operating the machine with a quick coupler and a new work tool.

For more information on Cat Pin Grabber Couplers refer to media number GEJQ1298 or contact the sales support team in Americas North via email at worktools@cat.com

GRAPPLES, G136 CONTRACTOR

Ensure that the host machine is configured with a Extreme Service Stick designed for hydro mechanical work tool applications. If the host machine is not configured with the heavier stick then install line relief valves that are typically used for Thumb applications such as 6E-5234 for the work tool (bucket) cylinder circuit. The lower pressure setting will reduce the amount of torsional force applied and greatly increase the reliability of the lighter stick.

Ensure that the host machine is configured with a Extreme Service Stick designed for hydro mechanical work tool applications. If the host machine is not configured with the heavier stick then install line relief valves that are typically used for Thumb applications such as 6E-5234 for the work tool (bucket) cylinder circuit. The lower pressure setting will reduce the amount of torsional force applied and greatly increase the reliability of the lighter stick.

COUPLER, CAT PIN GRABBER COUPLER "VB2" FAMILY

The use of a quick coupler on an excavator with certain combinations of linkages (boom & stick) and work tool attachments has the potential for interference with the cab and or the front of the machine during operation. Always check for interference when first operating the machine with a quick coupler and a new work tool.

For more information on Cat Pin Grabber Couplers and hydraulics refer to media number GEJQ9387 or contact the sales support team in Americas North via email at worktools@cat.com

NOT FOR USE WITH: Mechanical Pulverizers or Mechanical Shear

The official first-ship date is 25-May-2020. If placing a CMOPS order before the official first-ship date, please provide a ship-after date of 25-May-2020 or later. Orders placed before first-ship that do not specify a ship-after date of 25-May-2020 or later, will have a DOCS case submitted, which will provide a response to the ordering party indicating the order will be confirmed with a ship-after date of 25-May-2020, or later depending on inventory at the time or preorder.
