FOOTWEAR GLOSSARY

Bid #: ESCNJ 17/18-31

AHAR™ Technology Acronym for ASICS High Abrasion Rubber. Placed in critical areas of the outsole for exceptional durability.

AmpliFoam™ Midsole Engineered to maintain durability at softer densities, providing better flexibility, comfort, and platform adaptability ideal for natural running.

ANTI-GRAVEL TONGUE Gusseted construction prevents debris from entering the shoe.

APMA SEAL OF ACCEPTANCE Designated shoes have the American Podiatric Medical Association (APMA) Seal of Acceptance.

BIOMORPHIC FIT™ UPPER Stretch material strategically placed on the upper helps to reduce buckling and the potential for irritation.

COMFORDRY™ LASTING This lasting material features plush underfoot comfort while providing excellent moisture management, high level breathability, and antimicrobial properties.

ORTHOLITE™ SOCKLINER Provides cushioning performance and anti-microbial properties for a cooler, drier, healthier environment.

ORTHOLITE™ X-40 SOCKLINER This premium sockliner features higher rebound properties while providing excellent moisture management, high-level breathability, and antimicrobial properties.

DISCRETE EYELETS Independently placed eyelets disperse lace tension, creating a customized fit environment and enhanced upper comfort.

DISCRETE HEEL UNIT Takes the Impact Guidance System (I.G.S.™) to a new level by creating our highest degree of shock attenuation and stability.

DUOMAX™ SUPPORT SYSTEM A dual-density midsole system positioned to enhance support and stability.

DUOSOLE™ OUTSOLE Reduces weight and enhances flexibility while maintaining traction and durability.

DURASPONGE™ OUTSOLE A blown AHAR™ rubber compound for enhanced cushioning and durability in the forefoot.

DYNAMIC DUOMAX™ SUPPORT SYSTEM This evolution of DuoMax™ system enhances stability and support, with reduced weight and increased platform comfort.

ELASTIC LACES A classic triathlon feature allowing a runner to put the shoe on quickly, easily, and securely.

EXTENDED FOREFOOT DUOMAX™ Provides unrivaled support to meet the needs of late-stage and midfoot overpronators.

EXTENDED REARFOOT GEL™ CUSHIONING The rearfoot GEL cushioning extends further forward under the lateral midfoot, increasing shock attenuation and protection for neutral runners.

FLEXION FIT™ UPPER Proprietary upper which provides form-fitting comfort without sacrificing support.

FLUIDAXIS™ MIDSOLE TECHNOLOGY Anatomically correct deep flex grooves have been aligned to the joints of the foot. This innovative construction enables the shoe to recognize, adapt, and respond to the athlete's exact load and positional change from first impact to toe-off.

FLUIDRIDE™ MIDSOLE provides the ultimate combination of bounce back and cushioning properties with reduced weight and exceptional durability.

FLUIDFIT™ UPPER Technology combines multi-directional stretch mesh with stretch reinforcements that adapt to the athlete's foot, creating a truly customized glove-like fit.

FOREFOOT GEL™ CUSHIONING SYSTEM Enhances shock attenuation during the propulsion phase of the gait cycle.

FUZEGEL™ MIDSOLE Cushioning technology newest to ASICS made from the fusion of GEL™ property and foam creates lightweight adaptable comfort, tuned to provide rearfoot shock absorption that shifts to forefoot bounce back.

GENDER SPECIFIC CUSHIONING Women's models feature a lower-density top layer in the midsole, allowing female athletes to better enjoy the benefits of midsole compression.

GLOW-IN-THE-DARK PRINT Glow-in-the-Dark print provides added visibility in low light conditions.

GLOW-IN-THE-DARK GEL™ CUSHIONING Glow-in-the-Dark GEL™ Cushioning provides added visibility in low light conditions.

GORE-TEX™ UPPER Waterproof and breathable upper designed to protect the foot during extreme weather conditions.

GUIDANCE LINE™ MIDSOLE TECHNOLOGY Vertical flex groove decouples the tooling along the line of progression for enhanced gait efficiency.

GUIDANCE TRUSSTIC SYSTEM™ TECHNOLOGY This Trusstic System™ version integrates Guidance Line™ construction for enhanced gait efficiency while providing midfoot structural integrity.

HEEL CLUTCHING SYSTEM™ TECHNOLOGY Exoskeletal heel counter provides improved support and creates improved heel fitting environment.

I.G.S.™ (IMPACT GUIDANCE SYSTEM) TECHNOLOGY (MULTI-SPORTS) Linked, category-specific componentry that enhances the foot's natural gait.

I.G.S.™ (IMPACT GUIDANCE SYSTEM) TECHNOLOGY (RUNNING) ASICS design philosophy that employs linked componentry to enhance the foot's natural gait from heel strike to toe-off.

LACE GARAGE™ TECHNOLOGY Pocket enables the laces to be tucked in and unexposed.

MAGIC SOLE™ OUTSOLE Vented midsole and outsole minimizes weight and maximizes breathability.

MAXIMUM SUPPORT LAST Providing more depth and width throughout the mid- and forefoot, this accommodating last is ideal for athletes with higher volume feet or who wear orthotics.

MONO-SOCK™ FIT SYSTEM An elastic internal sleeve which replaces a traditional tongue providing a "sock-like" fit.

NATURAL33™ LAST Mimicking the shape of the foot, this anatomically shaped last provides a secure heel fit and an ample toe box that allows the toes to play.

PLUS 3™ MIDSOLE TECHNOLOGY 3mm of additional height on women's models helps relieve achilles tension.

PERFORATED SOCKLINER UPPER TECHNOLOGY Optimizes moisture drainage and improves breathability.

PLASMAGUARD™ UPPER TECHNOLOGY Your shoes are protected from rain and mud without the loss of breathability and flexibility through PlasmaGuard™, an innovative coating technology patented by Europlasma.

PROPULSION TRUSSTIC™ TECHNOLOGY Mimics connective tissue in the foot by creating tension as foot enters propulsion stage.

RACING SPECIFIC LAST Built on ASICS' racing shoe last.

REARFOOT AND FOREFOOT GEL™ TECHNOLOGY CUSHIONING SYSTEMS Attenuates shock during impact and toe-off phases, and allows movement on multiple planes as the foot transitions through the gait cycle.

REARFOOT GEL™ TECHNOLOGY CUSHIONING SYSTEM Attenuates shock during impact phase and provides cushioning for propulsion phase.

REFLECTIVITY Contains reflective materials designed to enhance visibility during low-light hours.

REINFORCED VAMP Vamp mesh durability is increased by the addition of a thin, seamless underlay.

REMOVABLE SOCKLINER A sockliner which can be removed to accommodate a medical orthotic.

REMOVABLE SPIKES Allows the athlete to customize spike configuration and replace worn elements.

ROCK PROTECTION PLATE Provides protection against stone bruises.

SEAMLESS CONSTRUCTION The use of seamless materials reduces the potential for irritation and friction caused by traditional stitches and seams.

SOLID RUBBER OUTSOLE Provides enhanced durability and traction.

SOLYTE™ MIDSOLE MATERIAL A lighter weight midsole compound than ASICS' standard EVA and SpEVA™. Also features enhanced cushioning and durability.

SPEVA™ 45 LASTING Employs 45 degree Solyte™ lasting material for a soft platform feel.

SPEVA™ 55 LASTING Employs 55 degree Solyte™ lasting material for a soft but stable platform feel.

SPEVA™ 65 LASTING Employs 65 degree Solyte™ lasting material for a firmer, more stable platform feel.

SPEVA™ MIDSOLE MATERIAL Improves bounce-back characteristics and decreases midsole breakdown.

TRAIL SPECIFIC OUTSOLE Reversed lugs provide uphill and downhill traction on all types of terrain.

TRUSSTIC SYSTEM™ TECHNOLOGY Reduces the weight of the sole unit while retaining the structural integrity of the shoe.

WET GRIP™ OUTSOLE An outsole made from a special blend of organic and non-organic components, designed to enhance traction even on wet surfaces.

YOUTH-SPECIFIC CUSHIONING Lower-density midsole material allows youth athletes to better enjoy the benefits of midsole compression.
