# A2K<sup>®</sup>

## THE PREMIER GLOVE

The finest cuts of leather. Meticulous construction. Three times more hand shaping by Wilson<sup>®</sup> master technicians. All these qualities make the A2K<sup>®</sup> our premier glove. The one players turn to when they want a long-lasting glove that breaks in without breaking down. Made from the top 5% of Pro Stock<sup>®</sup> Select leather, each hide is chosen for consistency and flawlessness, so the A2K<sup>®</sup> baseball glove is the most premium glove available.

### 1. PRO STOCK<sup>®</sup> SELECT LEATHER:

The top 5% of Pro Stock hides are chosen by a triple sorting process for consistency and flawlessness. The 2018 A2Ks are Copper, Blonde and Black.

### 2. ROLLED DUAL WELTING<sup>™</sup>:

Thin strips of Pro Stock leather are skived thin and rolled to provide long-lasting shape and a quicker break-in.

### 3. DOUBLE PALM CONSTRUCTION:

A thin, strategically cut piece of leather is placed between the palm liner and outer shell, providing maximum pocket stability.

### 4. 3X MORE SHAPING:

A master technician spends three times longer pounding and shaping the A2K<sup>®</sup> by hand, which reduces break-in time.

# A2000<sup>®</sup> PEDROIA FIT™

## MORE A2000 PATTERNS WITH A SNUG FIT

Wilson's innovative Pedroia Fit™ was initially created for the DP15, giving Dustin Pedroia and other players with smaller hands a glove that fits their game. Smaller hand opening, narrower finger stalls and more—the same quality and craftsmanship behind the DP15 is now all over the field.

- PEDROIA FIT™:**  
Several internal changes make these A2000 patterns function perfectly on smaller hands.
- NARROW FINGER STALLS:**  
Made smaller and thinner to fit small hands. Thumb and pinky brought closer together to maximize hand strength.
- ROLLED DUAL WELTING™:**  
Provides a quicker break-in but doesn't break down.

## BROKEN IN AND READY TO GO

The A900™ baseball glove has a cool, old-school look with its dark brown leather. Even better, grounders, line drives and fly balls don't stand a chance with a glove that's ready on Day One. There's no long winter break-in or sore knuckles punching the leather. The A900 will be ready when you are.

- 1. DOUBLE PALM CONSTRUCTION (FRONT SIDE):**  
A thin, strategically cut piece of leather is placed between the palm liner and outer shell, providing maximum pocket stability.
- 2. FULL LEATHER CONSTRUCTION:**  
Leather shell, laces and palm liner. The A900 expertly breaks in and conforms to your hand.
- 3. LOW PROFILE HEEL (FRONT SIDE):**  
Gives glove flexibility, opens up the palm and pocket, and makes it more forgiving on bad-hops.

# ONYX™

## FEELS GOOD. BREAKS IN FAST.

A favorite of Fastpitch players, the Onyx™ is so loved because it breaks in fast and feels good. It is diamond-ready and its Double Palm Construction helps provide the durability you need to last a long season.

1. **SOFT TUMBLED LEATHER:**  
Minimal break-in but lasting durability.
2. **ROLLED DUAL WELTING™:**  
Thin strips of Pro Stock® leather are skived thin and rolled to provide long-lasting shape and a quicker break-in.
3. **DOUBLE PALM CONSTRUCTION:**  
A thin, strategically cut piece of leather is placed between the palm liner and outer shell, providing maximum pocket stability.

# CORES BASEBALL

# SEAMS BASEBALL

### DURA-CORE TECHNOLOGY™:

Added to Red Cushioned Cork to help the ball retain hardness 15% better than the competition. Formed to withstand impact and give you the game changing performance you need.

### RED CUSHIONED CORK:

Gives a Wilson® baseball the ability to keep its shape and firmness. This allows for better pop when coming off the bat.

### SUPER SEAM TECHNOLOGY™:

With seams 20% higher than raised seam baseballs, pitchers experience superior control on the mound. Fielders can locate the ball quicker in their glove and throw with more accuracy.

### FLAT SEAMS:

The most aerodynamic Wilson baseball, these balls fly further, giving both pitchers and hitters a true feel of the ball.

### STEP 1

## RIP IT.

Rip open the foil bag and remove the soft Shields to begin the custom molding process. Exposing the protective Shield to air activates EvoShield's Gel-to-Shell Technology.™

### STEP 2

## FIT IT.

Place the soft, flexible Shield in position and smooth any wrinkles. The Shield will begin to harden in about 10 minutes.

### STEP 3

## WEAR IT.

Wear the Shield for 30 minutes until the transformation from Gel-to-Shell™ is complete. Once fitted, the Shield is permanently formed to your body shape and is ready to provide protection all season long.

The R3 is used by Major League teams to develop and strengthen their players' defensive skills. Formerly called the **Power Hammer**, the R3 throws 10 balls per minute, giving you the ability to execute hundreds of ground balls, line drives, fly balls and pop-ups in a single practice. Equipped with a recovery time of 6 seconds, the R3 is extremely efficient. Incorporating either of ATEC's R-Series machines into your practice increases the practice's efficiency by eliminating the possibility of errant fungo hits. The R3 is built to perform all Major League level defensive drills; including vertical pop-ups to catchers and sending balls from home plate to the fence to help outfielders improve playing balls at the warning track and off the wall.

# R2™

CLASS: DEFENSIVE TRAINING MACHINE

LEVEL: COLLEGIATE

The R2, formerly called the **Rookie**, is built for collegiate level defensive training. It is designed to be a more compact version of the professional level R3 training machine. Just like the R3, the R2 also allows you to achieve the maximum number of repetitions for any defensive drill; giving your players more quality repetitions than could possibly be achieved with only a fungo bat.
