## HYDRAULICS

### **NOTE: Optional Control Locations**

Caterpillar offers many attachment hydraulic controls to operate work tools. Depending on which hydraulic part number is selected, the operating electro-hydraulic switches may include the auxiliary pod, mini-joystick located on the auxiliary pod, and/or the ripper control pod.

### **NOTE: Auxiliary controls that can have float**

#### Auxiliary Pod Controls

INDEX = Index Finger (front lift)(float capability)  
 MID = Middle Finger (dozer angle 1)  
 RING = Ring Finger (dozer angle 2)  
 LITTLE= Little Finger (float capability)

### **NOTE: Mini-Joystick**

### **NOTE: Ripper Control Pod**

RH1 = Front Lift (float capability)  
 RH2 = Ripper-Scarifier Control  
 RHD = Ripper Handle Dual Switch (RH1 & RH2)

## HYDRAULICS (CONT.)

### **NOTE: Common Functions**

#### COMMON FUNCTIONS:

Base = 8 functions: right and left blade lift, circle turn, drawbar center shift, blade side shift, blade tip, front wheel lean, frame articulation.

- FL = Front Lift (moves front work tools up/down)
- DA1 = Dozer Angle 1 (angles front blade left OR right)
- DA2 = Dozer Angle 2 (angles front blade left AND right)
- RIP = Rear Mounted Ripper (moves ripper up/down)
- MMS = Mid-Mounted Scarifier
- WM = Wing Mast
- WT = Wing Tilt
- Float = Built-in feature of valve section that opens both the work ports to tank. The external forces (weight of the implement) allows free movement of the implement.
- Flow Rate=Provides maximum rate of fluid flow from the specific work port. B/A represents the maximum flow rate in Port B/Port A\* in LPM (liters per minute).

\*NOTE: Each valve section has two work ports (Port A and Port B).  
 Port A: Used to either raise implement or move implement to the right or for clockwise rotation of the implement.  
 Port B: Used to either lower implement or move implement to the left or for counter-clockwise rotation of the implement.

## TIRES, RIMS, AND WHEELS

Tires listed below include a set of six tires.  
**\*\*To calculate tire loads with machine attachments, please reference the MG Tire Selection Pocket Guide (media #AEXQ0182), available on the Electronic Sales Library.**  
**All tire selections should be made with consideration for planned machine attachments (OEM and aftermarket) and their additional weight. Each tire has a maximum load rating that is not to be exceeded. The tire selection should be based on the maximum of all tire position loads on the machine. Assistance for calculating the highest tire load can be found in the Tire Load Worksheet in the back of the Caterpillar Motor Graders Tire Selection Pocket Guide. Failure to abide by the load ratings of the tires without first consulting the local tire supplier representative could result in nullification of the tire warranty.**

**TIRES, RIMS, AND WHEELS (CONT.)**

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice, but we reserve the right to change to alternate tires. If the tire brand cannot be supplied, the dealer will be contacted to propose alternative tire options. The dealer will need to respond with an alternative tire selection within 72 hours. If no response is provided by the supplier, the order will default to a comparable tire. As a consequence of a tire change the total machine price will be decreased or increased relative to the price of the new tire selection.

The information provided can be used to make a tire selection based on the particular conditions at the site. When available, the tire manufacturer should be consulted regarding proper tire selection.
