**TIRES, RIMS, AND WHEELS**

Due to industry-wide tire availability limitations, tire brand and type cannot be guaranteed. Every effort will be made to satisfy your tire choice. However, if the tire type cannot be supplied we will contact the dealer to propose alternatives. The dealer needs to choose between an alternative tire or a "rims only" option (where available) within 72 hours. If no response is provided by the deadline, the order will default to the alternative tire and will be changed at that point. As a consequence of a possible tire change, the total machine price will be decreased or increased depending on the price of the new tire.

The RETURN TO DIG/WRKTL POSITIONER feature is available as a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password. Cost to enable the feature via password is approximately \$221 USD Dealer Net (January, 2016). Machine must be equipped with the Electronic Self Level feature, provided in the H2 or H3 performance package to install the SEA.

**DEDICATED ALTERNATE PATTERN (H-pattern):**

As of January 2018, this feature is standard from the factory. There is no cost. Using Electronic Technician the dealer can configure the machine to operate using the alternative "H" control pattern. With this feature there is no method to allow the operator to change the pattern in the cab. Refer to media number REHS8719.

**SELECTABLE PATTERN CONTROL (ISO/H patterns):**

This feature is a Software Enabled Attachment (SEA) and is installed using Electronic Technician and a unique password. The SEA cost to enable the feature via password is approximately \$250 USD Dealer Net (January, 2018). Allows an operator to select either standard CAT control pattern or the alternative "H" control pattern with the flip of a switch. Estimated time to install: 30 min. Refer to media number REHS8718 for appropriate parts list.

The components required are available for order from the Parts Department.

EquipCoat is a flexible protective coating with anti-corrosion additives that encapsulate machine surfaces, including components under the cab and in the engine compartment. Will hold up to washing with non-solvent based cleaners for long-term corrosion resistance. Recommended for machines exposed to corrosive environments(e.g.manure, fertilizer, salt, mining fluids, etc.).
