L	471-6764	FEATURE PACKAGE,ROAD & LOAD,SL 0		\$3, 680
		This package includes the following for standard lift linkages 1) Electronic Throttle Lock 2) Automatic Ride Control 3) Variable Speed Creeper Control 4) Electronic Implement Modulation 5) Rim Pull Control(three electronic settings to select 60%, 80% and 100% full power) 6) Return to Dig 7) Lift Kickout 8) Implement Modulation 9) Hystat Aggressiveness control Electronic Throttle Lock maintains the engine speed at any RPM. adjustable at any time. Creeper Control compliments Electronic Throttle Lock by controlling the ground speed regardless of engine speed. Together these two features are normally used for broom, mower or snow blower applications where high engine speed is needed for the hydraulic power, but ground speed must be slow. Rim Pull Control reduces the amount of tire slip in poor underfoot, preventing excessive tire wear. When the lift is pulled back to a detent, Lift Kickout will stop the loaders arms at a preset height. Implement Modulation increases joystick aggressiveness with three selections on the right console soft touch pad. Similarly, the Hystat Aggressiveness has three selections for shift smoothness and directional change aggressiveness.

BUCKETS

WORKTOOLS

First worktool must ordered as installed,no packing reference required.
 Additional buckets must be ordered as 'not installed' and should include packing reference 0G-3281

Performance Series buckets feature a wider moldboard opening angle, longer floor and forward curving (convex) sidebars. These aggressive buckets load easier and retain material better for faster cycle times.

Offered with:

- 1) Bolt-on, reversible cutting edges for maximum durability and smooth grading.
- 2) Bolt-on teeth with pin-on tooth tips for maximum penetration and digging.

All 910/914 PS General Buckets share the following characteristics:

Single piece bolt-on cutting edge = 2400mm / 95" wide
 8x bolt on adaptors & long tips = 2430mm / 95" wide
 Performance Fill Factor = 110% (or 0.1cum/0.2cyd) of stated capacity.
 For correct bucket selection see OMM/specalog which shows max material densities per machine configuration per bucket size.
