**PRODUCT AND PRICING BULLETIN**

NEW HOLLAND BRAND PRODUCTS, U.S. NO. 18-40A

**NEW HOLLAND DEALERS WITH MRT AGREEMENT**

**SUBJECT: T6 SERIES: COMPLETE REVISION – EFECTIVE 10/1/2018**

Performance and productivity. It's table stakes in the game. Yet New Holland continues to take those levels of performance and productivity to new heights. To best meet the demands of today's producers, we're launching the T6.180, the largest model in the T6 Series that features a 6-cylinder engine, and can now be ordered with either Dynamic Command™ or Auto Command™ transmission.

The T6 Dynamic Command provides a powerful competitive advantage over the competition. It utilizes a dual-clutch technology not found on other tractors of this frame size. The T6 Auto Command Continuously Variable Transmission (CVT) continues to be the smoothest, easiest-to-operate and productive CVT in the market.

Customers can now decide on their choice of any of the three transmissions (also including the Electro Command™), and 4- or 6-cylinder engine configurations, to meet their horsepower requirements.

# Special Paint Color Information

Customer demand may require special color paint. New Holland can supply many of the standard colors that are listed in the Classic RAL System on the exterior of T6 Series Tractors. The Special Paint service is aimed at meeting the requirement by operations such as highway maintenance agencies, airport authorities, etc. for a tractor painted in a nonstandard color. This process delivers to the customer a professionally painted tractor with no requirement for a dealer to strip down and paint the tractor locally.

## The Process:

The New Holland Territory Business Manager (TBM) must be involved to authorize the color choice and coordinate contact with the order management team.

1. TBM approval of RAL color
2. The tractor retail order\* is placed including the Special Paint Color order as listed in options in the Price & Data pages.
3. The Special Paint order code flags order management and the plant of the request for special paint
4. The RAL paint color is communicated to order management to go along with the retail tractor order
5. Order management then contacts the manufacturing plant to gain authorization
6. The tractor with special paint is scheduled into production\*\*

Please determine the RAL System color number your customer requests (example Omaha Orange = RAL 2005). Please visit [www.ralcolor.com](http://www.ralcolor.com) or <https://www.ral-farben.de/info-ral-classic.html?&L=1> for more information on RAL colors.

The Special Paint Color order codes are offered in two levels of special paint inclusion:

1. Hood, roof, rear fenders
2. Chassis, wheels, hood, roof, fenders

See the Price & Data pages for order codes and other details

## More information:

Any replacement panels for special color tractors do have to be sourced locally. Unlike Blue Power parts, they will not be available through the CNH parts system.

\*New Holland will only accept retail sales orders for tractors with special paint colors and we reserve the right to refuse to paint tractors in colors deemed inappropriate (example: competitor paint schemes).

\*\*Tractors with special color paint schemes may require additional lead times.

Once a tractor order is submitted with a special color paint request, the tractor order cannot be changed to another color.
