**320, 321, 323 & 325F EXCAVATOR (CONT.)**

**COUPLERS, CAT PIN GRABBER (PG)**

The use of a quick coupler on an excavator with certain combinations of linkages (boom & stick) and work tool attachments has the potential for interference with the cab and or the front of the machine during operation. Always check for interference when first operating the machine with a quick coupler and a new work tool.

Ensure that the host machine is configured with a Extreme Service Stick designed for hydro mechanical work tool applications. If the host machine is not configured with the heavier stick then install line relief valves that are typically used for Thumb applications such as 6E-5234 for the work tool (bucket) cylinder circuit. The lower pressure setting will reduce the amount of torsional force applied and greatly increase the reliability of the lighter stick.

To have an Operational Thumb you will need to order one part number from each group:

- Thumb Group
- Bracket Group (if machine does not have thumb ready stick)
- Thumb Connector Lines

Machines REQUIRE these Hydraulic Functions to Operate the Thumb:  
 1. Double or Combined Function Hydraulics

For ordering assistance for both Thumbs and Hydraulics

***COUPLERS, CAT PIN GRABBER COUPLER***

The use of a quick coupler on an excavator with certain combinations of linkages (boom & stick) and work tool attachments has the potential for interference with the cab and or the front of the machine during operation. Always check for interference when first operating the machine with a quick coupler and a new work tool. For more information on Cat Pin Grabber Couplers and hydraulics refer to media number GEJQ1298 or contact the sales support team in Americas North via email at [worktools@cat.com](mailto:worktools@cat.com)

**HYDRAULIC THUMBS**

To have an Operational Thumb you will need to order one part number from each section:

- Thumb Group
- Bracket Group (if machine does not have thumb ready stick)
- Thumb hydraulic lines

Machines REQUIRE these Hydraulic Functions to Operate the Thumb:  
 1. Double or Combined Function Hydraulics

For ordering assistance for both Thumbs and Hydraulics

**336 EXCAVATOR (CONT.)**

**COUPLER, CAT PIN GRABBER COUPLERS**

The use of a quick coupler on an excavator with certain combinations of linkages (boom & stick) and work tool attachments has the potential for interference with the cab and or the front of the machine during operation. Always check for interference when first operating the machine with a quick coupler and a new work tool.

Ensure that the host machine is configured with a Extreme Service Stick designed for hydro mechanical work tool applications. If the host machine is not configured with the heavier stick then install line relief valves that are typically used for Thumb applications such as 6E-5234 for the work tool (bucket) cylinder circuit. The lower pressure setting will reduce the amount of torsional force applied and greatly increase the reliability of the lighter stick.
