STABILITY:

Always check the machine configuration
with the desired work tool combination
on stability. This price list only indi-
cates possible tool-machine combinations
Actual stability depends on machine-tool
configuration, with or without quick
coupler, and sort of application.

WARNING:

Demolition tools can create a hazard
from flying objects. Caterpillar recom-
mends installing front guards on the
cabs of the excavators. Failure to do so
can lead to injury or death.

MACHINE HYDRAULICS REQUIREMENT:

In order to operate a Hydro-Mechanical
Work Tool, the machine must be equipped
with control and hydraulic lines for
rotation and/or opening/closing.
