SYMBOL IDENTIFICATION

Global's Certified Products are in compliance with the stringent emission guidelines set by the GREENGUARD Environmental Institute and include all Upholstered Seating. To obtain a GREENGUARD Certificate for any product, please go to the product page on our website www.globalfurnituregroup.com and click on "View GREENGUARD Certificate".

level™ certification, based on the ANSI/BIFMA e3-2012 furniture sustainability standard, sets furniture manufacturers on a path toward greater sustainability over time. Based on environmental and social criteria set forth in the standard, a product's entire supply chain is assessed.

Certification assessment includes an evaluation of specific corporate policies and guidelines and an assessment of associated company manufacturing facilities. Products must meet quantifiable milestones of environmental and social performance at every step of development.

The quantitative assessment addresses four categories: material use, energy and atmosphere impacts, human and ecosystem health and social responsibility.

Manufacturers earn points in each of the four categories. The level™ brand and its numeric rating of 1, 2 or 3 indicate what threshold of certification a product has achieved. level™ 3 is the highest rating.

CONSUMER EDUCATION

How do I buy a desk?

Choose a non-reflective surface. Global uses colors that reduce glare to make your work easier to read while reducing eye strain.

Get a desk that lets you look ahead. A modular desk is easy to set up initially and then reorganize or reconfigure later to adapt to future needs.

Look for European connectors if you're buying ready-to-assemble furniture. Global makes assembly easy - all you need is a screwdriver.

Give your business an edge. Each Global desk comes with its own attractive edge design.

Avoid tangles. Make sure your desk has at least one grommet hole to keep computer and telephone wires out of the way.

A hutch should have a sweep that manages computer and telephone wires.

Island workspaces let you meet with more than two people at once with ample leg room for all.

Choose one of Global's height/angle adjustable keyboard trays to go with your desk. Your arms can maintain a comfortable position, reducing shoulder, back and neck strain.

How do I select the right workstation?

When searching for the right workstation it is important to consider its purpose which will be decided by the nature of your tasks. It is best to look for products that have been designed and engineered to help make your workspace more productive.

This can be achieved in a variety of ways. As a guide, observe how your work flows through your office in a typical day. It is likely that you'll uncover a number of distinctive and repetitive task patterns.

Once these patterns have been identified, organize them according to their intended use and frequency of their use. Now you are ready to investigate the pertinent factors that will determine the workspace you eventually select.

Lighting - Protect yourself

- If you have to setup near a window make sure your computer sits perpendicular to it, minimize eye-strain inducing glare on sunny days.
- If you have fluorescent lights, try to position your set up between the lights.
- Use "Parabolic louvers" to reduce the glare from fluorescent lights
- Use window blinds to control the light source through the day
- Panels or screens may be used to control glare
- Protect your eyes from Ultraviolet A (UVA) and Ultraviolet B (UVB) by using an anti-glare screen

Noise

- Try to set up your office in a separate room if possible and away from the rest of the house

Chair

- Comfort is personal but should be part of the selection
- Seat pan design; deep and wide enough
- Rounded front edge (waterfall)
- Adjustable slope seat
- Able to adjust your chair, to obtain appropriate height
- Sit back in your chair, with your thighs parallel to the floor
- Place feet flat on the floor, a footlocker may be required

Footlocker

- A footlocker helps to prevent possible discomfort resulting from outstretched feet
- The rocking motion creates light activity in the legs and feet and will help stimulate muscles to improve overall circulation

Keyboard

- Has a palm rest
- Easily adjusts the angle of the keyboard
- Easily adjusts the keyboard height

Document Holder

- A curved back document holder reduces glare
- Position document holder in line with the monitor to reduce eyestrain

Monitor

- There should be a direct line from the center of monitor to the, "J" key on your keyboard which should line up with your belt buckle
- Position the monitor at arm's length
- Make sure that the top of your monitor screen is slightly below eye level
- A monitor stand may be used to achieve the desired height

Workstation

- Adequate space beneath the worksurface for your legs
- Depth of the worksurface depends on the task and equipment used to perform this responsibility
- Try to place tasks that are performed regularly within arm's reach
- Avoid unnecessary reaching and bending which leads to fatigue and possible muscle strains and can reduce efficiency
- Keep in mind other related tasks in your planning
- Establish your workflow then design the essential elements to meet your requirements

- **BOX AND FILE DRAWERS** use FULL EXTENSION STEEL BALL BEARING SLIDES for smooth action.
- **BOX AND FILE PEDESTALS** are standard and are CONSTRUCTED INDEPENDENTLY of the chassis, with fully closed bottoms. This PICTURE FRAME CONSTRUCTION technique prevents racking, and provides a product that lasts for years.

- Drawers and END PANELS are **EDGE BANDED** on ALL FOUR SIDES to protect clothing and the floor covering.

- 6+ person workstation
- Storage spine-based workstation

Easy to customize and reconfigure to fit specific requirements. From the facility manager's perspective, all workstations can be standardized to form a linear worksurface and power/data services, and their respective function or purpose can be governed by the type, quantity and placement of adjacent components like dividers, storage cabinets, shelves and accessories. These adjacent components can be easily reconfigured with minimal down time - without having to invite electrical and IT crews.

Compatible with various environments

- Clean, simple, elegant design language, with finishes suggesting comfortable, even domestic flavor. Understated to designer combinations, like anodized aluminum and white, give a hint of subtle sophistication.

Choice of **two functionally and visually different leg** supports

- Casters or levelers
- Height adjustable round legs
- Fixed height rectangular legs
- Optional anodized aluminum finish (Rectangular legs only). Refer to individual models for upcharge.

Various **power/data delivery** levels to choose from

- Wire basket to organize cable access under worksurfaces and storage units
- Vertical cable manager integrated into rectangular leg
- Worksurface edge-mounted power/data units (easy to reconfigure, plug into wall/floor outlets), or power troughs
- Single-sided and double-sided below worksurface power/data trough (desktop/floor standing computers and office equipment)
- Worksurface access door (access to below worksurface power outlets and data terminals)
- Above worksurface power/data trough provides immediate access for laptops, tablets and phones
- Storage integrated power/data unit
- Horizontal cable management under storage units with optional wire basket

Interconnected storage units can form a spine to create space division, storage, cable management and worksurface support. Storage leg can be configured to act as a ganging bracket.

BEAM APPLICATIONS

D x W x H

Table supporting structures - BEAMS

Legs are connected with supporting beams. There is one beam for a single line of tables while two beams connect back-to-back table structures. Adjustable clamps at either end of the beam can be adjusted to accommodate the following applications in both single table as well as back-to-back table configurations.

STANDARD TABLE BEAM**Single table beam application (1)**

Designed to bridge two legs to form support for a single table, or for two back-to-back worksurfaces. Adjustable clamps at either end of the beam are pushed all the way in to allow both table legs to be tucked under the worksurface.

**End of run table beam application (2)**

Supports one table leg assembly tucked under the worksurface (one adjustable clamp pushed all the way in), while the other table leg assembly can be shared between two adjacent worksurfaces (adjustable clamp pulled out to extend the beam).

**Interconnecting table beam application (3)**

Supports both table leg assemblies extended to support adjacent worksurfaces on either side. Adjustable clamps at either end of the beam are pushed all the way in to allow both table legs to be tucked under the worksurface. Single table beam application supports single table leg assemblies with legs on both sides tucked under the worksurface.

**TELESCOPIC TABLE BEAM (4)**

Supports a return connected perpendicularly to a 24" or 30" deep primary worksurface. The Telescopic beam is connected to a single or back-to-back leg on one side and to any-worksurface supporting beam on the opposite side. Telescopic beam clamp allows the table leg to be tucked under the worksurface or shared between two adjacent worksurfaces.

**STORAGE TABLE BEAM (5)**

The Storage beam is connected to a single or back-to-back leg on one side and to the worksurface on the opposite side - thus saving one leg assembly. Assembly worksurface is connected to storage units with included storage brackets. Storage table beam's flexibility allows for a single table application (with the table leg tucked in under the worksurface) as well as for a double table installation (two adjacent tables supported by a shared leg in the middle and two storage cabinets at the opposite ends).

**STORAGE TABLE BEAM ADAPTER (6)**

Connects to a storage table beam. This assembly allows a worksurface to be supported by a leg on one side and a spine (formed by interconnected storage cabinets) on the opposite side.

BRTSA25	1 x 15.2 x 2.75	60	4.30	.02	\$78	

Allows a worksurface to be supported by a leg on one side and storage spine on the opposite side. A typical storage spine is formed by series of Interconnected 21" or 25" storage cabinets of corresponding depth. The 21" or 25" adaptors provide structural support, acting as supports between the top of the storage cabinet spine and the bottom of the perpendicular worksurfaces. The flexible leg/beam/adaptor assembly arrangement allows the leg to be tucked in under the worksurface or to be shared by two adjacent worksurfaces. Specify Storage Beam nominally 18" shorter than worksurfaces for storage spine support application. Specify BRTSA21 or BRTSA25 depending on height of storage units forming the spine. Includes all hardware necessary to connect the adapter to the beam, worksurface and storage spine.

POWER DELIVERY / CABLE MANAGEMENT

D x W x H

At the basic level, table and floor based office equipment is serviced by a wall or floor power supply. As the operation grows, there might be a need to organize excessive cable clutter.

Wire Basket (1) connects to the underside of worksurfaces with sprig brackets, and cables are simply dropped and coiled into them. *Wire Basket is not to be used with power troughs.*

Cable Snake (2) Installed in proximity of floor monument to manage vertical cable clutter..

Table clamped, single circuit **Desk Top Power Data Modules (3)** deliver services to desk height, while tapping into wall or floor power supply. Again, the excessive cables can be managed with Cable Trays.

Ceiling pole **BRTCPP (4)** manages power and data cables between ceiling and above or below worksurface power troughs.

Above and Below Worksurface Power/Data Troughs (5) can be installed between back-to-back tables for extended below and above desk height power/data distribution. 8 wire, 4-circuit system. (2 + 2 circuit configuration)

NOTE: Specify **BRTHH58 (8)** to distribute power from double-sided, back-to-back below worksurface power trough to a single-sided, below worksurface power trough at the end of a table run.

Leg shroud (9) attaches to 34" w legs and manages power floor feed, as well as data cables from floor monument.

Single Sided Power/Data Troughs (6) can be installed to the underside of a single table.

Storage power/data box BRTVCM (7) attaches to storage units and provides access to one duplex/data terminal on top storage surface. Integrated single circuit module can be plugged to floor monument under the storage or to a wall outlet

COLLABORATIVE SEATING**D x W x H**

Bridges collaborative seating collection consists of seating, privacy screens, tables, tablets and power. It is a versatile modular furniture series which can be configured into many space planning scenarios, including corner, in-line, open concept, traditional reception, as well as secluded seating with high privacy partitions.

Furniture pieces can be used as stand alone items or can be mechanically linked together to form a variety of seating configurations.

Seat and backrest can be integrated with Bridges tables.

Corner tables and in-line 6" table modules double as power delivery centers.

Dedicated seat backrests feature dual USB charging port.

Some inline 6" table modules are furnished with grommets to support tablets.

Legs are available in standard Bridges metal painted finishes and anodized aluminum finish.

Bridges Collaborative Seating upholstery features a single stitch, thick white thread around the edges. The white, wide stitch along with crisp corners are part of its distinctive personality. In order to achieve crisp edges and to minimize "pillow" effect caused by taut fabric, the upholstery material has been applied deliberately loose, which may over time, produce puckering of the upholstery surface material. This can be easily corrected by stretching the fabric by hand or during vacuuming.

In order to efficiently utilize fabric yield, all 60" seats and backs feature a seam in the middle. The double stitch seam is sewn with a thin thread, closely matching the upholstery material in color.

Some complicated fabric patterns prevent pattern matching and will be upholstered without the seam at the discretion of the factory.

Should you require no middle seam by cutting into the roll, please specify "NO SEAM" at time of your order.

POWER DELIVERY / CABLE MANAGEMENT

D x W x H

At the basic level, table and floor based office equipment is serviced by a wall or floor power supply. As the operation grows, there might be a need to organize excessive cable clutter.

(1) **Cable Snake JBPS** installed in proximity of floor monument to manage vertical cable clutter.

Table clamped, single circuit (2) **Desk Top Power Data Modules** deliver services to desk height, while tapping into wall or floor power supply. Excessive cables can be managed with (3) **Wire Management Clamps JBWM2**.

(4) **Below Worksurface Power/Data Troughs** can be installed between back-to-back tables for extended below desk height power/data distribution.

- 8 wire, 4-circuit system. (2 + 2 circuit configuration)

To specify electrical, utilize the following steps:

- For each back-to-back worksurface, specify (1) **SEDBKIT**
 - SEDBKIT is centered below the wire pass thru on the surface
 - Unlike other wiring systems, Sidebar's electrical can have individual simplex outlets on different circuits
- Specify a total of (4) simplex outlets per user - up to four different circuits can be specified for a single user
- Jumpers (SExxFFJ) will bring power from one SEDBKIT to another - subtract 6" from the worksurface length to calculate the necessary length jumper
- Currently, Sidebar can only accommodate basefeeds from a floor or wall
- Basefeeds (SEBFxx) are available in multiple lengths and can be positioned at the end of a run or the middle of a run
- Global recommends the use of a vertical cable manager (such as the JBPS or PCSN01) to manage the basefeed and data cable from floor or wall to the underside of a worksurface

- Panels are constructed of lightweight aluminum with a self levelling feature to maintain even height of all panels and permit fast installation and reconfiguration
- Honeycomb panel cores are made from 30% recycled card stock
- Slotted verticals provide load bearing capabilities
- Each panel comes with 2 ½" glides allowing for 2" height adjustment and two full length capture strips
- Patented "knuckle-loc" design ensures solid panel-to-panel connection
- Universal corner post (two-way, three-way, four way)

PANEL FABRICS

- Available in the following panel fabrics:
 - **Grade 2** Lola
 - **Grade 3** Brinx and Mariposa
 - **Grade 4** Accent
 - Momentum **Grade 5** Meander, Tracery and Universe
- **The same fabric MUST BE used on both sides of the panel.**

PANEL FRAMES

- eO+ extruded aluminum panel frames are made from remelt billets (recycled aluminum) whenever possible and can be recycled almost endlessly
- eO+'s load bearing frames accept worksurfaces at 29"H in height. Off-Desk Accessory Bars are at 36" - 40"H and Open Shelves at 50"H. The top of the overhead storage cabinet can only be used on the 66"H Panel when the top of it is even with the top of the 66"H Panel

IMPORTANT: When specifying and installing eO+ workstations with Overhead Storage Units (shelves and overheads) and/or worksurfaces, the following rules must be followed. Failure to adhere to these rules may compromise the integrity of the installation and void the warranty.

RULE #1

Panels supporting Overhead Storage Units and/or Worksurfaces must be vertically stabilized. These panels must have worksurfaces attached to the panels using any combination of the following:

- A** - Mid-Support Gables (EMSG2xxP)
- B** - End Gables (EFG2xxP)
- C** - Worksurface Supporting Pedestals with Pedestal Connecting Brackets (GWPSxxxP/EPTPBK).
- D** - Wing Panels that are the same width as the depth of the worksurface and incorporate a set of Corner Brackets (EEWSB)

RULE #2

Panels supporting overhead storage units must have panels of equal height on either side.

RULE #3

The width of an overhead storage unit must correspond with the width of the supporting panel.

RULE #4

Whenever possible “balance” the layout by using the same size and type of overhead storage unit on both sides of the same panel. This type of layout will ensure straight panel runs.

RULE #5

48” and 60” wide overhead storage units require corner posts and wing panels on both sides of the supporting panel.

RULE #6

A run of panels without worksurfaces should be no longer than 9'-0” and must be supported with (A) Wing panels at both ends, (B) A Wing Panel at one end and a Self-Supporting Foot (EESF-1) at the other end or (C) A Wing Panel at one end and a Floor Mount (EEFM) at the other end - Not Shown.

Note: Floor Mounts MUST BE bolted to the floor.

PANEL FINISHES

GENERAL INFORMATION

- GPS II is a MODULAR panel system that can be used with Adaptabilities, Correlation and Zira to address reception, privacy and/or storage needs.
- New painted frame finish matches metal seating finishes, available in four fabric grades.
- Global laminate and seating products are in compliance with stringent emission guidelines set out by the Greenguard Environmental Institute under the standards for low emitting products and materials. www.greenguard.org
- **Level 3 Certified**

CONSTRUCTION

- Stand alone panels are shipped with legs detached and neatly concealed inside frame for ease of cartoning and shipping. The legs simply slide into position on the job site for “no tools” installation.
- For fabric wrapped frames, specify “**FW**”, **ADD \$73** per panel. AGATE II panel fabric is not available for this option.
- Glazed panels are available in Clear (**GC**) and Smoked (**GS**) as standard. Frosted (**FZ**) glazing is available at a **10% upcharge**. Please specify at the time of order.
- Frame finishes are available in Black (**BK**), Business Grey (**BG**), Nevada (**NV**) or Chrome (**CH**). Please specify.
- Please Note: Free standing fabric panels (GPS1, GPS2, GPS3, GPS4, GPS5, GPS6, and GPS7) are available with a Chrome (CH) frame ONLY.
- 72” wide panels are upholstered horizontally due to the width of fabric rolls.
- All panels are built 3/8” wider than nominal width to allow for return panel installation. **All “special width” panels must be ordered 3/8” less than actual width required.**
- Panel ‘creepage’ will occur on long straight runs.
- It is recommended that panel runs do not exceed 8 feet in length without additional panel support and hardware.
- The bottom edge of the plexiglass window is 42” off the floor for partially glazed and 7” for fully glazed panels.
- NRC rating of 0.4.
- Straight panels have two adjustable levelling glides (finished in black), curved panels have three. Glides can be replaced with optional self-supporting feet.
- All panel connectors (finished in black) must be ordered separately.
- All panels are shipped one per carton.
- For **custom** sizes, take the next larger size **fabric** panel and **ADD 10%**.
- For **glazed** panels, take the next larger size panel and **ADD 15%**.

PANEL FABRICS

- C.O.M. fabric must be approved by Global. Fabrics must be 60” wide.
- It is recommended that panels NOT be upholstered with seating fabrics.
- Available in the following panel fabrics:
 - **Grade 1** Agate II
 - **Grade 2** Lola
 - **Grade 3** Brinx and Mariposa
 - **Grade 4** Accent
 - Momentum **Grade 5** Meander, Tracery and Universe (*extended lead time*)

HOW TO ORDER PANELS

PLEASE NOTE: AOOOS overstorage units are designed to be used of the same width and size on both sides of the GPS II panel to ensure equal distribution of weight on the panel. Overstorage units can be used on one side of a panel on short runs, or on cubicles under the following conditions:

- use return panels to stabilize configuration
 - use floor mounts to anchor panel
 - use worksurface connectors to attach panel to worksurface
- See diagrams below for acceptable & unacceptable usage of overstorage units with GPS II panels.
 - GPS II panels are 1” thick and may show some movement after overstorage units are loaded.

 Use the following formula:
 $(w \times d \times h) / 1728 = \text{Cu. Ft.}$
 ex. If transaction top required is 21" long,
 $(21 \times 12 \times 1) / 1728 = .1458$
 Round up to the nearest cube, in this case, 1 cubic foot.

To calculate Transaction Top **SHIPPING WEIGHT**:
 Use the following formula:
 $\text{width required} \times 12 \times 1 \times .025 = \text{Wt. (lbs)}$
 ex. If transaction top required is 20" long,
 $20 \times 12 \times 1 \times .025 = 7.5 \text{ lbs.}$

GROMMETS

- Grommets available in standard table top locations (left, center or right). Order as: **AG1, AG2 or AG3.....Add \$65**
- Grommet hole dimensions are 3 1/4" wide x 1 7/8" deep.

- Actual grommet locations will vary according to base selection.

POWER BLOCK

- A Power Block (model **PMSPPM**) may be ordered on all worksurfaces.
- A Power Block is a rectangular worksurface power/data module with one electrical duplex receptacle and two data (RJ45) receptacles. 9' black cord included. Power Block dimensions are 3 1/2" deep x 6 1/2" wide x 2 3/4" high.
- Actual Power Block locations vary according to base selection. - To purchase a Power Block, you must specify both the Power Block cut-out location and the Power Block model #. Order Power Block as **PMSPPM, ADD \$238**. Power Blocks are available in standard worksurface locations (left, center or right). Order as **E1, E2 or E3. ADD \$65.00**.

GROMMETS

- Grommets available in standard table top locations (left, center or right). Order as: **AG1, AG2 or AG3.....Add \$65**
- Grommet hole dimensions are 3 1/4" wide x 1 7/8" deep.

- Actual grommet locations will vary according to base selection.

POWER BLOCK

- A Power Block (model **PMSPPM**) may be ordered on all worksurfaces.
- A Power Block is a rectangular worksurface power/data module with one electrical duplex receptacle and two data (RJ45) receptacles. 9' black cord included. Power Block dimensions are 3 1/2" deep x 6 1/2" wide x 2 3/4" high.
- Actual Power Block locations vary according to base selection. The locations will be left (AG1, E1), center (AG2, E2), and right (AG3, E3). **Example:** 8' table with drum base does not have a modesty panel, so the grommet (AG2) and power block (E2) can be perfectly centered in the table. An 8' table with a slab base has the modesty panel, so the grommet (AG2) and power block (E2) will be offset alongside the modesty panel.
- To purchase a Power Block, you must specify both the Power Block cut-out location and the Power Block model #. Order Power Block as **PMSPPM, ADD \$238**. Power Blocks are available in standard worksurface locations (left, center or right). Order as **E1, E2 or E3. ADD \$65.00**.

Bungee is a series of freestanding tables and accessories designed for classrooms, training rooms, boardrooms and any other multi-functional space that may require frequent configurations. Tables are sold complete with legs and Bungee cords so they may quickly and easily be connected together without searching for tools or worrying about loose parts.

Bungee tables feature rounded corners with a unique "bubble molding" that is engineered to compress under the tension of the Bungee cords. The compressed molding creates a seal that serves to locate and align interconnected tables while also providing a soft and forgiving edge.

Choose from a variety of top shapes and laminate finishes to create your individual style. In addition, most tables offer a choice of tapered legs or spider legs in a Silver or Black finish with adjustable levlers or optional casters. Optional modesty panels, grommets, wire management and power blocks further enhance your workspace.

Flip-Top tables can be nested and easily stored by activating the single hand release mechanism from the left or right side.

Optional locking casters are available in Silver or Black finish (standard on Flip-Top models).

TOP & EDGE OPTIONS

- ConnectTABLES® have nine basic top shapes available in various sizes. All top shapes have a variety of straight or curved edges which are referred to as **Working (W), Connecting (C) or End (E) edges**. Edges can also have a combination of edge types as shown.
- *cannot freestand

Working Edge (1) - Edges designated with the letter "W" indicate that this is a **working** or sitting edge. These edges can be connected with optional ganging hardware in free-standing applications.

Connecting Edge (2) - Edges designated with the letter "C" indicate that this is a **connecting** edge. These edges can be connected to any other connecting edge of equal width, regardless of the top shape or size.

End Edge (3) - Edges designated with the letter "E" indicate that this is an **end** edge or an edge that can finish a run of tops. If a top has two end edges it can be freestanding. 90° crescent tops can be freestanding if the optional center leg is added.

FREESTANDING AND CONNECTING CONDITIONS

Freestanding tables are defined as any one worksurface supported by two or more legs;

connecting tables are defined as more than one work surface supported by a single leg at each point of connection. The rule for determining the quantity of legs of an open configuration is the number of worksurfaces plus one (**See Figure 1**).

On closed configurations, the number of legs is equal to the number of worksurfaces (**See Figure 2**). There are some exceptions, such as when optional third legs are used on quarter round or 90° crescent shapes.

Figure 1. Open Configuration
Number of Surfaces = 5
Number of Legs = 6

Figure 2. Closed Configuration
Number of Surfaces = 6
Number of Legs = 6

FREESTANDING CONDITIONS

- All square, rectangle and trapezoid shapes are able to act as freestanding tables (**Figure 3**).
- When Trapezoid tops are freestanding, legs must be on the outer left and right sides (**Figure 4**).
- 90° crescent work surfaces have provision for an optional third center leg for additional stability when heavy loads are applied to the outside edge. They can also be used as freestanding tables when a third leg is added (**Figure 5**).
- All freestanding tables can be connected with optional ganging hardware.
- Freestanding tables can be ganged with connected tables in some cases, providing that the number and size of connected tables is easily movable (**Figure 6**).
- **DO NOT DRAG TABLES WHEN RE-CONFIGURING.**

Figure 3 - Freestanding Tables

Figure 4 - Trapezoid Tops

Figure 5 - Adding a Third Leg

Figure 6 - Ganging with Connected Tables

CONNECTING CONDITIONS

- Any two worksurfaces of equal depth (24"D, 30"D or 36"D) can be connected with one leg, at the connecting or end edges (**Figure 8**).
- Half round work surfaces can be used in the following ways: They must be of equal width when connected to each other (**Figure 7**) or the connecting shapes must be equal to half the width of the connecting half round (**Figure 8**).
- ConnectABLES® is designed with the leg to be fastened parallel to connecting edges, but in some cases you may wish to fasten legs at 90° to connecting edges. This could allow for increased leg or knee clearance, depending on the intended use (**Figure 9**).
- Quarter round and 90° crescent work surfaces have provision for an optional third leg for additional stability when heavy loads are applied to the outside edge. For quarter round work surfaces, it is recommended that configuration "A" be used since the outside end of the center leg in configuration "B" is almost flush with the outside edge of the worksurface. If configuration "B" is installed against a wall or where there will be no traffic flow, then configuration "B" can be used.

C CONNECTABLES® - PUTTING IT ALL TOGETHER

Legs are fastened to work surfaces utilizing a steel-to-steel connection. Each leg comes equipped with four ¼" x 7/8" machine screws. Screws are inserted through the four oval shaped holes only. Do not use wood screws! When fastening legs to work surfaces, hand thread screws into position to prevent any cross threading. When all screws have been hand threaded, tighten firmly with screwdriver to secure. Optional thumbscrews can be used in place of machine screws. Thumbscrews eliminate the need for a screwdriver, whether assembling or disassembling tables. **Do not use power tools for assembly of legs.**

FREESTANDING TABLES

1. Turn work surface upside-down on clean floor. (You may want to use carton from packaging as a protective assembly surface to protect the top from scratching.)
2. Position leg mounting plate holes over threaded steel inserts in top.
3. Fasten each leg to top with four ¼" x 7/8" screws.
4. Turn table right-side up.
5. Level table by adjusting glides.

CONNECTING TABLES

1. Determine approximate location of desired configuration in room and turn work surfaces upside-down on floor. (Remember you are working in reverse.)
2. Position leg mounting plate so it is centered over the connecting edge of the first work surface. Fasten leg with two ¼" x 7/8" screws.
3. Repeat step 2 and 3 on the opposite edge of the first work surface.
4. Turn table right-side up.
5. Turn table right-side up and fasten to the previous top from the underside.
6. To add additional work surfaces repeat step 6.
7. When all the tops have been connected, level complete configuration by adjusting glides.

Note: Use the same procedures as above when using optional thumb screws.

OPTIONAL CASTERS

1. Turn work surface upside-down on floor.
2. Remove existing glide if previously installed.
3. Fasten caster to T-leg by threading caster stem into base of T-leg and secure by tightening lock nut.
4. If casters are used in combination with gliders, level table by adjusting glides.

Note: Casters are available in locking or non-locking styles.

Leg Finish

Designed by Zoey Chu, **Junction™** provides an affordable solution for your table applications. Choose from a variety of table top designs: Rectangular, Half Round, Trapezoid and Keystone to create a unique table for your boardroom, classroom or presentation room application.

A freestanding or shared leg configuration with the unique “Y” leg allows you to either create a permanent table or one that can be reconfigured quickly and easily. A Straight leg is available for use with half round and Keystone tops.

Care and Cleaning

Textiles

Fabrics: To extend the life of your seating upholstered in fabric, regularly dust the chair to prevent airborne particles from penetrating the fabric surface.

For light soiling, use a damp cloth and blot the spot with very slight pressure, taking care never to soak the fabric. Dry with a clean cloth by blotting - never rub fabric. More intense stains can be treated the same way, but with a mild detergent. Always test fabric first in an unseen area before using any cleaning method.

Leather: For regular cleaning, simply use a soft damp cloth, taking care not to soak the leather. For more thorough treatment, soak a soft cloth in mild soap solution and wipe surface in a light circular motion. Repeat with clean water. Allow to dry and polish with a soft dry cloth. Do not use detergents, aerosol sprays or other polishes.

Hard Surfaces

Wood Veneer Finishes: Waxing or polishing catalyzed finishes is not recommended because this will give a greasy, cloudy or uneven appearance to the product and could void your warranty. Global's conversion varnish is best cleaned by wiping the surface with a damp cloth, followed by a soft dry cloth in the direction of the grain. If the surfaces are heavily soiled, a gentle product like "Windex" can be used, following the same instructions as above.

Laminate & Painted Metal Finishes: Using a soft cloth, simply wipe the surface with a mild soap solution or glass cleaner. Always use a dry cloth and circular motion to prevent streaks.

-
- **Water-Based Cleaner:** Spot clean, using the foam only from a water-based cleaning agent, such as a mild detergent or non-solvent upholstery shampoo product. Apply foam with a soft brush in a circular motion. Vacuum when dry. Pretest small area before proceeding.
 - **Solvent Cleaner:** Spot clean, using a mild water-free solvent or dry cleaning product. Clean only in a well-ventilated room and avoid any product containing carbon tetrachloride or other toxic materials. Pretest a small area before proceeding.
 - **Water/Solvent Cleaner:** Spot clean with a mild solvent, an upholstery shampoo, or the foam from a mild detergent. When using a solvent or dry cleaning product, follow instructions carefully and clean only in a well-ventilated room. Avoid any product that contains carbon tetrachloride or other toxic materials. With either method, pretest a small area before proceeding.
 - **Vacuum Only:** Clean this fabric only by vacuuming or light brushing to prevent accumulation of dust and grime. Water-based foam cleaning agents of any kind may cause excessive shrinking, staining, or distortion of the surface pile and therefore, should not be used.
 - **Crypton Cleaning:** Generally stains are removed with plain water and powdered enzyme detergent. Upholstery foam shampoo, water-based cleaning products and germicidal detergents can be used. Be sure to remove all residue from cleaning products with clean water. Do not use solvent-based cleaners or dry cleaning products.
 - These recommendations and codes were developed by fabric specialists. However, because of the various ways fabric can be stained or damaged, there is no guarantee that the results will be completely successful. Use suggested methods on your own responsibility. To help prevent overall soil, frequent vacuuming or light brushing to remove dust and grime is recommended. Use professional furniture cleaning service when overall soiled condition has been reached.

Dealer/purchaser is responsible for providing correct information when placing an order. Orders with incorrect information (finish, etc.) will be scheduled for manufacturing upon receipt of complete information.

All phone orders must be confirmed in writing by the customer within 7 days.

To prevent a delay in processing orders, please specify delivery routing.

Changes and Cancellations

After the date of Global's acknowledgment of a dealer/purchaser's order, the order may not be changed or cancelled by dealer/purchaser without the written consent of Global. Special order items, C.O.M. and fabric-covered items already in production are not subject to change or cancellation under any circumstances. Fabric-covered items are considered to be in production once the fabric is scheduled for cutting. Other standard items already in production are subject to a minimum 35% cancellation charge.

Errors and Omissions

All quotations, acknowledgements and invoices are subject to corrections for any errors and omissions.

FINISHES

Seating Finishes

Where painted frames are not a standard color, there is a one time charge of \$578.00 list price per-order for custom wood staining/color matching. Restrictions may apply. The customer must provide a 3" x 3" color chip/sample. Non-standard finishes must be approved by Global prior to acceptance of order.

File Finishes

All non-standard finishes must be approved by Global prior to acceptance of order and may be subject to an upcharge.

Laminated Tops - Pricing for all non-standard finishes and sizes must be provided by Global Customer Service and may be subject to an upcharge.

Desk Finishes

Because the distinctive characteristics and the nature of wood products cause variations, exact matches are not always possible.

Global has launched a finishes program between marketing companies within the Global Group to match products as best as possible when same finishes are specified.

C.O.M. (Customers Own Material)

Use of Customer's Own Material must be approved by Global prior to acceptance of order. Please refer to page 348 of the Price Book and fill out the Authorization Request Form. Photocopy and use this form as often as necessary. The customer must provide a 12" x 12" fabric sample and advise how the fabric is to be applied. **Fabric yardage requirement will be advised by the factory, and additional yardage may be required if pattern requires matching.** Yardage shown in the List Price Book does not allow for pattern repeat/matching. Send to the address provided on shipping document upon approval from Global. If C.O.M. is difficult to apply or if product shall be modified, extra charges shall be made. Global reserves the right to cancel an order at any time if C.O.M. is inadequate for any reason. Customer's Own Material must be shipped freight and duties paid to our factory. Such shipment must be fully identified with purchaser's order number, RGA # provided by Global, and the item for which material is intended. Performance of C.O.M. when applied to product is the sole responsibility of the purchaser. Global's standard product warranty shall not apply to C.O.M. Use of C.O.M. will not reduce the published list price.

may increase depending on the type of product. Global's Return Goods Authorization (R.G.A.) numbers must appear prominently on all authorized returns. Global will not be responsible for freight costs. No credit will be given if goods cannot be reused as new. Special order items, non-stock items and C.O.M. products are in no event subject to return. All returns must be approved and authorized in writing by Global Customer Service. Global reserves the right to refuse delivery of any unauthorized returns.

Claims

All goods are sold F.O.B. plant or Global Distribution Center. Global is not responsible for damage which occurs in transit (or in storage). The carrier signs for all goods received in apparently good order. It is the dealer/purchaser's responsibility to examine goods upon receipt and to file any claims with the carrier for losses or damage to the product occurring during transit, including concealed damage.

Any claims made against Global for apparent defects, errors or shortages must be made by the dealer/purchaser, in writing, within 15 working days after any delivery. Failure by the dealer/purchaser to make any claim against Global within 15 days shall constitute acceptance of the goods and a waiver of any apparent defects, errors or shortages.

Suspension

In the event that the dealer/purchaser defaults in the payment of any sum due to Global, or in the event the dealer/purchaser's financial condition becomes unsatisfactory to Global, Global shall have the right to defer or discontinue shipment of any goods until such time as the default is cured or the dealer/purchaser provides assurance of payment to Global.
