

Can-ICE®

THE GAME CHANGING SYNTHETIC ICE SYSTEM—SKATE ANYTIME, ANYWHERE!

“Hockey Canada is endorsing Can-ice as our official supplier of synthetic ice. Can-ice can provide the young hockey player with a 12 month solution to develop their skating, puck control and shooting skills right in comfort of their homes without the maintenance of an outdoor rink.”

Paul Carson, Vice President of Development for Hockey Canada

Can-ICE®

Can-ICE® performs like ice—indoors or out!

Can-ICE® is a synthetic ice surface that looks, feels and performs just like real ice, indoors and out. Endorsed by Hockey Canada, Can-ICE® synthetic ice is perfect for any hockey player or figure skater looking to be the best they can be, and have fun doing it.

Can-ICE® synthetic ice harkens back to bygone days when the best hockey players became the best playing the game endlessly on frozen ponds, outdoor parish rinks and iced over sloughs. Under crisp blue skies or the ghostly shadows thrown by antiquated lights, kids played shinny... every game for the Stanley Cup, every game in overtime. And in doing so, they unknowingly practiced their stick-handling, their dekes, their shots, their skating. And it was all for fun.

That's the idea behind Can-ICE®. Can-ICE® gives young players and skaters a synthetic ice surface on which to play and practice 365 days a year. In these days of expensive and scarce ice-time, with Can-ICE® synthetic ice, kids can just lace up the skates and go... anytime they want.

Can-ICE® turns any venue into a skating rink, indoors or out in any climate!

Can-ICE® synthetic ice is dedicated to providing kids and adults who want to skate, play and practice whenever they want (and not be at the mercy of weather or expensive ice-time) a superior ice-like surface that is easy to assemble, maintain, move and store. Our mission is to make it easy and fun to skate at will... synthetic ice is always ready.

Can-ICE® is the first synthetic ice system at an affordable price!

Constructed entirely of special polymers, Can-ICE® is delivered in easy to install plates that simply interlock to form a seamless uniform skating surface. Can-ICE® was designed to be easy to assemble as well as convenient to move to a new location if so desired.

Can-ICE® is extremely durable and installs readily!

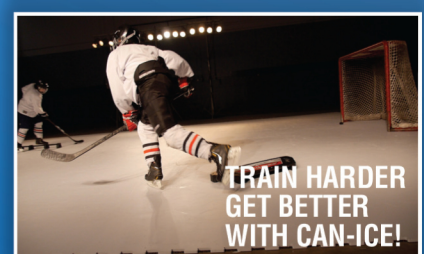

- Stands up to the rigors of hockey and figure skating!
- Easy to install (and remove) on any firm, level surface
- Dimensionally stable with both vertical and horizontal connection between panels
- Resists damage from vandalism or abuse
- Panels can be easily replaced if desired
- System can be readily removed and stored or transported to another site

Don't be left out in the cold!

Can-ICE® is offered exclusively in North America by CAN-ICE International.
