Concertina Counter

CONCERTINA COUNTER

Technical specifications

THE BASIC ELEMENTS

BASE MODULES

The base module has a lower dual front panel, a cable carrier, an upper front panel and two panel frames. The frames are fitted with a rubberized half round PVC bumper in medium grey placed on the user side and supplied with two actuators. The base modules are available as:

- Two optional widths (110 or 150 cm)
- Straight and curved modules (45° or 60°)
- Fixed height (standard 72 cm) or electronically adjustable (70 - 120 cm)
- Freestanding or connected modules (starter and add-on)
- With steel or wooden lower front panel
- With steel or steel perforated upper panel

COUNTER TOPS

The counter tops are supplied with solid flexible rubberized PVC edges. The counter tops are available as:

- Three optional depths (66, 78 or 90 cm)
- Four optional functions (freestanding, left side free, middle, right side free)
- Optional widths depending on base module width:
 - 110 cm base = 110, 130 or 150 cm
 - 150 cm base = 150, 170 or 190 cm
- Without or with rail (low or high)
- Four designs (standard, projection towards client, projection towards user, projection both sides)

INTERMEDIATE MODULES

The intermediate module includes a dual front panel, cable carrier and a top shelf. It is used to connect modules that do not have connecting counter tops.

UPPER FRONT PANELS

The upper front panel has either a steel or steel perforated surface. It is fastened underneath the counter top and follows the counter top up and down (if height adjustable module).

ELECTRICAL WIRE TRANSFER

All panel frames have a rectangular electrical wire transfer knock out on the right hand side of the frame (when viewed from the user's side). Configurations of successive modules are prepared for wire-lead through in the panel frames. The cable carrier is placed between the dual front panels on the base module, supporting any wire electrical components.

CONFIGURATION OF COUNTER TOPS

Base module	Width cm counter top
110 cm	110 cm counter top is used when connecting modules are placed on either side
110 cm	130 cm counter top is used when an adjacent module is placed on one side
110 cm	150 cm counter top is used for a freestanding module
150 cm	150 cm counter top is used when connecting modules are placed on either side
150 cm	170 cm counter top is used when an adjacent module is placed on one side
150 cm	190 cm counter top is used for a freestanding module

CONCERTINA COUNTER

Design options

WOODEN PARTS

FRONT PANELS

The wooden fronts for the Concertina counter are as standard produced in beech or birch veneer.

DRAWER PEDESTALS

The drawer pedestals are as standard produced in Concertina grey (#229).

- Wood gloss range is around 30.

COUNTER TOPS, RAIL TOPS AND BAG SHELVES

The counter tops, rail tops and bag shelves are as standard produced in grey laminate "Dandekor Etronit MB 311 NCS 4502-B Grey" (#185) or grey linoleum "Forbo desktop elegance 4175 Grey" (#257).

Note

Counter tops and rail tops cannot be produced in wood veneer.

CONCERTINA COUNTER

Design options

STEEL PARTS

BASE MODULE

The Concertina base module (lower front panel and panel frame) is as standard produced in Concertina grey #229

Note

- The actuator is only available in RAL 9006 Steel (#220).
- As a standard, the rubber edging and bumpers are produced in grey.

Steel parts for counter tops

The steel parts are as standard produced in Concertina grey (#229).

UPPER FRONT PANELS

See "Steel colours - general guidelines".

STEEL COLOURS - GENERAL GUIDELINES

The steel parts can be produced in any standard steel colour.

Note

- Steel gloss range is between 60 and 80, except for Champagne Mist (Eurobib off-white), that has steel gloss range between 25-35.
- Chrome, electro galvanized and aluminum parts are not available in other colours.

Please see list of standard colours on next page.
