Getting Started

Measuring for Drapery Hardware

- Measure the width of your window treatments, taking into account if you want to mount the hardware on the wall or directly on the window trim.
- Allow 3" minimum on each side of the window for the draperies to be completely open.
- Be sure to consider extra wall space needed for decorative finials, as the rod dimensions do not include the additional width added by each finial.
- To make windows appear larger, mount the curtain rod at minimum 4" above the trim.

Measuring for Draperies

- A. CLEARANCE — Measured from the back of the rod to the wall
- B. RETURN — Measured from the center of the bracket cup to the wall
- C. PROJECTION — Measured from the front of the bracket back to the wall

Length of Drapery Panel

Depending on the look desired, determine if the drapery should fall at the sill, below the sill, to the floor, or puddle on the floor.

Two Options for Drapery Fullness:

1. STANDARD — Width of window x 2½"
2. FULL — Width of window x 3 (Recommend for sheers and unlined drapery.)

Top of draperies should be at least 4" above the glass, so that the backs of pleats cannot be seen from the outside of the window.

Ideally, bottoms of panels should fall to the window sill, apron or the floor. Allow about 1" for clearing sill or floor.

Layered Treatments

The glass-side treatment should fall ½" shorter in length than the overdrapery, so that undertreatment hems do not "hang out."

Corner Windows

Kirsch® swivel sockets are an ideal solution for any windows down to a 90° angle including bay and corner windows. If you wish the corner to be free of fabric, use two, one-way draw rods. Add width for full stackback (at wall sides of glass). If fabric is desired in the corner, because of wall or woodwork, use two two-way draw rods. To mount, run one rod into the corner and butt the other rod into it.

Bay Windows

Use either three two-way draw rods or one two-way draw on the center window and a one-way draw on each side window. Remember, minimum rod length is 28"; for smaller side windows, use cut-to-measure rodding. To mount, butt all three rods.

Cut-To-Measure Rodding for Corner & Bay

Where precise fit and appearance are important, the best results will be obtained by using cut-to-measure rod sets. Cut-to-measure rodding must be used if all panels are to be controlled with a single cord. A wide variety of rods are available for corner, bay and bow windows.

Decorative Drapery Hardware 101

Poles

Drapery poles are usually mounted at least 3" - 4" above the window trim. If a layered look is desired for your window, choose a double bracket that can mount one right in front of the other. You can also use a standard curtain rod with a small projection underneath a decorative rod to achieve this look.

Finials

Finials complete the window and the room. They give windows a wide range of looks while coordinating with other elements of the room being decorated. Metal is a more contemporary style, while wood provides warmth and traditional styles. You might even consider glass finials to complement sheer fabrics.

Endcaps

Kirsch endcaps are an ideal solution for windows with limited wall or window space. Endcaps also provide a streamlined contemporary option for the window when used in place of finials.

Holdbacks

Add another finishing touch to your windows with holdbacks. It's a beautiful way to coordinate accessories and open windows to allow light to flow in.

Traverse Rods

Kirsch traverse rods are operated by a cord and pulley system or by wand draw and coordinate with pinch-pleated or Ripplefold® draperies. Draw options include split draw, one-way left and one-way right.

Rings

Rings are an easy way to attach panels to the pole. When used with by-pass brackets, c-rings allow panels to slide past a center support bracket. All rings have removable clips so you can use the eyelet to pin draperies.

Brackets

Brackets provide the foundation of any decorative drapery hardware look. Brackets are tonally coordinated to complete all window treatments. Kirsch recommends a bracket is placed at maximum every 4'. Decorative brackets (also known as scarfholders or sconces) may be used for a more dramatic look.

Swivel Sockets

Swivel sockets are an ideal solution for any window down to a 90° angle including bay and corner windows.

Quick Tips | Installation Recommendations

- Brackets must be installed securely into wall studs. When studs are not possible use wall anchors. We recommend hiring a professional installer.
- Brackets should be placed every 4'. We do not recommend installing brackets with a distance between them greater than 4'.
- Rods can be spliced together using connector screws for wood poles or rod splices for metal poles. Plan the location of the splice so that it will be covered by a bracket for stability.

KIRSCH®

Lifetime Limited Warranty

OUR QUALITY COMMITMENT...a tradition since 1907.

What is Covered

Kirsch is proud to extend a lifetime limited warranty on all Kirsch Drapery Hardware products manufactured after July 1, 1995 using all Kirsch components.

Who is Covered

This Warranty extends to the original residential retail purchaser.

What is not Covered

This Warranty does not cover normal wear and tear or any damage or loss caused by accidents; alterations; misuse; abuse or extraordinary use; exposure to salt air; insect damage; improper installation; cleaning or other maintenance. Warranties shall cease to be in effect if product has been moved from its original place of installation. All fabrics and woods will gradually lose color intensity after long exposure to the sun. This color loss is not covered by the Warranty. When left for extended periods in direct sunlight, plastics tend to yellow or crack. All cords will eventually wear out. Kirsch considers these things normal wear and tear not covered by this Warranty. Warranties do not cover removal, installation, replacement or shipping costs.

For How Long

The Warranty coverage will be for as long as the original retail purchaser owns the product. Any implied warranties are limited in duration to the time during which the original retail purchaser owns the product. Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

What We Will Do To Correct Defects

If a Kirsch product is found to be defective during the warranty period, we will at our discretion, either repair or replace, without charge, the defective product. Discontinued items will be replaced with the closest equivalent current product.

No Liability for Incidental or Consequential Damages

Repair or replacement of defective products is the sole remedy under this warranty and in no event shall Kirsch be liable for costs to remove, transport, or reinstall the product, or incidental or consequential damages. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

Your Rights Under State Law

This Warranty gives you specific legal rights, and you may also have other rights which may vary from state to state.

How to Get Service

To obtain service under this Warranty, return the product along with the original sales receipt to the dealer from which it was purchased. You will be responsible for transporting the product to and from the dealer.

NOTE:
 Maximum width for assembled sets is 16 feet. This rod cannot be spliced.
 Minimum width for assembled set is 3 feet. **ROD MANUFACTURED TO SPECIFIED WIDTH DIMENSIONS CANNOT BE CUT DOWN AFTER PRODUCED.**
 Assembled sets do not come with finials; they must be purchased separately.
 Finials may be selected from the Buckingham®, Designer Metals® or 2" Wood Trends® collection.
 For Pinch-Pleated or Ripplefold draperies only.
 Set includes 3 rings per foot, for additional rings/slides see pricelist.

ORDER INFORMATION:
 Use order form in Appendix on page 164. Give the following information:
Rods: Quantity, part number, length, draw (one or two-way), cord location (standard on right) and cord drop (8' is standard).
Brackets: Wall or ceiling mount (end caps only).
If Ripplefold: Fullness (60%, 80%, 100% or 120%) and master carrier type (overlap or buttmaster).
 Any additional rings must be ordered at time of purchase.

NOTE:
 Buckingham is custom order only. Returns not accepted. For finial dimensions, see Appendix page 124.

Quick Tips | 1³/₈" Traverse Rods

- Heavy-gauge steel rods made to precise tolerances.
- Baked enamel or plated finishes.
- Finials, rings, slides and brackets finished to coordinate with rods.
- Concealed prong brackets. Fast and easy installation.
- Concealed supports secure either outside or inside rod section.
- Cord tension device keeps cords accessible and out of sight.
- Long-wearing, stretch-resistant 2.88mm high tenacity polyester cord. Continuous lacing to use at either end or convert to one-way draw.
- Warranted for unquestionable satisfaction.

NOTE:

‡ Maximum rod width allows 4 rings/slides per foot.
 † Venetian Bronze uses Black Bronze pole with Venetian Bronze rings.
 * Rings will be Black Bronze which color matches to the base color of Dark Oiled Bronze or Oil-Rubbed Bronze.
 Finial plug kit included with rods; connects finial to rod.

Quick Tips | How To Cut

To cut Wrought Iron we recommend using a fine toothed, carbide tip saw blade. Cover the area of the Wrought Iron pole to be cut with blue painter's tape to protect the finish. An alternate cutting method is to use a small pipe and tubing cutter that can accommodate a 1" pole. After the pole is cut, remove the remnants of the tape. Insert finial plugs and continue installation as usual. To join two Wrought Iron poles together use the internal splice. Always place a bracket over the seam between two poles.

NOTE:
For finial dimensions, see Appendix page 124. For bracket dimensions, see Appendix page 125.

WROUGHT IRON

Quick Tips | Creating wide widths for baton drawn treatments

C-Rings have a space in the ring that allows the rings to be drawn across the Kirsch® Center Bypass Bracket. The Wrought Iron Baton is a decorative accent that can be used for opening and closing draperies. The baton is 36" from end to end and is attached to a C-Ring, which can be used as a leading guide ring.

NOTE:

For finial dimensions, see Appendix page 124. For bracket dimensions, see Appendix page 125.

Bristol finial with clip rings,
brackets and pole in Coffee

	Wood Trends Assembled Set with NEW wheeled Ripplefold™ Carriers	95676083 Mahogany	95676800 Sandblasted Black	95676841 Coffee	foot	27.55	60.60
		95676085 Walnut					
		95676820 Estate Oak	95676827 Hazelnut	95676894 Satin Gold	foot	30.40	66.90

NOTE:

Maximum width for assembled sets is 16 feet. This rod cannot be spliced.
 Minimum width for assembled set is 3 feet. **ROD MANUFACTURED TO SPECIFIED WIDTH DIMENSIONS CANNOT BE CUT DOWN AFTER PRODUCED.**
 Assembled sets do not come with finials; they must be purchased separately.
 Finials may be selected from the Buckingham®, Designer Metals® or 2" Wood Trends® collection.
 For Pinch-Pleated or Ripplefold draperies only.
 Set includes 3 rings per foot, for additional rings/slides see pricelist.

ORDER INFORMATION:

Use order form in Appendix on page 164. Give the following information:
Rods: Quantity, part number, length, draw (one or two-way), cord location (standard on right) and cord drop (8' is standard).
Brackets: Wall or ceiling mount (end caps only).
If Ripplefold: Fullness (60%, 80%, 100% or 120%) and master carrier type (overlap or buttmaster).
 Any additional rings must be ordered at time of purchase.

WHITE TRAVERSE

Quick Tips | Change a One-Way Rod to a Two-Way Rod

- A. Lay rod face down. Pull sections apart. Free cord from right master; slide it off; discard.
- B. Cord and stack right. Move master arm in remaining master to right screw hole; slide off. Move all slides to outside (large) rod section. Replace master; rejoin rod.
- C. Cord and stack left. Untie cord on left; remove cord guide. Restring cord; re-knot. Untie cord on right and pull down between wheels on right. Add guide; restring and re-knot. Change screw in master, reverse arm; slide off. Move all slides to inside (small) rod section. Replace master; rejoin rod.

NOTE:
For stackback information see page 129. For weight limitations, see Appendix page 126.

Quick Tips | Special Applications

STACKABLE SHIMS
Use to build out blind and shade brackets so that they clear trim, window handles, etc.

CUP HOOK TIEBACKS
Use with cup hook to hold return from blowing.

CONCEALED TIEBACKS
Use concealed tieback holders to prevent drapery from being crushed.

*Maximum track lengths and maximum fabric weight do not apply to curved track. Check with customer service for feasibility. Send complete specifications and fabric weight.
 **Maximum length on one-way draw is 16 feet. Bends: approximately 8" or 12" radius. Curve Radius: 48" or larger.

Quick Tips

Quick Tips | Superfine® Traverse Rods

Simply the standard of the industry. Often imitated. Never equaled. Loaded with exclusives.

Patented angle 1½" profile allows headings to stand erect. Heavy-gauge, rollformed steel; and baked enamel finish inside and out provides strength, while ensuring smooth traversing. A Teflon®-based lubricant gives a slick smooth finish, ensuring easy traversing. Look for the Kirsch green stripe on the inside of the rod.

Drop-In

Push-In

Drop-In adjustable brackets for quick installation or Push-In adjustable brackets (available in bulk) for ceiling mount or minimal clearance applications.

Exclusive, patented supports have a positive locking feature for secure hold. (The opposing cams lock tighter as the rod is operated). The universal cam action means the support can attach to either the inside or outside rod section.

Masters are made of Celcon® for strength, flexibility and longer wear. Plain slides are self lubricating, and made from high density polyethylene with ultraviolet inhibitors to provide long life and resist wear. Right-hand master carrier arm is adjustable for easy conversion to one-way draw traverse.

Patented end gates are designed to allow extra slides to be added or removed quickly without removing the rod from the brackets.

Longwearing, stretch-resistant polyester cord can be placed at either end of the rod without complicated adjustment, or for an easy conversion from two-way to one-way draw. Continuous cord lacing with Cord Tension Device.

Quick Tips | 1⅜" Designer Metals™ Traverse Rods

- All single tone finishes feature color coordinated finials, poles/rods, rings, brackets and slides.
- 1⅜" telescoping stationary poles: Also available in 1⅜" fixed width stationary poles, 1⅜" telescoping traverse rods and 2" fixed width traverse rods.
- New on-trend finishes coordinate with cabinet and door finishes offering whole home coordination.
- Bypass brackets, c-rings and wands allow for traversing of hand drawn draperies across any span.

Quick Tips | Utility Rods

Quick Tips

Quick Tips | Change a Two-way Rod to a One-way Rod

- A. Lay rod face down. Pull sections apart. Free cord from secondary master; slide it off; discard.
- B. Cord and stack right. Move master arm in remaining master to right screw hole; slide off. Move all slides to outside (large) rod section. Replace master; rejoin rod.
- C. Cord and stack left. Untie cord on left; remove cord guide. Restraining cord; re-knot. Untie cord on right and pull down between wheels on right. Add guide; restraining and re-knot. Change screw in master, reverse arm; slide off. Move all slides to inside (small) rod section. Replace master; rejoin rod.

Quick Tips | Empire™ Traverse Rods

Dependable operation. Value priced. Designed for light to medium weight draperies.

Streamlined 7/8" profile, with heavy-gauge, roll-formed steel; baked enamel finish for dependable, trouble-free operation.

Drop-In adjustable brackets for quick installation.

Supports consists of two sizes of stirrups –one for the outside rod section and one for the inside. Rods can be ceiling mounted by using holes in the pulley housing and supports.

Masters are made of Celcon for strength, flexibility and longer wear. Plain slides are self lubricating, and made from high density polyethylene with ultraviolet inhibitors to provide long life and resist wear. Right-hand master carrier arm is adjustable for easy conversion to one-way draw traverse.

Patented end gates are designed to allow extra slides to be added or removed quickly without removing the rod from the brackets.

QUICK TIPS

Quick Tips | Nite Holder

The Nite Holder curtain holdback may be folded up against wall or molding when not in use.

Quick Tips

Quick Tips | Cubicle Systems

Using Cubicle Suspension System

Cubical Curtains may be suspended from the ceiling to any height. Use ceiling flange (9623) on flat or angled ceiling; wall flange (9626) on wall. Secure track (9600) to tubing (9620) with sockets (9624).

Using Carrier Connectors

Carrier Connectors (9691) are easily installed on hooks.

Quick Tips | Stackback Calculations

Stackback is the amount of wall space needed if open panels are to clear the glass completely. This dimension, added to the window opening, gives you the proper rod length.

Begin by measuring the window opening, then consult the stackback chart. Find your opening measurement and read across the right rod length.

Stackback: Average pleating and medium weight fabric

Window Opening	Stackback*	Rod Length
24"	21"	45"
30"	23"	53"
36"	25"	61"
42"	26"	68"
48"	29"	77"
54"	30"	84"
60"	31"	91"
66"	32"	98"

Window Opening	Stackback*	Rod Length
72"	34"	106"
78"	36"	114"
84"	37"	121"
90"	38"	128"
96"	39"	135"
102"	42"	144"
108"	44"	152"
114"	45"	159"
120"	48"	168"

*Deduct 7" for one-way draw.

Wood Accessories

Several components are available for Kirsch Wood Poles.

Shown is the configuration of a plain wood pole (5501 Series), with connectors (5610E063) and elbows (5513 and 5517 Series), metal brackets (5623063) and center support (5618063, 5619063 and 5620E Series). All screws are included.

kirsch Architrac®/Cut-to-Measure Order Form

Invoice _____
 Customer Code _____
 Page Number _____

IMPORTANT: PLEASE READ BEFORE PLACING ORDER.

- Dimensions are shown from top view of rod.
 - Illustrations are of various wall designs.
 - Select the design that fits your room.
 - Provide all the measurements requested.
 - Indicate degree measurements of all angles (protractor, order SP2)
- The definition of return is the distance from the wall to the front side of the rod.
- On double rod sets, provide return measurements for both rods.
- For styles other than those shown below, you must provide a drawing with necessary measurements plus a full size pattern of the wall area to which the rod is to be mounted. Be sure to locate each end of the rod on your pattern. Give style track and set number.

Unless stated, measurements given are wall measurements and the factory will make allowances.
