Contract Customer Service

The Levolor Contract Customer Service Department is open between the hours of 8:00AM and 7:00PM Eastern Standard Time. Our customer service representatives will be happy to assist you with information, quotes, and orders for the following contract metal products.

- Levolor Brand Metal Horizontal Blinds
- Levolor Brand Specialty Metal Horizontal Blinds

Please note, Levolor wood blinds, NuWood™, faux wood blinds, and verticals (LXT2000 and Zirlon models) are available for contract quotes.

To contact Levolor Contract Customer Service:

Call (800) 826-8021

Fax (800) 624-0029

Orders can be mailed to:

Levolor Kirsch Window Fashions Customer Service

4110 Premier Drive

High Point, NC 27265

Quotations

Who Can Get A Quotation?

Anyone with a valid Levolor Kirsch Account number.

How To Request A Quotation And How To Place An Order

To ensure correct quoting and ordering, please use the Levolor Contract Order Form to place all orders. Please have the following information available when requesting a quotation or placing an order by telephone, or include it on your Levolor Contract Order Form with your faxed or mailed-in orders:

- Account number
- Purchase order number and/or quotation number (must provide)
- Sold-to address, ship-to address
- Zip code (most important)
- Name of person calling/ordering
- Product (type of window covering)
- Quantity
- Description
- Width
- Length
- Color number and color name
- Control positions
- Special product options e.g., Top-Loks, Tiltone colors
- Special packaging instructions
- Inside or outside mount

How Fast Can I Get A Quotation?

Standard Metal Horizontal Blinds, Wood/Faux Wood Blinds, and Vertical Blinds:

- Phone request: Instant response
- Fax request: Within 24 hours

Specialty Products: Special shapes and sizes (a template may be required)

- Phone or fax requests: Some products can be quoted instantly. If engineering or manufacturing approval is required, we will make every attempt to respond within 24 hours.

Customer Service Policies

Addendum To An Order

All quotations expire 90 days from the original date of quotation.

If you place your order prior to the expiration date of the quotation and then need additional blinds after the order ships, you may order up to 10% of your original order at the same square-foot price plus a 15% surcharge. An addendum order must be placed within 120 days of the original shipment. You must provide the original Levolor Contract order number when placing your order for the addendum.

Air Shipments

Air shipments are at the customer's expense. Requests MUST be in writing to the Levolor Contract Customer Service Department.

Bracket Pre-Shipment

Many contract customers request pre-shipment of brackets so they can begin installation while the blinds are in production. This saves not only time, but also is a much easier installation when blinds arrive. Preshipment of the brackets can be requested by noting on your Levolor Contract order form.

Changes And Cancellations

It is extremely important that each order be checked for accuracy before placing it with Levolor Contract Customer Service. Changes and cancellations will not be accepted after 24 hours from receipt of order. All changes and cancellations MUST be in writing to Levolor Contract Customer Service. A phone call to the Customer Service Representative will get the process started, but your change or cancellation must be confirmed in writing. Once an order is on the production floor, no changes can be made.

Contract Order Forms

Levolor Contract Order Forms are available for horizontal blind orders. Using this form to fax or mail in your order will allow us to process your order quickly and accurately. You may request copies of the Contract Order Form from Levolor Contract Customer Service or through your Levolor sales representative. See back cover for a copy.

Orders not submitted on the Levolor Contract Order Form may be delayed in processing.

Custom Order Blinds

• Horizontals:

Levolor Contract offers a custom color option for metal blinds, whether it is a competitor's color, a discontinued Levolor color, or to match another building color. There is a one-time set up charge of \$250 for each custom color. The minimum requirements for a custom-color quote are:

- 36,000 linear feet of slat
- 2,000 linear feet of headrail and bottomrail

Custom color installation brackets are supplied; however, standard color cord, ladder and other components are used. We require you choose a standard color cord and ladder before producing a mock-up blind for approval. We will paint all materials one time even if split-shipments are requested. Addendums for custom color orders will be filled with any existing material left over from the original run at the regular addendum price. If there is no custom color material left over the addendum price will include the minimum 36,000 linear feet of slat. Please make sure all

windows are measured and extra stock is submitted with the original order so you can avoid this additional

Customer Service Policies (continued)

expense.

Damaged Or Missing Blinds

Do not refuse a damaged shipment – accept it regardless of the condition, but sign for it as damaged. If you receive the shipment as damaged we can enter the remake at a charge and credit the damaged blinds.

If blinds are damaged in transit, but some of the shipment is received intact, you must still sign "damaged" on the trucker's document so we can file a claim with the carrier. Keep the damaged blinds in their original boxes, packing material intact, separate for investigation by the trucking company. Then call Levolor Contract Customer Service to explain your problem and order blinds to replace those that are damaged.

On missing blinds, you must count the packages received before signing the trucker's receipt. Then call Levolor Contract Customer Service to receive a no-charge replacement for the missing blinds.

If the receipt is signed "complete" we have no way of placing a claim with the carrier for the missing blinds.

PLEASE make sure you count your packages before signing. All claims for damaged blinds MUST be reported within 14 days from the original shipment date in order to file a claim with the carrier.

Before sending installers to a remote job site, please check for missing blinds, parts or brackets to avoid unnecessary trip charges. If you encounter concealed damage, call Levolor Contract Customer Service for further instructions. See page 8 for concealed damage policy.

Defective Blinds At The Job Site

If you find that you have several defective blinds when the installation is taking place, call the Levolor Contract Customer Service Department and notify them of the problem. If it is a Levolor Kirsch error, we may ask you to return one blind to us for inspection.

We realize you want to finish your installation and we will accommodate you by ordering additional blinds, at a charge, to be credited when the defective blinds are returned. If the entire order is defective the following steps will be taken:

1. A Levolor sales representative in your area will inspect the blinds at the job site.
2. We will then determine if repairs will be made by Levolor personnel or by the customer. For customer repairs, you will be advised of the pre-approved credit allowable. Levolor Contract Customer Service must give an approval of the exact amount before the actual work takes place.

NOTE: ALL DEFECTIVE BLINDS MUST BE REPORTED WITHIN 90 DAYS FROM THE ORIGINAL SHIPMENT DATE.

Discontinued Colors, Fabrics, Or Products

Inventory is usually available up to 45 days from the date the color, fabric or product was discontinued. However, if the inventory has been depleted prior to 45 days, no other inventory will be painted or procured. If you want to order a discontinued color, fabric or product and there is no material available, that color or fabric is then considered a custom finish (see Custom Order Blinds).

Factory Deductions

Levolor Kirsch will take standard factory deductions on all horizontal blinds unless otherwise indicated on your order. Please reference page 37 for standard deductions

If you write "exact size" on your order no deductions will be taken. Be aware that no deductions (even for brackets)

Customer Service Policies (continued)

will be taken if you write this on your order.

Missing Parts Policy

When you call in a missing parts order, you must have the Levolor order number. Missing parts orders are usually shipped within 48 hours from when you place the order. Levolor will "second day air" the missing parts ONLY upon request. ALL MISSING PARTS MUST BE REPORTED WITHIN 90 DAYS FROM THE ORIGINAL DATE OF SHIPMENT.

Oversize / Undersize Blinds

Although we do not recommend oversize or undersize blinds, we will try to accommodate your request if it does not present a safety hazard or does not impede the function of the product. You will be asked to sign a warranty waiver on any blinds produced outside our recommended parameters.

Contact Levolor Contract Customer Service or your sales representative for specifics.

Repairs

See *Return Authorization*. Repairs are usually shipped out in 7-10 working days.

Repricing

At the time of your quotation we realize that you may not have the exact sizes for a project, which could result in a change to your price once final measurements are made. For this reason we do have a repricing policy.

If your order does not match your quote, it is repriced and the new price is faxed to you with an order confirmation sheet. The new pricing must be reviewed, approved and signed before the blinds are entered as an order and put into production. Delay in the return of this confirmation will result in a delay in production. We cannot be responsible for price differences you have approved.

Return Authorization

No blinds will be accepted at any plant without a Return Authorization (RA) Number from Levolor. This number can be obtained from the Levolor Contract Customer Service Department.

If the problem is a Levolor Kirsch error, a call tag will be issued at no charge to you. Our carrier will pick up the blinds, deliver to the plant for repair, and then ship them back to you. If the problem is a customer error, we will repair the blinds but you will be charged for the repair and for the freight.

Rush Programs

72-HOUR RUSH:

It is EXTREMELY difficult to process 72-hour rushes for contract orders, often due to the order quantity, but we will make every attempt to accommodate you.

A call to Levolor Contract Customer Service starts the process. The CSR first must check inventory and get a commitment from manufacturing. A confirmation from you, in writing, approving the rush charges will be necessary before an order will be processed. Twenty-five (25) blinds or less can be processed as a 72-hour rush, provided we have the material, the plant's commitment, and after CREDIT APPROVAL. The surcharge is \$10 per unit for metal horizontals and \$20 per unit for woods.

5-DAY RUSH:

Five-day rushes are more common for larger orders, but the process is the same for 72-hour rushes. The

Customer Service Policies (continued)

surcharge is \$10 per unit for metal horizontals and \$20 per unit for woods.

Split Shipments

When you receive a quotation from Levolor Contract, it is based on "one lot shipment to one destination." Circumstances may require that the order be placed and shipped in "split shipments."

When you must accommodate your customer by requesting a split shipment, the following procedures are required:

1. Split Shipment requests should be directed to your Levolor sales representative. Please provide the Project Name, number and size of shipments or parts requested, and estimated completion dates.
2. Split Shipment orders must match the quantity and sizes of the original quotation. Size deviations will require a revised quotation.
3. All blinds must be ordered within 6 months of the first order date.
4. Quotations must be split based on the following guidelines:
 - a. 500 blinds or less: all orders must be a minimum of 50 blinds
 - b. 501 to 1,000 blinds: all orders must be a minimum of 100 blinds
 - c. 1,001 blinds or more: all orders must be a minimum of 250 blinds
5. You must send in the first order with the quotation number noted on it so the order is priced correctly. Mark the order "Part 1 of (number of parts)."

Trip Charges

Please contact your Levolor sales representative for trip charge approval. Please provide the sales representative with the order number, information on the reason for the trip and the estimated amount of the trip charge. If you submit a trip charge WITHOUT PRIOR APPROVAL, it will be denied.

Waivers

When we produce a blind outside of our standard manufacturing parameters, we do ask you to sign a waiver, which will be provided at the time you place the order. This waiver voids any warranty on that blind. Any waiver requirements will be noted on your quote.

Concealed Shortages and/or Damages

Defective or missing product claims must be submitted within 90 days from receipt of original shipment. Claims submitted after 90 days may be denied. Claims received after 180 days will not be accepted. Submit claims by fax to Levolor Contract Customer Service at 800-624-0029.

Warranties

Metal Blinds

The following warranty terms apply:

- All Levolor Riviera®, Mark I and Monaco® 6 Blinds – Limited Lifetime Warranty

Levolor will repair or replace, without charge, any part found defective in workmanship or material, exclusive of labor, for the term of the product warranty as long as the blind remains in the same window for which it was purchased. This warranty applies only to manually operated, horizontal aluminum blinds (excluding blinds manufactured under a warranty waiver). It does not, however, cover damage caused by cleaning methods that utilize abrasive solutions or ultrasonic equipment. It does not cover damage caused by misuse, abuse, direct exposure to salty air, chemical fumes, extremes in humidity or the color change that will take place with the passage of time.

Contract Quote Terms & Conditions

a) Quote Expiration Date

90 days from date of original quotation.

b) Quote Extension

Must be approved by your Levolor sales representative.

c) Inspection & Acceptance Policy

Claims must be made within 90 days from the date the original shipment took place.

d) Lot Shipment

All quotations are based upon a single lot shipment. Any special services such as storage, advanced or partial shipments, or movement of Levolor material beyond the point where a common carrier can execute delivery will be at customer's expense. Subsequent requests which vary from this, when a purchase order is placed to and accepted by Levolor Contract, may result in additional charges. Such additional charges and terms for split shipments must be agreed to in writing prior to the original actual shipment and will be clearly stated on the customer's purchase order followed by a revised quotation being issued including the stated shipment terms.

e) Quote Size and Deviation Adjustment

The original purchase order must reference the original contract quotation number, quotation date, the total number of blinds, the sizes involved and the quoted price. Any deviations outlined in the purchase order, e.g. blind quantities, sizes and/or colors quoted which change the quoted dollar amount by more than one-half percent (0.5%) will require a new quotation.

f) Fill-In Order (Addendum) Policy

All quotations expire 90 days from the original quotation date. If you place an order prior to the quote expiration date and then need additional blinds after the order ships, the following applies:

- You may order up to 10% of the original order in the same color as the quotation
- The addendum order is priced at the same square foot price as the original quotation, plus a 15% surcharge
- Addendum orders must be placed within 90 days of the original shipment
- The original Levolor order number is required to place the addendum order
- Undersize or oversize blinds will be priced with the respective upcharge, as well as the 15% surcharge

g) Other Terms & Conditions

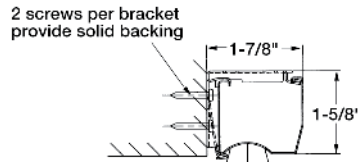

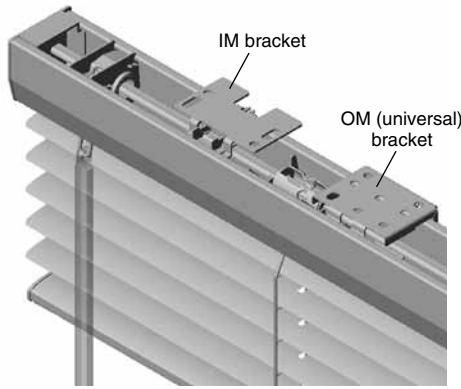

All purchase orders are subject to the terms and conditions set out on the reverse side of the quotation form. Levolor Contract hereby rejects any disclaimer of said terms and conditions. Any terms submitted by the customer which attempt to vary or modify said terms is rejected, void and of no effect.

Metal Blinds

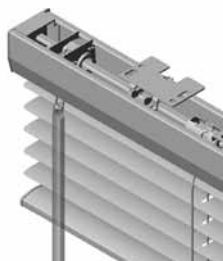

Features and Options

All Steel Components

High quality, dependable components ensure ease of operation and durability.

Clear, Hex-shaped Wand, S-hook & Sleeve/Star Wand

Easy grip and quality appearance.

Clear, Snap-on Wand

Resistant to yellowing from sunlight exposure. Snap-on design guarantees easy installation.

Concealed Installation Brackets

Brackets are hidden when blind is installed, providing a clean finished look.

Control Positions

Choice of control positions is available. Tilter left, lift cord right is the standard position. You can choose to reverse the standard position or group the controls on one side.

Tilter Left,
Lift Cord Right

Tilter Right,
Lift Cord Left

Tilter Right,
Lift Cord Right

Tilter Left,
Lift Cord Left

Cordless

Refers to patented technology that allows for easy operation of the blind without using cords to raise and lower; child and pet safe; motor mechanism and cord take up are centered in the headrail and are one piece for dependability.

Crash-Proof Cordlock

Safety feature that holds the blind securely at any level and prevents the blind from crashing to the sill while raising or lowering.

Cutouts

Allows access to air conditioners, window cranks, etc. Center and side cutouts are available. A diagram is required.

DustGuard®

DustGuard is an exclusive paint process that reduces dust build-up on blinds by over 50%. By "disrupting" the static on the blind's aluminum surface, DustGuard actually resists airborne dust particles. DustGuard is totally safe and permanent. Since it is an integral part of the surface, it lasts for the life of the blind.

Enclosed Cushion Bottomrail

A color coordinated vinyl cushion covering the entire width of the blind protects the window sill from scratches and chips.

Extension Brackets (Must be requested at time of order.)

For installations requiring additional space between the blind and the mounting surface. Not available with hold-down brackets.

Guardian Tilter

Provides tighter closure and disengages when over-rotated to safeguard against breakage while providing smooth operation and better quality.

Heavy Duty Headrail

Manufactured of "hardened steel," guaranteed not to rust or corrode.

Hold-down Brackets (Must be requested at time of order.)

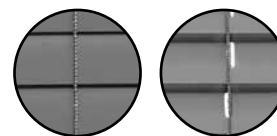

Hold-down brackets prevent blinds from swaying. They can be sill mounted, face mounted or mounted inside the frame. Recommended for doors and in windows subject to wind exposure. Not available with extension brackets.

Integrated Valance/Valance Free Design

Sculpted design reduces light leakage and creates a uniform and tailored appearance. Eliminates the need for an additional valance.

LightMaster™

Pull-cord holes are positioned near the back of the slat to provide more light control.

LightMaster™

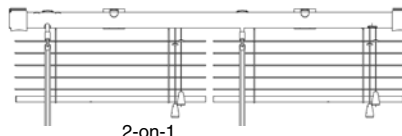

Standard

Multi-color Striping

Striping allows you to add more color to the room decor as well as match geometric designs on walls. Identify color positions of slats with a sketch. Also, specify the color of components (consider "white" for ladder and cord for uniform appearance).

Multiple Blinds on One Headrail

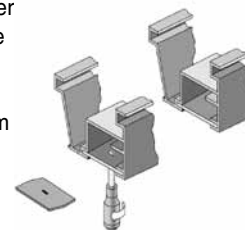

Specialty blind allowing the customer to operate 2 or 3 independent shades on one headrail. Provides the flexibility of raising one blind while keeping the other lowered on extra wide windows, such as patio doors. Standard spacing is 1/2" between blinds.

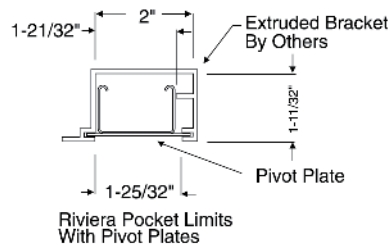

2-on-1

Pivot Plates

Levolor pivot plates are specifically designed to be used with extruded aluminum mullion with pockets. Pivot plates eliminate the need to drill and screw into the aluminum mullion. Shown here is a typical mullion incorporating a slot on either side for the pivot plate. The headrail of the blind is installed into the recessed mullion cavity. Then, the plate is turned into place with a screwdriver. Pivot plates are custom sized based on customer mullion dimensions.

Pivot Plate Detail:

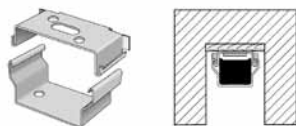

Metal Blinds

Features and Options (continued)

Pocket Brackets

A typical pocket installation may require Levolor pocket brackets. The standard pocket bracket can be installed in two steps: the upper section is first secured in the top of the pocket; then, the flanges on the lower section are snapped over those on the upper section. This secures the headrail in place. The top of the pocket must be sturdy enough to support the weight of the blind and the pull forces applied to it.

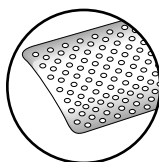

Restrictive Tilter

The Restrictive Tilter limits the range of angles the slat will tilt, ensures adequate window ventilation and reduces heat build-up. Maintains a uniform building exterior when using tiltone colors. See chart at right for available options. Not available with LightMaster™.

SheerView

SheerView provides the ability to see through a closed blind and delivers up to a 42% reduction in solar heat as compared to a fully opened blind. SheerView is available in 5 colors, 6% openness. SheerView cannot be ordered with LightMaster option.

Standard Valance

Standard valances are a simple and economical way to cover the headrail and brackets. Two slats are attached onto the headrail with plastic clips.

Tiltone

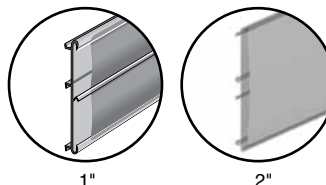

Tiltone blinds allow you to bring one color to the interior of your room while providing a uniform, neutral appearance on the exterior of your home. Plus, Tiltone offers additional energy savings. Indicate which side of the slat and ladder is to be covered by marking the appropriate box on the order form. Unless otherwise specified, factory will place neutral white of ladder towards window side of blind and will match color of headrail and bottomrail to decor color on slat.

Top-Lok® Cord Lock/Ring Pull

Top-Lok holds the blind in a completely raised or lowered position, thus ensuring a uniform building exterior. Also, when the blinds are fully raised there is no cord accumulation on the floor. Optional ring pulls are recommended when ordering Top-Lok Cord Lock. Ring pulls hang 3" (±0.5") below the headrail and are an additional charge. Top-Lok is especially useful for installations where the headrail is equal to or greater than eight feet from the floor. Top-Lok also keeps unauthorized personnel from raising or lowering blinds. Authorized personnel may adjust the blinds by hooking an ordinary window pole onto the ring at the end of the lift cord (pole not included).

Vogue® Round Wrap Valance

Innovative valance provides a sleek, finished look for the window. Two slat valance for the Riviera® ½" and 1" blinds and a one slat valance for the Riviera® 2" blinds. The Vogue Round Wrap Valance is available in Riviera 1" models and Riviera 2".

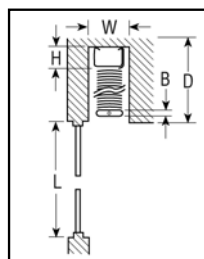

Restrictive tilter options:

option number	performance

Metal Blinds

How to Measure / Minimum Mounting Depth

Inside Mount (IM) Installation

To find width: Measure exact distance to the nearest $\frac{1}{8}$ " between inside surfaces of window frame at the top, middle, and bottom, and use the narrowest width. Do not make any width deductions. Factory will make appropriate deductions.

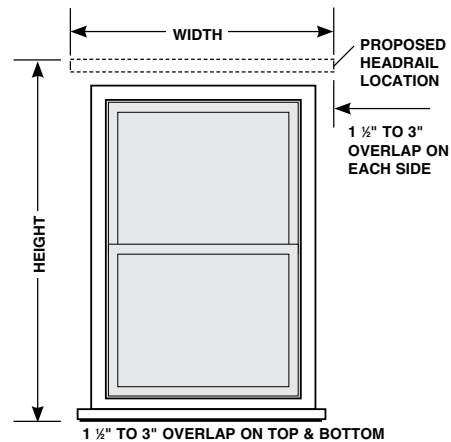

To find height: Measure exact distance to the nearest $\frac{1}{8}$ " from inside surface at top of window to sill at the left, middle and right and use the longest height. If you prefer blind not to touch sill, deduct $\frac{1}{4}$ ". If there is no sill, measure height to the point where the shade reaches.

Outside Mount (OM) Installation

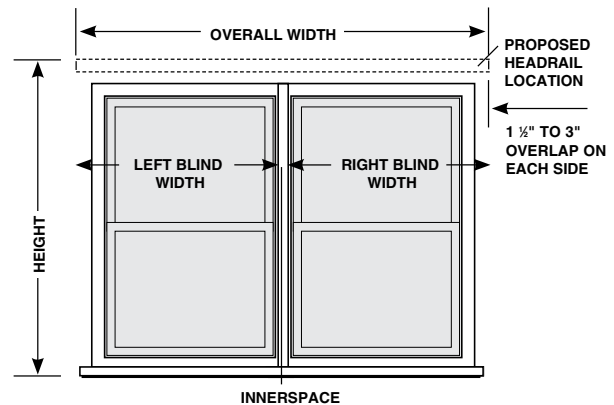

To find width: Measure exact distance to the nearest $\frac{1}{8}$ " between the outermost points where the blind is to be placed. For optimal light control, this measurement should extend $\frac{3}{4}$ " beyond the window opening on each side (or $1\frac{1}{2}$ " for the entire width).

To find height: Measure exact distance to the nearest $\frac{1}{8}$ " from where top of the blind will be located to the top of sill. If there is no sill or if blind is to overlap window frame, measure to the point the shade reaches.

2-on-1 and 3-on-1 Headrail

1. Measure overall width of the area to be covered.
2. Measure width of the area each blind is to cover. Measure and specify the left shade first, continuing to the right. **Factory will allow a minimum of $\frac{1}{2}$ " between shades for operating clearance.**
3. The total width of all shades must equal the total headrail width. If ordering a valance wider than the blind, a diagram is required.
4. To measure height, use standard inside or outside measuring procedures.

Care Instructions

To keep your Levolor® Metal Blind looking its best, periodically wipe it with a soft dust cloth, a dusting mitt, or a round brush attachment from a vacuum cleaner.

- You can clean the blind hanging in place or you can take it down.
- By tilting the slats down, but not quite closed, you'll be able to clean most of the top surface of each slat.

In a very dusty environment, just clean the blind using a sponge or dampened soft cloth.

- Use warm (not hot) water and mild detergent. The mild detergent cannot contain abrasives.
- Rinse the blind with clean water to prevent water spots.
- Place a towel on the floor or window sill to absorb any water that drips from the blind.

equipment are too harsh and can cause shrinkage and/or color damage to your blind. The Levolor® Lifetime-Limited Warranty does not cover damage caused by cleaning methods that use abrasive solutions or by ultrasonic cleaning machines.

Please note that certain solutions and

Metal Blinds

How to Make a Template

The following instructions show how to make a template if the measuring instructions indicate that one is required for your window shape (Arch, Half-Arch, Circle, Oval, Polygon, or Curve blinds).

You will need the following tools:

- | | |
|-------------------------------|-------------------|
| Craft or Butcher Paper | Masking Tape |
| Pencil and Grease | Measuring Tape |
| Pencil | Carpenter's Level |
| Sharp Knife | Mailing Tube |
| Scissors | |

A Tape the paper to the wall or window frame, stretching tightly to remove all folds and wrinkles. For Arch and Half-Arch blinds, cover the curved portion of the window. For Circle, Oval, or Polygon blinds cover the entire window.

B For Arch and Half-Arch blinds, measure from the sill to the beginning of the curved portion of the blind on both sides. Write each measurement in the lower left and lower right sides of the template respectively.

C Measure from the sill to the top of the window opening and write this measurement on the top of the template.

D Using the carpenter's level, draw a level line from one side of the template to the other (horizontal direction).

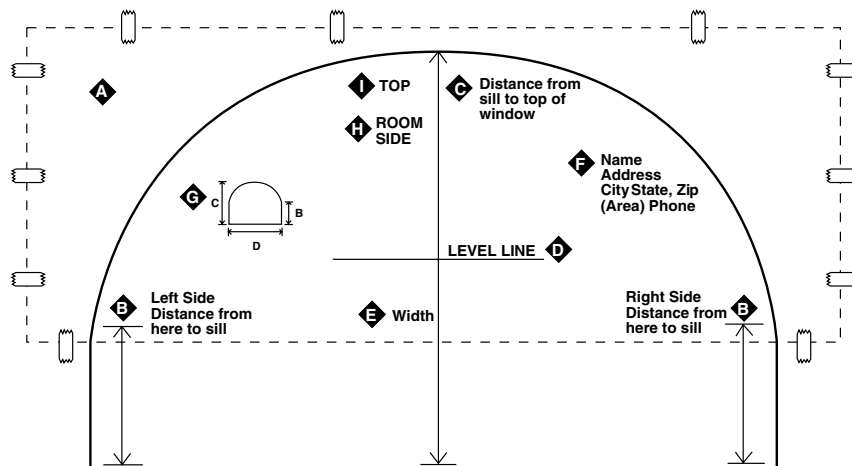

E Measure the width of the window in at least two places and write these measurements on the bottom of the template.

F Write your name, mailing address, and telephone number in the middle of the template.

G Draw a sketch of the blind in the center of the template and include dimensions on the sketch.

H Write the words ROOM SIDE in the middle of the template.

I Write the word TOP at the top of the template.

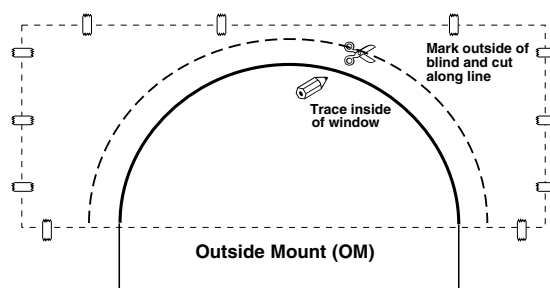

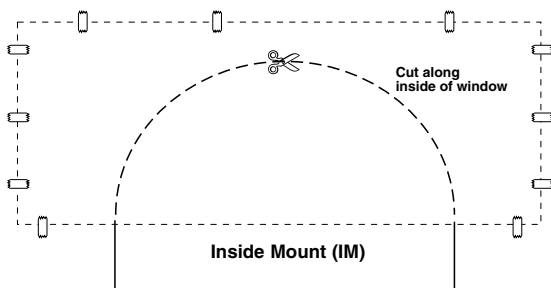

Inside Mount (IM)

For inside mount blind (IM) templates, carefully cut out the template with the sharp knife, leaving an uncut portion every 1 to 2 feet along the cut line. Finally, carefully cut the serrated pieces.

Outside Mount (OM)

For outside mount blind (OM) templates, carefully trace the outline of the window with the grease pencil, then draw in the outline of the blind as it will sit outside of the window outline. Cut the template with scissors along the outside line which the blind is to fit. Hold up the finished template to insure blind fits. Make any template size corrections at this time, or if corrections are not possible, make a new template. Roll the template (DO NOT FOLD) and send it in a mailing tube with the order.

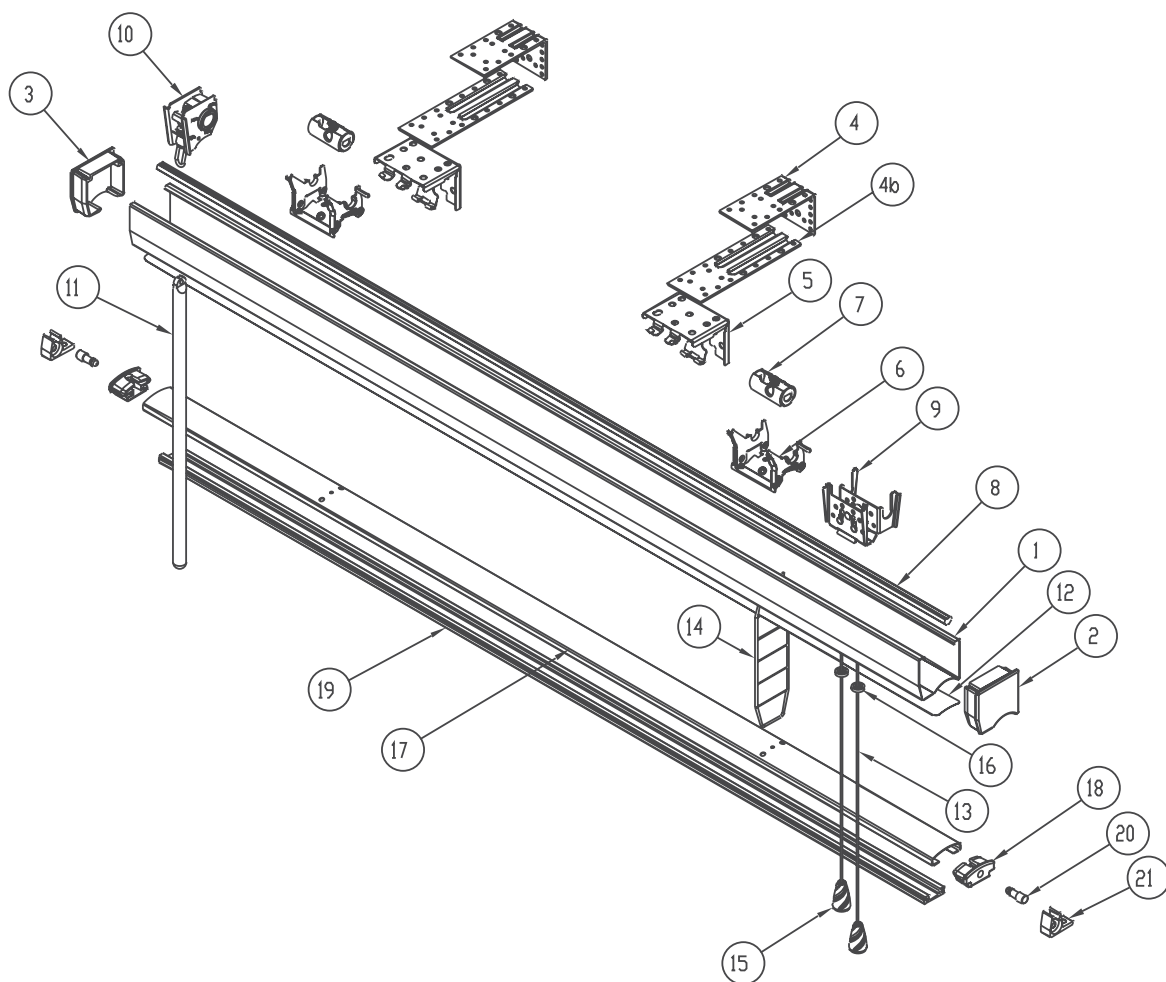

Specifications

NOTE: Blind dimensions must be equal to or less than the maximum dimensions to be within specification guidelines. **Blind dimensions are listed in inches.**

Terms and Conditions

Order Processing

Telephone Orders

Verbal orders are accepted as the dealer's responsibility. Each order will be repeated back by the Customer Service Representative. In certain instances, we may require written orders.

Duplicated Orders

All orders are confirmed after entry into our system. Customer Service is not responsible for duplicate orders caused by a written order following a telephone order or duplicate faxes.

Changes and Cancellations

All products are custom-made to your specifications under tight deadlines. Once production has begun on your order, changes and cancellations cannot be made.

Contract Orders

All Contract Orders must be processed through Contract Customer Service at 1-800-826-8021.

Freight

- Freight for custom blind orders within the continental U.S. will be prepaid. (Excludes Alaska and Hawaii)
- Shipments outside the continental U.S. are subject to freight charges.
- Chargeable parts and returns for repair are subject to freight charges.

Pricing and Terms

All prices are subject to change without notice. Until credit is approved, terms are cash with order. Standard terms are Net 30 days from invoice date.

Claims and Returns

Defective Merchandise

All manufacturing defects must be reported to Customer Service within 30 days of receipt of blinds. We may require the return of defective blinds prior to repair or replacement.

Incorrect Merchandise

If any part of your shipment was made incorrectly, please advise Customer Service within 30 days. A replacement will be made at no charge if the problem was due to Levolor® error. If the problem was due to dealer or customer error, the original order and replacement order will be full charge.

Returns for Repair

Prior to return for repair, contact Customer Service. We will request the order number, date, purchase order number, and type of product. Arrangements for return will be made at that time with directions as to how the blinds should be returned. The package should be marked for easy identification both inside and outside, and should contain a written confirmation of the verbal repair instructions. Repairs should be packaged carefully. Product that has been mishandled or received in poor condition will be returned to the customer.

Chargebacks for unauthorized repairs or additional installation cannot be honored. All returns for repair are subject to freight charges.

Returns for Credit

Returns can be accepted only if prior authorization has been obtained from Customer Service. Authorization will include instructions as to how the merchandise should be returned. Unauthorized returns will be refused.

Freight Damage FedEx /FedEx Ground/ Common Carrier:

If freight damage is visible, accept the freight, but sign for as damaged. Contact Customer Service immediately (must be notified within 14 days) for further information.

LIFETIME-LIMITED WARRANTY FOR CUSTOM PRODUCTS

Levolor® Window Fashions proudly extends a lifetime-limited warranty on the enclosed product to the original residential retail purchaser as long as the product remains in the original window.

<except for unfinished wood cornices, which have no warranty>.

WARRANTY COVERAGE

COVERED

Entire product against manufacturing defects (i.e., a flaw in the product design, materials or workmanship that causes the product to no longer function)

Except: Cords

- shipping

In the event there are multiple blinds/shades in the same room, only the defective blind/shade will be replaced.

TO REPORT SHIPPING DAMAGE

If damage occurred during shipping, call 1-800-538-6567 and report within 14 calendar days or else you may be denied credit for your damaged product.

TO OBTAIN SERVICE

For online product-specific troubleshooting information, refer to www.levolor.com.

If you suspect this Levolor® Window Fashions product has a manufacturing defect in materials or workmanship:

1. Locate the sales receipt (proof of purchase).
2. Call 1-800-538-6567.

Any unauthorized returns will not be accepted.

WARRANTY REMEDY

THIS SHALL BE YOUR SOLE REMEDY UNDER THIS LIMITED WARRANTY.

If this Levolor® Window Fashions product is found to have a manufacturing defect in materials or workmanship, we will (at our discretion) do one of the following:

- repair the product
- replace the product
- refund the cost of the product
- Colors vary from lot to lot and may not exactly match sample swatch or previous purchases.
- Discontinued items or color selections will be replaced with the closest equivalent current product.

YOUR RIGHTS UNDER STATE LAW

This lifetime-limited warranty gives you specific legal rights, and you may have other rights, which vary from state to state. Some states do not allow limitations on how long a warranty lasts, so the above limitations may not apply to you.

No agent, representative, dealer, or unauthorized employee has the authority to increase or alter the obligation of this warranty. This lifetime-limited warranty supersedes any previous versions.
