National Office Furniture - Warranty

National warrants that each piece of furniture will be free from defects in workmanship given normal use and care for as long as you, the original customer, owns and uses the product.

Normal use is defined as the equivalent of a single shift, 40 hour work week. In the event that a product is used more than normal use, the applicable warranty period will be reduced to 12 years and items that fall under different warranty limitations, as listed below, will be reduced to one-third (ex: Wood chair frames will be 4 years instead of 12 years). National, at its option, will repair or replace with comparable product any product, part or component shipped after September 1, 2000, if the claim is eligible under the conditions of this warranty. This warranty is valid only if the product is given proper care and maintenance.

Limitations

Twelve Years	Wood Chair Frames
Ten Years	Seating Controls, Wood Veneers and Laminates
Five Years	Mechanical and High Wear Parts Such As: Electrical Components, Polymer Based Components, Pneumatic Cylinders, Swivel Arm Pads, Casters, Chair Glides, Textiles, Foam, Covering Materials and Decorative Trim

Exclusions

This warranty does not apply to:

- Damage caused by a carrier
- Normal wear and tear which is to be expected during the period of ownership
- Appearance, durability, quality, behavior, colorfastness or any other attribute of COM (Customer's Own Materials) or any other non-standard National material (including Arc-Com, CF Stinson, Maharam, Momentum, and Ultrafabrics) specified by the customer after application to a National product
- Color, grain or texture of wood, laminate and other covering materials
- Non-compliance with installation and maintenance instructions
- Electrical grommets where the box has been opened
- Damages or failures resulting from modifications, alterations, misuse, abuse or negligence or improper care and maintenance of our products

NOTE: A protective glass top is not recommended on tops greater than 72". A single piece of glass should cover a multi-piece top. A glass addition has the potential to accentuate deflection. If glass is applied, this will require a special quote to investigate the support needed.

Gotcha™ 24 Hour Use Seating

Warranty on Gotcha 24 Hour Use models is 5 years from date of purchase for seating controls and pneumatic cylinders and 2 years from date of purchase for casters, textiles and foam.

Finish Warranty

Minor variations in finish color may occur due to the unique texture and grain of wood.

Follow these procedures to process warranty issues:

1. Contact National Customer Service (800.482.1717) and provide them with the serial number from the product in question and the purchase order number or acknowledgement number and a detailed description of the warranty issue. **Serial numbers are mandatory before the claim can be processed.**
2. Customer Service will determine and pre-approve all resolutions to the claim such as replacement units, service parts, labor and repair charges. Upon approval, resolutions will be assigned an authorization number.
3. The authorization number must be included on all invoices for reimbursement. Any unauthorized charges will not be the responsibility of National.

As the manufacturer of your furniture, we stand behind our craftsmanship and pledge to do everything we can to resolve any problems you may have within the terms of this warranty as quickly as possible.

There are no other warranties except as expressly set forth here, either expressed or implied including any warranty of merchantability or fitness for any particular purpose. We exclude and will not pay consequential or incidental damages under this warranty.

All the products produced by National are carefully inspected and properly cartoned prior to shipment. All shipments are delivered to the transportation company in good condition. If you receive a shipment that has damage, product shortage or delivery has been delayed by the transportation carrier, **the following steps must be taken:**

Sustainability Information

Our Statement on Sustainability

We aim to create lasting stakeholder value through responsible growth and deep commitment to the well-being of future generations. We cherish the Earth's natural resources and hold sustainability and environmental protection as our key priorities.

As our company fulfills its responsibilities to our customers, shareholders, employees and the public, six commitments provide a framework for focusing our energies toward the greatest good:

- Product Stewardship
- Environmental Preservation
- Green Building Development
- Regulatory Compliance
- Social Accountability
- Economic Responsibility

Our Products Reflect Stewardship

National is committed to providing quality products that will improve indoor air quality for the health of building occupants and visitors. Our products have achieved certification to the Indoor Advantage Gold label from Scientific Certification Systems (SCS) by meeting the BIFMA Furniture Emissions Standard (FES) for office furniture, and the California 01350 Special Environmental Requirements and Collaborative for High Performance Schools (CHPS).

In addition, virtually all National products carry the level® 2 or 3 label for meeting the far-reaching ANSI/BIFMA e3 Sustainability Standard. This standard addresses the areas of material and energy use, greenhouse gas impacts, human and eco-system health considerations, and social responsibility. Modeled after the LEED® building rating system, furniture products are evaluated against a variety of credit criteria (after first meeting certain prerequisites), accumulating points toward increasing levels of recognition associated with reduced environmental impact. Purchasing products certified to level® gives you the assurance that the product was produced in an environmentally and socially responsible manner.

National products that meet the above specifications are identified with corresponding logos throughout this price list.

In further support of our commitment to indoor air quality, National utilizes IntegraClear®, an environmentally-friendly, ultra-violet finish. IntegraClear® is a water-based, high-performance wood finish that meets or exceeds indoor air quality standards and is available on select products. This proprietary finish is virtually VOC-free, has remarkable durability and allows the natural beauty of veneers to show through.

National offers products that are not only economically viable, but are environmentally responsible and socially beneficial. An example of this is the option of Forest Stewardship Council (FSC) Certified wood (call for availability). Additionally, our casegoods include a recycled material content of at least 82 percent. A wide range of 100 percent recycled polyester choices are available for upholstered seating products while our casegoods packaging contains an average of 40 percent recycled content and our seating packaging contains an average of 37 percent recycled content. Our Corporate Recycling Center diverts over 4 million pounds of waste material per year from landfills by recycling 65 different types of materials.

What's more, National manufacturing facilities are registered to the ISO 14001 standard. This management tool enables us to identify and control the environmental impact of our operations, continually improve our company's environmental performance and systematically set environmental objectives and demonstrate their achievement.

We further support environmental improvements by shipping via our sister company, Kimball International Transit (KIT). KIT has earned certification in the SmartWaySM Transportation Partnership by the EPA. The SmartWaySM Transport Partnership is an innovative collaboration between the EPA and freight industry to increase energy efficiency while significantly reducing greenhouse gases and air pollution.

Growing With Green Buildings

National facilities testify to our belief in sustainable building practices. As a member of the U.S. Green Building Council (USGBC), we prioritize building practices that support the LEED® (Leadership in Energy and Environmental Design) Green Building Rating System.

General Information

Life Cycle Management Program

National offers a diverse collection of surface materials as well as a Life Cycle Management Program. This program includes our Discontinuation Policy to help make informed planning decisions.

Discontinuation Policy

National strives to give all business partners advanced notification of surface materials that are scheduled for deletion. Efforts will be made to support discontinued materials as specified in the deletion announcement. Extended lead times and minimum order requirements may apply. Pricing cannot be guaranteed.

Wood Finish Color Matching

Each piece of natural veneer offers unique texture and grain. Minor variations in finish color and value may occur due to the natural characteristics of wood. National carefully selects all materials used in every product ensuring a commercially acceptable color and finish. Factors such as aging and exposure to light alter finishes.

Fabric Color Matching

National will always ship a satisfactory commercial match on fabric. Because of industry dye-lot variation, colors may not match exactly.

Fabric Characteristics

Different fabrics/constructions will respond better than others to specific seating applications. Certain fabrics/constructions are more prone to relaxing over time and can demonstrate characteristics such as wrinkling, pilling, fuzzing and puddling. Some upholsteries may experience dye transfer (clothing dyes transfer to the seating fabric). This does not mean that the fabric or application is deficient, but rather it is an inherent characteristic of that fabric or application and is considered normal behavior.

Leather Characteristics

Leather is a natural product. Healed scars, scratches, cuts and stretch marks are natural markings and are characteristics of leather. Leather may experience dye transfer (clothing dyes transfer to the leather). This does not mean that the leather or application is deficient, but rather it is an inherent characteristic of that leather or application and is considered normal behavior.

Textile Application Guidelines

National has listed textile application guidelines for each seating series. These guidelines are intended to help educate you of certain fabric characteristics. **Please make a point to review these guidelines when ordering National seating with National fabrics.** Application of the upholstery will be depicted as on the swatch card unless otherwise instructed on the order.

Textile Appearance Guidelines

Please note that these guidelines are here to help you have the best looking product that National can provide to you. Guidelines 1–4 are simply explanations of what you may see on your chair. We can still upholster fabrics associated with these guidelines, but you may see some of the characteristics described.

- 1 Due to thickness and or stiffness this textile may result in gathers and puckers around corners, contours and certain seams.
- 2 Patterns are considered matched directional; however, decorative stitching, tufting/buttons, seams and seat to back on corner, wedge and diagonal units may not align due to pattern configuration.
- 3 Textile with high nylon or wool content (more than 50%) may show signs of material stretch and lack of rebound when room temperatures fluctuate.
- 4 Mohair, velvet and chenille may be easily bruised or have the potential of crooked seams due to the heavy nap and flip.

Textile Restriction Guidelines

Fabrics associated with guidelines 5 and 6 prevent us from upholstering the applicable chair series.

- 5 This textile cannot be used for glue application. Potential issues could include poor adhesion quality to the mating surface, separation of the fabric face from the backing or glue bleeding through the fabric.
- 6 Thin and/or loosely woven textiles cannot be used due to potential fabric separation at the seams.

Alliance Program Textiles

Alliance Program Overview

National has developed joint programs with Arc-Com, Maharam, Momentum, Stinson and Ultrafabrics to offer you quality office seating with exciting lines of designer upholsteries. This program enables you to issue just one purchase order, providing simplified ordering and the most convenient, yet complete, seating choices available from a single source. All Alliance patterns meet TB117-2013.

Fabric listing for “no added” fire retardant fabrics can be found at www.nationalofficefurniture.com

Application

Application of the Alliance Program upholstery will be depicted as on the memo sample or website. If a different application is desired the pattern will need to be custom quoted.

Directional upholstery, such as stripes, patterns, and plaids may not be suitable for chairs with contoured shapes, tufting, or decorative stitching. Every effort is made to upholster all chairs as expertly as possible; however such orders are not subject to return.

Fabric that requires non-stock special treatments such as flame proofing, anti-microbial treatment, electrical conductive backing, water repellent, stain repellent, or acrylic backing are not part of this program. Such orders should be specified as COM.

Lead Times/Availability

Models specified with Alliance Program fabrics will be acknowledged at standard lead times based on the supplier’s delivery schedule. Exceptions may occur when extended lead times apply. Each supplier reserves the right to discontinue patterns and colors. National will not be held responsible for suppliers discontinuing patterns/colors or when minimum order quantities apply. Contact customer service for availability before finalizing orders.

Warranty

Alliance Program fabrics are non-standard materials and are **not** covered under our warranty.

Pricing

Alliance Program graded pricing includes the cost of material. Repeat is also accounted for and no additional upcharge is required.

Fabric and Seating Construction

Different fabrics and seating constructions will respond better than others to specific seating applications. Certain fabric constructions are more prone to relaxing over time and may demonstrate characteristics such as wrinkling, pilling, fuzzing, or puddling. Some upholsteries may experience dye transfer (clothing dyes transfer to the seating fabric.) This does not indicate that the fabric or application is deficient, but rather it is an inherent characteristic of that fabric or application and is considered normal behavior.

TB133

California Technical Bulletin No. 133 – Flammability test procedure for seating furniture used in public occupancies. National provides pre-approval for TB133 chair/alliance fabric combinations. The availability of TB133 on specific chair/alliance fabric combinations can be found at www.NationalOfficeFurniture.com/alliance. Each of the graded-in listings denote TB133 applicability. Even though we try to keep this document as accurate as possible, the supplier may change contents, finishes, etc... without our knowledge. Customer needs to confirm that the information on this listing matches the content information from the Alliance partner. If no test data is available for a particular fabric/chair combination, the TB133 order will not be allowed. These pre-approved alliance fabrics can be ordered as standard product – no custom quote required.

To order seating to meeting the TB133 fire code, specify an “F” at the end of the model number (Ex: N59AAF).

If a fabric/chair combination has not been burn tested, the customer has the option of having it tested. Pricing for the testing will be \$1300 list, including shipping for testing services plus the chair price (test sample). TB133 testing requested by the customer will require a custom quote. The fabric/chair burn test results will determine whether future orders can be ordered as standard product or custom quotes. Each instance may vary.

TB133 alliance list pricing can be found on pages 568-635.

Letters of assurance are available upon request. A letter of assurance verifies that a TB133 test was conducted on a combination of chair/fabric comparable to the requested chair/fabric.

Ultrafabrics Alliance Program

National has developed a joint program with Ultrafabrics to offer you quality office seating with exciting lines of designer upholsteries.

The Alliance Program will include additional colors in patterns in National’s standard fabric offering, like Essence/Ultraleather™ and Brisa®, as well as new patterns like Primera and Ultraleather Pro. Reference www.NationalOfficeFurniture.com/Alliance for a complete pattern listing, as well as applicable grades and fabric guidelines.

Textile Appearance Guidelines

Please note that these guidelines are here to help you have the best looking product that National can provide to you. Guidelines 1–4 are simply explanations of what you may see on your chair. We can still upholster fabrics associated with these guidelines, but you may see some of the characteristics described.

- 1 Due to thickness and or stiffness this textile may result in gathers and puckers around corners, contours and certain seams.
- 2 Patterns are considered matched directional; however, decorative stitching, tufting/buttons, seams and seat to back on corner, wedge and diagonal units may not align due to pattern configuration.
- 3 Textile with high nylon or wool content (more than 50%) may show signs of material stretch and lack of rebound when room temperatures fluctuate.
- 4 Mohair, velvet and chenille may be easily bruised or have the potential of crooked seams due to the heavy nap and flip.

Textile Restriction Guidelines

Fabrics associated with guidelines 5 and 6 prevent us from upholstering the applicable chair series.

- 5 This textile cannot be used for glue application. Potential issues could include poor adhesion quality to the mating surface, separation of the fabric face from the backing or glue bleeding through the fabric.
- 6 Thin and/or loosely woven textiles cannot be used due to potential fabric separation at the seams.

Reference www.NationalOfficeFurniture.com/Alliance for the most up-to-date fabric guidelines, grades and additional pattern/color availability.

Textile Appearance Guidelines

Please note that these guidelines are here to help you have the best looking product that National can provide to you. Guidelines 1–4 are simply explanations of what you may see on your chair. We can still upholster fabrics associated with these guidelines, but you may see some of the characteristics described.

- 1 Due to thickness and or stiffness this textile may result in gathers and puckers around corners, contours and certain seams.
- 2 Patterns are considered matched directional; however, decorative stitching, tufting/buttons, seams and seat to back on corner, wedge and diagonal units may not align due to pattern configuration.
- 3 Textile with high nylon or wool content (more than 50%) may show signs of material stretch and lack of rebound when room temperatures fluctuate.
- 4 Mohair, velvet and chenille may be easily bruised or have the potential of crooked seams due to the heavy nap and flip.

Textile Restriction Guidelines

Fabrics associated with guidelines 5 and 6 prevent us from upholstering the applicable chair series.

- 5 This textile cannot be used for glue application. Potential issues could include poor adhesion quality to the mating surface, separation of the fabric face from the backing or glue bleeding through the fabric.
- 6 Thin and/or loosely woven textiles cannot be used due to potential fabric separation at the seams.

Reference www.NationalOfficeFurniture.com/COMApprovalSearch to search previously evaluated textiles.

COM (Customer's Own Material)

All seating can be upholstered with appropriate material furnished by the customer. All COM/COL must meet applicable codes and regulations, including TB117-2013. By selecting COM/COL, customer certifies that the material meets such codes. Customer is solely responsible for compliance and may contact a) fabric manufacturer to confirm certification or b) assistance from National. National Office Furniture strives to create upholstered products with no added fire retardants, when allowed. Written confirmation is required from the fabric or leather manufacturer stating that the COM/COL provided by customer does not contain any added fire retardant chemicals. Without adequate confirmation, National will assume the COM/COL contains fire retardant chemicals and will label the product accordingly. Prices are listed under grade 2.

Yardage requirements shown in this list are based on the use of non-directional fabric 54" wide and the fabric being cut "up the roll." If the COM fabric is to be railroaded, please contact customer service for revised yardage requirements.

- When ordering 10 or more COM chairs, consult customer service for exact yardage requirements.
- Reference pages 637-669 for specific repeat COM ydg. requirements.
- Directional covers, such as stripes, patterns and plaids may not meet your satisfaction due to contoured shapes and tufting of some models. Should you require such a selection, orders are not subject to return. If in doubt, contact customer service prior to placing the order.
- Please refer to textile application guidelines listed on p. 32 or the COM Approval Search on www.NationalOfficeFurniture.com when ordering a COM.

Customer's Own Leather (COL)

National is pleased to cooperate with COL selections whenever this special need arises. Customer's own leather specifications for National seating shown within this price list are based on an average hide size of 45-50 square feet. Consult customer service for requirements for other hide sizes. Customer is responsible for the leather meeting the appropriate California TB117 Standard. Prices are listed under grade 3.

- Please note, leather is a natural product and variation in texture is a pleasing quality belonging exclusively to high grade, full top grain leathers.
- All square footage requirements are based on usable footage; the shape of a hide and the usable, clean footage may make it necessary for us to request more leather after COL is received.
- Calf hides must be at least 30 square feet of clean and usable matching hides. When specifying calf hides, add 15% to COL requirements shown in the price list.

COM Disposal

- Leftover COM from an order is held for 6 weeks
- COM not tied to an order is held for 3 months

COM/COL Evaluation

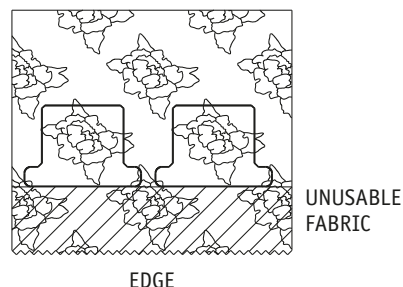

National reserves the right to inspect, approve, or reject any COM/COL. National approval signifies only that such textile/leather can be applied to the products for which intended. Such approval does not constitute any responsibility, liability, or warranty on the part of National as to appearance, behavior, durability or tailoring of COM/COL.

COM Decorative Patterns

- Yardage requirements are greatly affected by not only size of repeats, but also by the print or pattern.
- National cuts all seating patterns with aesthetic concerns in mind for high quality and consistency.
- Refer to particular model in price list to find yardage required for pattern.

The line drawing below depicts two seat cushions in necessary/proper placement on a piece of decorative fabric. Please note the unusable fabric.

It is not always appropriate to place a seat pattern at the edge of the fabric. Due to this circumstance, please include an additional ½ yard per order.

COM Directional Fabrics

- Some COM fabrics are considered directional that may not be considered directional by the fabric supplier, due to the upholstery process used by National.
- Application of COM upholstery will be depicted as on the COM supplier memo sample or website. If a different application is desired the pattern would need to be custom quoted.
- Arc-Com/Maharam/Momentum/Stinson/Ultrafabrics Alliance upholsteries will be applied as depicted on the supplier memo sample or website. If a different application is desired the pattern would need to be custom quoted.

TB133

California Technical Bulletin No. 133 – Flammability test procedure for seating furniture used in public occupancies. National provides pre-approval for TB133 chair/COM fabric combinations. The availability of TB133 on specific chair/alliance fabric combinations can be found at www.NationalOfficeFurniture.com/COMApprovalSearch. Even though we try to keep this document as accurate as possible, the supplier may change contents, finishes, etc... without our knowledge. Customer needs to confirm that the information on this listing matches the content information from the COM supplier. If no test data is available for a particular fabric/chair combination, the TB133 order will not be allowed. These pre-approved alliance fabrics can be ordered as standard product – no custom quote required.

To order seating to meeting the TB133 fire code, specify an "F" at the end of the model number (Ex: N59AAF).

If the COM material you want is not in the COM database, please submit a sample per the instructions outlined on page 34.

If a fabric/chair combination has not been burn tested, the customer has the option of having it tested. Pricing for the testing will be \$1300 list, including shipping for testing services plus the chair price (test sample). TB133 testing requested by the customer will require a custom quote. The fabric/chair burn test results will determine whether future orders can be ordered as standard product or custom quotes. Each instance may vary.

TB133 COM list pricing can be found on pages 466-493.

Letters of assurance are available upon request. A letter of assurance verifies that a TB133 test was conducted on a combination of chair/fabric comparable to the requested chair/fabric.

ELOQUENCE PRODUCT SPECIFICATIONS—EXECUTIVE

85 Series

SEAT AND BACK CONSTRUCTION

- 11-ply, one piece solid molded plywood shell forms the seat and back
- 3" of high density foam covers the seat and 2½" of high density foam covers the back

ARM CONSTRUCTION

- Constructed of exterior beech with doweled and barrel nut joints
- Arms are attached to the seat and back with metal L-brackets
- Available with black protective polyurethane arm caps for added durability

CONTROL MECHANISM/LIFT

- The standard knee tilt mechanism features a heavy-duty adjustment tension spring for a variety of body sizes and minimal rise of front seat edge; this allows the user's feet to remain planted when the chair is in the reclining position
- The combination gas lift/tilt lock lever allows dual functions with a simple in/out movement for lockout and an up/down movement for height adjustment

BASE AND CASTERS

- Wood base features a standard five prong, rigid steel understructure to ensure long life
- Caster posts fit directly into steel sleeves, greatly reducing caster socket failure
- Decorative hardwood caps complement the chair design
- Black, hard double wheel casters, which work on multiple surfaces, are standard
- Black, soft double wheel casters are available for use on hard floors; upcharge applies to this option
- All National bases are tested to BIFMA standards using 2500 lb. force

FINISH

- Features a catalyzed top coat that resists denting, peeling and reactions to chemicals
- Can be cleaned with a damp cloth
- When specifying Brighton and Natural finish, variation in color is acceptable due to the nature of beech wood characteristics
- Features our silver ion antimicrobial finish which inhibits the growth of bacteria and microbes

WOOD SPECIES

- Beech

- The combination gas lift/tilt lock lever allows dual functions with a simple in/out movement for lockout and an up/down movement for height adjustment
- Standard pneumatic gas cylinder lift allows seat to raise and lower 4" and provides spring action for added comfort
- Seatslide option adjusts seat depth to seven different positions within a 2½" range

CONTROL MECHANISM—SYNCHRONOUS

- Synchronous control allows the back and seat to move in a synchronized 2.3:1 ratio motion
- Free float feature allows the chair to tilt freely
- A side activated telescoping tension adjustment handle provides a comfortable way to adjust back tension to meet individual needs
- The back angle can be locked in one of five positions
- Standard pneumatic gas cylinder lift allows seat to raise and lower 4¼" and provides spring action for added comfort
- Seatslide option adjusts seat depth within a 2½" range
- Low back models feature the option of the standard pneumatic cylinder, which allows the seat to raise and lower 4¼", or a lower height pneumatic cylinder, which allows the seat to raise and lower 3"

CONTROL MECHANISM—LARGE AND TALL MODELS

- Synchronous control allows the back and seat to move in a synchronized 2:1 ratio motion
- Free float feature allows the chair to tilt freely or be locked in the neutral position
- To maintain proper tension and stability, the synchronous control is recommended for individuals weighing less than 425 lbs.
- Standard pneumatic gas cylinder lift allows seat to raise and lower 4¼" and provides spring action for added comfort

A.C.T. Icons

A.C.T. PERFORMANCE ICONS

A.C.T. (The Association for Contract Textiles), an organization made up of some 40 contract textile houses (Jobbers) has introduced a simple visual system for several ASTM and AATCC test standards.

These icons do not represent new testing for fabrics. National, as have many manufacturers, has always used these standards as requirements when developing fabrics. These icons were developed to create a common vernacular among textile companies and manufacturers in order to give specifiers uniform technical guidelines.

In order to use the A.C.T. icons, fabrics must pass the minimum requirements as established by ASTM (American Society of Testing and Materials) and AATCC (American Association of Textile Colorists and Chemists).

All National fabrics meet, and in most cases exceed the minimum requirements as set up by A.C.T. For the purpose of uniformity in the industry, National will be utilizing the A.C.T. icons on swatch cards and related materials.

Fire Retardancy

Flammability testing determines a fabric's resistance to burning.

APPLICATION	PASSES
Upholstery	California 117
Panels and Upholstered Walls	ASTM E 84 (unadhered method)

Colorfastness to Light

Colorfastness to light is the degree to which fabric will retain its color when exposed to light.

APPLICATION	PASSES
Upholstery	AATCC 16 Option 1 or 3 Class 4 minimum at 40 hours
Panels and Upholstered Walls	AATCC 16 Option 1 or 3 Class 4 minimum at 40 hours

Abrasion

Abrasion is the ability of a fabric to withstand damage from wear and rubbing. There is a general contract specification as well as a heavy-duty specification.

APPLICATION	PASSES
Heavy-duty Upholstery	ASTM 3597 modified (#10 cotton duck) 30,000 double rubs Wyzenbeck method or ASTM D4966 (with 21 oz. weight) 40,000 rubs Martindale method

Upholstery	ASTM 3597 modified (#10 cotton duck) 15,000 double rubs Wyzenbeck method
------------	--

Colorfastness to Wet & Dry Crocking

Colorfastness to wet & dry crocking refers to the rubbing off of color from the fabric onto clothing, hands or other materials and can occur under wet or dry conditions.

APPLICATION	PASSES
Upholstery	AATCC 8 Dry Crocking, Class 4 minimum Wet Crocking, Class 3 minimum
Panels and Upholstered Walls	AATCC 8, Class 3 minimum

Physical Properties

3 physical property tests include:

Brush pill test to determine a fabric's piling

Breaking/tensile strength is the ability of a fabric to withstand tension without breaking or tearing

Seam slippage is the pulling apart of fabrics at the seams

APPLICATION	PASSES
Upholstery	Brush pill ASTM D3511, 3 minimum Breaking strength ASTM D5034 50lbs. minimum in warp & welt Seam slippage ASTM D4034 25 lbs minimum in warp & welt
Panels and Upholstered Walls	Breaking strength ASTM D5034 Grab Method 35 lbs. minimum in warp & welt

TEXTILE APPEARANCE GUIDELINES

Please note that these guidelines are here to help you have the best looking product that National can provide to you. Guidelines 1–4 are simply explanations of what you may see on your chair. We can still upholster fabrics associated with these guidelines, but you may see some of the characteristics described.

- 1 Due to thickness and or stiffness this textile may result in gathers and puckers around corners, contours and certain seams.
- 2 Patterns are considered matched directional; however, decorative stitching, tufting/buttons, seams and seat to back on corner, wedge and diagonal units may not align due to pattern configuration.
- 3 Textile with high nylon or wool content (more than 50%) may show signs of material stretch and lack of rebound when room temperatures fluctuate.
- 4 Mohair, velvet and chenille may be easily bruised or have the potential of crooked seams due to the heavy nap and flip.

TEXTILE RESTRICTION GUIDELINES

Fabrics associated with guidelines 5 and 6 prevent us from upholstering the applicable chair series.

- 5 This textile cannot be used for glue application. Potential issues could include poor adhesion quality to the mating surface, separation of the fabric face from the backing or glue bleeding through the fabric.
- 6 Thin and/or loosely woven textiles cannot be used due to potential fabric separation at the seams.
