DESCRIPTION OF OXFORD GARDEN'S MATERIALS AND WEATHERING PROCESS

Oxford Garden selects specific outdoor materials suitable for each application. Teak, shorea, acacia, resin-wicker, powder-coated aluminum, composite sling, Tekwood and Lite-Core are long lasting and very durable in outdoor conditions. They may be maintained by washing with mild soap detergents or non-abrasive cleaner except where noted in the care instructions below.

Exposed to the outdoor elements of sun and rain, our wood products will weather naturally to a beautiful silver gray color unless treated. To prevent or slow this process, teak, shorea or acacia may be finished with Australian Timber Oil or similar products. If left untreated, graying will take place in about one year. During the initial weathering process some surface roughness may develop as the furniture adjusts to its new environment. Once this adjustment has been made, the roughness will disappear. However, a very light sanding may be desired to smooth out the roughness. Moderate checking in the grain is normal with exposure to the elements. Some small cracks may appear but these are only on the surface and in no way affect the structural integrity of the furniture.

PRODUCT CARE INSTRUCTION

After assembly, furniture should be rinsed well with water to remove dust that may be left over from manufacturing. This should be done before placing on concrete or tile to prevent staining. Since we carefully select quality materials for outdoor use, they weather well outside with little or no maintenance.

A seasonal cleaning may be desired. For powder-coated aluminum, Tekwood, and resin-wicker, wash gently with a mild or non-abrasive cleaner, rinse well and let dry. For composite sling, scrub with a mild, non-foaming commercial cleanser, rinse well and air dry. For our wood products, create a mild solution of water, laundry detergent and a little bleach. Rinse the furniture and using a sponge or soft natural bristle brush, scrub the furniture with the solution. Lastly, rinse the furniture and let dry.

Regularly clean Lite-Core using a soft rag and mild soap or pH balanced cleaner, rinse thoroughly, and dry with a clean rag. Avoid bleach and cleaners that are acidic, alkaline, or abrasive. To protect against stains, clean spills immediately and re-seal with a penetrating stone sealer twice a year. Scrape away gum or sticky material with a plastic putty knife.

If the original warm brown color is preferred on wood products, Oxford Garden suggests Australian Timber Oil to be used seasonally to preserve the color. In extremely dry climates we highly recommend a routine application of Australian Timber Oil. Test in an inconspicuous spot to approve the color before applying to the whole piece of furniture. Application is at the customer's own discretion and is not included in the warranty.

If you would like to restore your wood furniture's appearance after graying has begun, Oxford Garden also offers Cabot's Wood Cleaner. This cleaner is specially formulated to remove mildew, mold, algae, and dirt. It will also remove most of the gray weathered color. Follow up with a new application of Australian Timber Oil. Painting or using polyurethane is NOT recommended. Application of such will void the product warranty.
