FREIGHT GUARANTEED PROGRAM

Peter Pepper Products, Inc. (PPP) offers an optional 'Freight Guaranteed Program' on all FOB Compton, CA shipments, with delivery via common carrier or United Parcel Service (UPS). Freight charges are precalculated and prepaid by PPP and added to the original invoice at time of shipment. This optional Freight Guaranteed Program enables the purchaser to determine freight charges when ordering and provides one invoice for both PPP products and freight.

Unless otherwise noted on your order, PPP will ship 'Freight Guaranteed' and will select the most appropriate carrier and routing on all shipments. If the customer specifies a carrier, freight will ship via that carrier, collect, 3rd party or 'Will Call'.

How to use the 'Optional Freight Guaranteed Program'

 Ship to Zone 2 = 8% of List price
All other FOB Points: Ship to Zone 1 = 8% of List price
 Ship to Zone 2 = 5% of List price

Minimum UPS Charge: \$8.00.

Minimum truck charges applied to each zone Zone 1 = \$ 100
 Zone 2 = \$ 145

Alaska & Hawaii Shipments:

Use Zone 1 pricing to port of embarkation within the 48 contiguous states. International Shipments: Please contact Customer Service for pricing.

PPP reserves the right to change prices of the Freight Guaranteed Program based on additional fuel surcharges imposed after March 1, 2011.

ESTIMATED SHIPPING WEIGHT SYMBOLS

- ▲ UPS Dimensional Weight
- * Shipped via LTL Truck Shipment. Dimensions exceed UPS limits.

Freight charges are pre-calculated and pre-paid by PPP and added to the original invoice at time of shipment. This optional 'Freight Guaranteed Program' enables the purchaser to determine freight charges when ordering and provides one invoice for both PPP products and freight.

All merchandise (except items marked by *) will be shipped **UNITED PARCEL SERVICE**, unless total weight of order indicates reduced shipping charges by truck. (\$8.00 minimum UPS charge applies.)

When another carrier is designated by the customer, all 'Other Handling Charges', i.e. 3rd Party Pick-up and Billing, will be billed as freight charges to the customer by PPP.

PPP Optional Freight Guaranteed Program

THIS PRICE LIST SUPERSEDES ALL PREVIOUS ISSUES and is effective January 1, 2017.

FREIGHT GUARANTEED PROGRAM

Peter Pepper Products, Inc. (PPP) offers an optional 'Freight Guaranteed Program' on all FOB Compton, CA shipments, with delivery via common carrier or United Parcel Service (UPS). Freight charges are precalculated and prepaid by PPP and added to the original invoice at time of shipment. This optional Freight Guaranteed Program enables the purchaser to determine freight charges when ordering and provides one invoice for both PPP products and freight.

Freight charges are for normal dock delivery only and does not include Residential, inside or call before delivery, uncartoning, installation or removal of cartons.

A request for 'call before delivery' is \$50 additional. Additional charges will be determined on a per-shipment basis.

For shipments outside the continental U.S., contact PPP for freight information.

Merchandise is shipped cartoned, FOB factories, freight prepaid, to one destination. Title of goods changes when merchandise leaves PPP dock and any subsequent freight damage and all freight claims are the responsibility of the purchaser or consignee to contact the carrier within 72 hours of delivery and report the damage and request an inspection.

Unless otherwise noted on your order, PPP will ship 'Freight Guaranteed' and will select the most appropriate carrier and routing on all shipments. If the customer specifies a carrier, freight will ship via that carrier, collect, 3rd party or 'Will Call'.

How to use the 'Optional Freight Guaranteed Program'

The Continental United States has been divided into (2) zones. Using the map, determine the 'ship to' zone and FOB point for the shipment. Freight charges are calculated as a percentage of List price based on the following schedule:

FOB Compton, CA only: Ship to Zone 1 = 5% of List price
 Ship to Zone 2 = 8% of List price
All other FOB Points: Ship to Zone 1 = 8% of List price
 Ship to Zone 2 = 5% of List price

SHIPPING

All merchandise (except items marked by*) will be shipped  **United Parcel Service**, unless total weight of order indicates reduced shipping charges by truck. Minimum UPS Charge: \$8.00.

Minimum truck charges applied to each zone Zone 1 = \$ 100
 Zone 2 = \$ 145

Alaska & Hawaii Shipments:

Use Zone 1 pricing to port of embarkation within the 48 contiguous states. International Shipments: Please contact Customer Service for pricing.

PPP reserves the right to change prices of the Freight Guaranteed Program based on additional fuel surcharges imposed after March 1, 2011.

ESTIMATED SHIPPING WEIGHT SYMBOLS

- ▲ UPS Dimensional Weight
- * Shipped via LTL Truck Shipment. Dimensions exceed UPS limits.
- (2) Shipped in 2 boxes

Standard UPS Rates Apply Unless Indicated with Estimated Shipping Weight Symbol ▲ UPS Dimensional Weight Guidelines

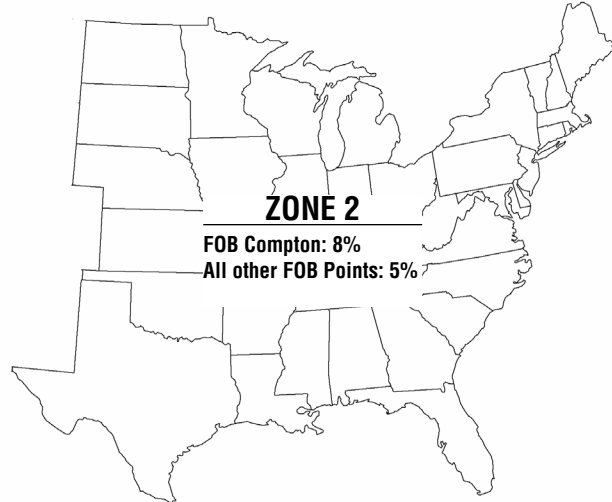

All shipments previously determined by UPS to be "Oversize" will now be billed on the Dimensional Weight of the shipment. Dimensional weight rates are applicable only to UPS Ground packages that are three cubic feet or larger. Dimensional weight is calculated in inches by multiplying width x height x depth, divided by 166 = dimensional weight.

Billable weight will be based on actual package weight or the dimensional weight, whichever is greater. Packages smaller than three cubic feet will be billed based on actual weight.

Please note that in some cases, UPS Dimensional weight may also apply to multiple combined products shipped in the same box. The estimated actual shipping weight of each product is shown in our Price List. The Dimensional Weight on single boxed products is available from our website at:

www.peterpepper.com/ship/. You may obtain further information on these new rules from UPS at: <http://www.rates.ups.com/>.

The UHF Wireless Synchronized Clock System uses a single master clock, equipped with either an NTP, GPS or CDMA receiver.

The system obtains and transmits the correct US Time Standard to an unlimited number of secondary clocks, throughout a facility or an entire campus. This system eliminates potential liabilities from inaccurate, independently set clocks. Automatic Daylight Savings Time adjustments. Emergency Mass Notification (EMN) options may be added to these Master Clocks to instantly notify the occupants of an entire facility. (See page 83.)

2.4 GHz Wireless Synchronized Clock System

The 2.4 GHz Wireless Synchronized Time System provides a multi-path mesh network for clock-to-clock transmission of synchronized time, eliminating the time related issues and liabilities associated with manual time setting.

This easy-to-install system will provide years of trouble free service without the cost of expensive wiring. The master transmitter obtains time updates from a network timeserver or optional GPS receiver. The time signal is then broadcast to all clocks once per second. Automatic Daylight Savings Time adjustments. Each battery-operated clock transmits up to 150 feet in all directions, repeating the synchronized time signal clock-to-clock, throughout an entire facility.

The UHF Emergency Mass Notification System (EMN) will instantly send text and/or audio messages throughout a facility or across an entire campus in a matter of seconds, and not minutes.

The same emergency messages can also be delivered to your entire facility utilizing the facility emergency dialing software. Using the latest text-to-speech technology from AT&T, the UHF system will send out alpha-numeric messages to all Wireless Message Displays, Wireless Speakers and Outdoor Broadcast Systems. To reduce costs, our system can be integrated into most PA and Fire Panel systems and utilize existing speakers, or combinations of both.

How does it work? UHF EMN Software ties into the URL that broadcasts the RSS feed supplied by the paging software. When an alert is sent from the paging software, the UHF EMN Software automatically sends out an audio alert to all UHF speakers and a text alert to all message displays.

When an "all clear" is sent from the paging software, the UHF EMN Software automatically changes the message displays back to time.

Benefits of Wireless Emergency Notification

- Uses a FCC Licensed frequency not accessible to the general public.
- Audio and Visual notifications in the event of an emergency.
- NFPA 72 recommended Amber strobe lights on indoor speakers and moving message boards.
- Over 60 professionally recorded emergency announcements to choose from.
- Easily integrates into fire control panels to utilize system speakers.
- Up to 15 pre-recorded emergency messages that provide calm, concise announcements.
- Make live emergency announcements from any telephone, cell phone or SyncTech® master control PC.
- Text to speech technology using AT&T Natural Voices Software.
- Ability to have back up master transmitter in the event of a catastrophic failure at the primary location.
- Plug and Play components for easy installation and expansion.
- Ability to divide facility or campus into 255 separate zones.
- Synchronized time for your entire facility or campus.

NRC – Noise Reduction Coefficients

The Noise Reduction Coefficient (NRC) is a scalar representation of the amount of sound energy absorbed upon striking a particular surface. An NRC of 0 indicates perfect reflection; an NRC of 1 indicates perfect absorption. In particular, it is the average of four sound absorption coefficients of the particular surface at frequencies of 250 Hz, 500 Hz, 1000 Hz, and 2000 Hz. These frequencies encompass the fundamental frequencies and first few overtones of typical human speech, and, therefore, the NRC provides a decent and simple quantification of how well the particular surface will absorb the human voice.
