SAFE INTERNATIONAL, LLC

ON-SITE RECORDS PROTECTION

Guard against Fire, Water and Theft

WELCOME TO THE WORLD OF PHOENIX FILES AND SAFES

Ask any Phoenix customer whose documents and data have withstood a fire and the water to put it out: Not all files and safes are created equal, and none rival the protection you'll get in products from Phoenix Safe International, LLC.

Phoenix distributes a full line of safes and files offering on-site records protection from fire, water and theft. Our products offer superior, independently tested protection to guard your valuables against the worst disasters. And with a variety of sizes, styles, finishes and colors, they cater to most designs and décors.

Phoenix has protected valuables since the 18th century. Originally known as Richmond Manufacturing, the company's origins were in maritime carpentry for merchant fleets sailing to America from Liverpool, England.

More than 200 years later, we launched Phoenix Safe International as the company's American arm. We personally present Phoenix to independent office product dealers nationwide, and our efficiency lets us give our customers legendary, one-on-one customer service when they need it.

In this catalog, you'll find a wide range of files and safes — supported by our inventory of nearly 2,000 quick-ship items, rigorously tested to meet the highest standards of protection and attractively designed to appeal to any customer.

As our newest line, World Class files offer our most popular combinations of features, sizes and colors without compromising style or toughness.

Thank you for considering Phoenix Safe International, where protecting your valuables is our burning passion.

Test Specifications

Fire Test Standards

Each Phoenix fire-resistant model is independently tested to European or American standards for fire protection and carries certification labels from the testing agency that identify the product's fire protection level.

Products for Storage of Paper Records: Products that provide fire protection for paper records are listed in this brochure with the designation of "Class 350." Tests for products designed to protect paper records range from 60 to 120 minutes in temperatures ranging from 1700°F to 1859°F. By comparison, a typical fire lasts 20 minutes and reaches 800°F. During the fire test, the internal temperature of the product is monitored to ensure that it does not rise above a level that would endanger the paper documents stored within the product. *The designation tag also indicates the length of the fire test as "1 HR, 1 ½ HR, or 2 HR" and is located next to each model number.*

Products for Storage of All Computer Media: Products that provide fire protection for all types of computer media are listed in this brochure with the designation of "Class 125." Tests for products designed to protect computer media range from 60 to 120 minutes in furnace-burn time, at temperatures ranging from 1700°F to 1859°F. By comparison, a typical fire lasts 20 minutes and reaches 800°F. During the fire test, the internal temperature of the product is monitored to ensure that it does not rise above a level that would endanger the computer media stored within the product. *The designation tag also indicates the length of the fire test as "1 HR, 1 ½ HR, or 2 HR" and is located next to each model number.*

MTC Grade B Rating
 Certain types of computer media (CDs, DVDs, USBs and memory sticks) are less sensitive to heat and humidity than tapes, cartridges or hard drives. These less-sensitive items can be safely stored and protected inside some products designed to protect paper records. Products that carry the MTC Grade B rating have been tested and certified to provide adequate protection for these items. Products that are rated "Class 125" are designed to store and protect all types of computer media and should be used whenever the more sensitive items need protection.

Key to the protection labels found throughout this catalog.

- Fire Protection**
Rigorously tested to protect paper documents from fire 
- MTC Grade B Rating**
Protects certain types of computer media (CDs, DVDs, USBs and memory sticks) 
- Data Protection**
Class 125 protection for all computer media 
- Theft Protection**
Independently rated to deter theft 

Questions?
800.636.0778

*Nothing destroys pasts and
threatens futures faster than fire.*

Nothing protects them better than Phoenix.

Fire is the most common disaster to befall businesses, forcing nearly half of those affected to close forever. Vital records and data also can burn up in minutes, irreplaceable through insurance.

Phoenix fire files save you from that stress — durably built to endure the harshest fires, attractively designed to fit many décors and readily available in the sizes you need.

All Phoenix fire files are tested at temperatures up to 1700°F and keep paper safe from the deadliest fires. Our proprietary insulation is independent to each drawer, protecting closed drawers even if one is left open. Inner steel jackets guard against theft via unlocked compartments and keep insulation out of documents, locking mechanisms and suspensions. And labyrinth sealing systems further defend documents from water used to extinguish fires.

Plus, Phoenix World Class files protect digital media — with extra insulation and moisture barriers to guard memory sticks, hard drives, CDs, DVDs and USBs.

Phoenix files are as stylish on the outside as they are sturdy on the inside. Available in lateral or vertical sizes, their modern design assures a perfect fit for your home or office.

You can't predict fire, but you can plan for it. With Phoenix fire files, you're guaranteed to preserve your past and your future.

INTRODUCING WORLD CLASS PROTECTION

Meet the future of fire and water protection with World Class files from Phoenix.

True to its name, the World Class line blends the best of all Phoenix has to offer — rugged endurance to withstand the toughest disasters, eye-catching styles that fit in anywhere and the features you need to personalize your protection.

World Class files are built to the specifications you want, available in legal-, letter- and lateral-size models.

And of course, World Class files stand up to the harshest fires and the water that puts them out. Each file is rated to protect your documents from intense fires, while a labyrinth sealing system and special gaskets prevent water damage from sprinklers and fire hoses.

*The features you want.
The style you prefer.
The toughness you expect.*

*Welcome to World Class
fire protection from Phoenix.*

PHOENIX FIRE FILE FEATURES

Phoenix World Class fire files work from the inside out to safeguard your records. Here are some of the individual parts that add up to unparalleled protection for your paper documents and digital media (CDs, DVDs, USBs and memory sticks) from fire, water and theft:

- 1 Solid, one-piece steel construction of the outer body provides superb durability
- 2 High-sided drawers and adjustable rails allow hanging-folder filing
- 3 Movable dividers accommodate standard folder filing in vertical files
- 4 Key-operated plunger lock ensures privacy
- 5 Proprietary Styronite insulation ensures a world-recognized **certification of Class 350 – 1-hour fire protection from Europe's prestigious SP Institute; files are also explosion- and impact-resistant**
- 6 Independently insulated drawers protect closed compartments if one is left open
- 7 Inner steel jackets prevent access from unlocked compartments and insulation from touching your documents
- 8 Labyrinth sealing system and special gaskets prevent water damage from fire-hose spray or sprinklers
- 9 Lock-bypass mechanism allows selected drawers to remain unlocked, even when the file is locked

- Internal dimensions are per drawer.

Lateral Files

Combining powerful protection and aesthetic polish, World Class lateral files cater to heavy-duty storage needs. Each drawer is equipped to handle legal- or letter-sized folders from front to back or side to side. Drawers also use a three-way suspension for stability and feature an anti-tip safety mechanism that prevents opening more than one drawer at a time.

WORLD CLASS SERIES FEATURES:

- Class 350 — 1-hour fire-resistant
- Impact-resistant for 30-foot drops
- Resists explosions of up to 2000°F
- MTC Grade B rating protects CDs, DVDs, USBs and memory sticks
- Labyrinth sealing system and special gaskets prevent water damage
- Two- and four-drawer vertical models; two-, three- and four-drawer lateral models
- Durable textured paint finish in black, putty or light gray
- Recessed drawer pulls
- Lock any number of drawers and leave the rest unlocked for customizable privacy
- Key-operated plunger lock for security
- Independent drawer insulation protects closed drawers if one is open during a fire
- Inner steel jackets cover insulation and block access via unlocked compartments
- Class 125 Media Insert available to protect data tapes and cartridges

Available as verticals or laterals, Custom Class fire files complement superior protection with customizable options, including colors and locks.

STANDARD FEATURES

If you're looking for all the right features and room to customize, Custom Class files are a perfect choice.

Vertical Features:

- Two, three and four drawers available in legal- and letter-sized widths in 31"D models. Two and four drawers available in 25"D models.
- Perfect protection for paper, with the UL Class 350 — 1-hour fire-resistant rating
- Rated to resist explosions of up to 2000°F
- Design guards against water damage from fire hoses and sprinklers
- Gang lock, selective locking system, key lock for privacy, and follower blocks
- Steel-lined drawers keep insulation out of sight
- 10 standard color options

Lateral Features:

- Available in two-, three- and four-drawer 38"W and 44"W models that accommodate legal- and letter-size files
- INTERLOCK system allows only one open drawer at a time to prevent tipping
- Three-arm SwayGuard suspension system minimizes torque
- One-hour fire-resistant rating and protection against explosions up to 2000°F
- Design guards against water damage from fire hoses and sprinklers
- Gang lock, selective locking system and key lock for privacy
- Steel-lined drawers keep insulation out of sight
- Integral rails for left-to-right filing of hanging legal documents; optional rail for hanging letter documents also available as an accessory
- Cross rails for front-to-back filing of legal- or letter-size documents included
- 10 standard color options

OPTIONAL ACCESSORIES

Custom Class vertical and lateral fire files are available with a full range of optional accessories for increased efficiency, including:

Interior cross trays

Permits the filing of checks and cards of various dimensions. Trays can easily be removed and carried to your work area and replaced in file drawer later.

Drawer-in-a-drawer

Factory-installed; doubles drawer capacity when filing card files or checks. Each drawer section opens independently for easy access.

Special lock options

Includes dial combination locks, electronic combination locks and additional key locks. Call to learn more about our locking options.

Row inserts

Installed in drawers to keep checks or card files neatly organized and easy to access.

Class 350 Media Insert

Option available to protect data tapes and cartridges. (See page 20 for more details.)

***Caster base** (Not Pictured) - Provides a sturdy, mobile foundation.

Vertical Files

Space-saving vertical files elegantly blend into any environment while protecting your vital records, with fire protection perfect for your important paper records.

990 SERIES FEATURES:

Churches, concession stands, ticket offices and fundraiser collection sites have all relied on Phoenix depository safes to protect collected cash until deposited at the bank

The 990 Series bodies are constructed with a 1/4" steel plate, with a 1/2" door of solid steel that is further reinforced with hardened anti-drill plates over the locking area

Large-capacity drop area can accommodate money bags, envelopes, packages and deposit capsules

■ Front-loading models **991**, **991E**, **991T**, **991TE**, **992** and **992E** are fitted with a special Phoenix tilting baffle plate to ensure that the contents cannot be "fished out"

■ Models **992** and **992E** have separate lockable deposit chamber inside

■ Models **991**, **991T** and **992** are available with a dial combination lock

■ Models **991E**, **991TE** and **992E** feature electronic combination locks (pictured)

■ All deposit safes are predrilled for bolting to the floor

Fire played rough with this Phoenix file, but its contents came out unscathed and it put more profit in the dealer's pocket.

Phoenix offers superior on-site records protection from fire, water and theft at lower costs to dealers. Our competitive prices create the higher margins you want without compromising the features, toughness, style or quality your customers need. Plus, we're available to help you make fire protection an easy upsell — building profits and customers' trust.

The file may look rough. But Phoenix fire protection keeps customers' valuable documents looking great.

WHAT'S BEAUTIFUL ABOUT THIS FILE?

The protection Phoenix can promise.

Media Insert for safes 507, 509, 1902, 1903

MI100 shown in a 2LGL-31 fire file

DataCare Media Inserts

Vulnerable to excess heat and moisture, your magnetic computer media needs additional protection even when stored in an insulated file or safe, where the internal temperature can reach as high as 350°F and humidity levels can reach 100%.

- ▶ Certified protection for all media types, including removable hard drives
- ▶ DataCare Media Inserts are designed to work with any Class 350-rated insulated file or safe to provide an environment that will keep your data protected
- ▶ Extra insulation and special moisture barriers keep the insert's internal temperature below 125°F and the humidity level below 80% during the 1700°F — 1-hour fire test

Model	External			Internal			Weight	Media Capacity			
	H	W	D	H	W	D		CDs in cases	8mm cartridges	4mm cartridges	DLT tapes
For Files (MI100 - all 31" Legal & Lateral files; MI50 - all 25" Legal Files)

Phoenix Files

World Class protection for your most important documents.

Phoenix Safes

Protect your documents and media from the damage of fire, water and theft.

Protection Codes

Phoenix products are extensively tested to ensure that they protect your records and data from numerous disasters.

To help you determine the best fit for your needs, we have detailed the type of protection you can expect from our fire-resistant files and safes. Below is the key to the codes you see listed in the following tables:

P Fire protection for paper documents

W Water-resistant

I Impact-resistant

E Explosion-tested

NS Normal security rating

FAF Free after-fire replacement

M MTC Grade B computer media protection

D Class-125 data protection

BS Burglary security rating
