PowerUp® Module

SPECIFICATIONS

Worksurfaces (Fixed & Folding)

Worksurface tops are 1-1/4" nominal overall thickness with .042" thick high-pressure laminate and .030" thick backer. Density is 45 lbs/ft³, M3 grade.

Edge Style

There are 5 choices of edge styles available: (74P); Flat Vinyl T-edge (BN); Urethane (ME); Postformed (PL); and 3/8" Wood Band Edge (34S). The BN and PL edges are not available on wedge worksurfaces. 34S edge is standard in Natural Red Oak.

Folding Base Worksurfaces

Worksurfaces for folding base tables have a solid 45 lb/ft³ particleboard core construction. PowerUp® Module, Activ8® or grommet locations are available along the back edge of the worksurface, away from the user in either the right- or left-hand corners or both locations. Two nylon carrying handles are built into the bottom of the worksurface

along the front edge. The folded legs are held in place by two retractable nylon leg locks that are recessed into the bottom of the worksurface. The 48" short fold table has one leg lock and a velcro strap to hold the short fold leg.

Fixed Base Worksurfaces

Worksurfaces for fixed base tables have a solid 45 lb/ft³ particleboard core construction. PowerUp® Module, Activ8® or grommet locations will be available along the back edge of the worksurface away from the user in either the right- or left-hand corners, both corners or center.

Wedge Worksurfaces

Wedge worksurfaces have a solid particleboard core construction. PowerUp® Module, Activ8® or grommet locations are not available. The wedge is supported between two tables by four 1-1/2" x 3/4" rectangular metal splice tubes. Four nylon gangers are also used to draw the wedge up to each table and keep the splice tubes from disengaging.

Leg Assemblies (Fixed & Folding)

The leg assembly is made up of a 24" or 30" foot, leg upright with access door, and either a fixed or folding leg. The feet and the cantilevers are die cast aluminum and the leg and access door are extruded aluminum. The feet each have two nylon glides that attach to the foot via 5/16" diameter x 7/8" long threaded studs. The leg contains a 1" x 2-1/2" wireway that directs wires from the foot into the horizontal wire manager. The leg wireway is divided into two halves that keep data cables separate from electrical cables. The leg wireway also has an aluminum access door that hinges on two steel dowel pins and snaps shut via a nylon snap. The cantilever attaches the leg assembly to the worksurface via raised bosses that provide 3/4" of clearance between the cantilever and the bottom of the worksurface, allowing a space to pass cables from table to table. The raised bosses on the cantilever also serve as mounting studs for the nylon table gangers that hold tables/wedges together. Each table has one right leg and one left leg assembly. The leg assemblies are available in three

standard heights: 27", 29" & 32". The leg assemblies are held together by two 1/4" diameter draw bolts that clamp the assembly together. The legs are available in standard powder coat finishes. Fixed leg tables ship KD. Folding leg tables ship assembled.

Folding Leg Assembly

The folding leg assembly is only available on 60" and 72" wide tables. A short fold option (one leg folds over the top of the other) is available on the 48" wide table. The table unfolds by releasing the legs from the nylon leg locks and raising the legs. Once the legs are in a vertical position, snaps in the cantilever hold them upright. The spring loaded catch, located on each end of the wire trough assembly, releases and rotates out of its stored position up between the legs until the catches snap into the receivers on the legs. The table can be turned over and stood on its legs.

Folding Tables With Casters

Casters are available for all tables. When casters are ordered for a 60" wide table,

Laptop Garage®

Features

Inside usable laptop area	•
Standard size	16-1/2" x 12" x 2-1/4"
Large size	18-1/2" x 12" x 2-1/4"

the 29" and 32" height table becomes a short-fold table.

TECHNICAL SPECIFICATIONS

Garage Construction

The two-piece Laptop Garage® enclosure and shelf shall be fabricated from 16-gauge steel and have a black powder-coated finish. The door shall be constructed from 5/8" thick MDF board and be covered with .040" thick high-pressure laminate on both sides. The edges shall be painted black. The door when opened by pressing a steel latch and catch assembly shall automatically rise by the force stored in two gas cylinders. These cylinders shall also provide the variable length linkage used to raise the pivot rod which shall activate dual scissors mechanisms hidden beneath a shelf. Each scissors mechanism shall be made from two 14-gauge x 5/8" wide straps, which are punched to accept plastic wear bushings. Upon reaching the maximum open position the cover shall automatically be fixed in

that position by an 11-gauge steel gravity activated lock bracket. The unit shall allow access to the underside of the shelf if necessary due to the spillage of liquid or for cleaning or retrieval of a lost item in this position only. This shall be accomplished by lifting the shelf. Two sizes of garages are available— standard and large.

Optional Lock Mechanism

Locking units shall be equipped with an 110/120v keyless operated solenoid. The solenoid shall allow the locking sequence to begin with the unit's cover in any position. Locks shall be programmable to lock and unlock all units within a room at the same time, or individually. Keyless remotes ordered separately.

Note

Laptop Garages must be specified and ordered as part of an InTandem® or DataLink® table. They cannot be ordered as a separate unit.

ADA Requirements

27", 29", and 30" high tables with Laptop Garages do NOT meet ADA requirements. Must specify 32" high legs.

DataLink® Table System

Fixed Leg Tables/Power

DLFX

Fixed Leg Table, 24"D

- Available with or without a 10-wire/6-circuit power distribution unit ("Power Option")
- Duplex receptacles, infeeds, and jumpers for the "Power Option" must be ordered separately
- Wire trough assembly is standard on all tables
- Data ports located in the modesty panel are standard. Data jacks are supplied by the customer
- Includes ganger
- See Activ8® Single Circuit Electrical System to order modules

HOW TO ORDER

Indicate the following information on order form:

1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.

- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

A Select basic model/power option.
T6 = Power

B Select edge style.
BN - Flat vinyl T-edge
74P - 74P edge
PL - Postformed edge
ME - Urethane edge
34S - 3/8" Wood band edge

C Select PowerUp/power module or grommet location.
Location is from the seated side of the table. "Center" is not available on folding tables.

NOPU-NOGR - No PowerUp/no grommet
NOPU-GL - Grommet left; add \$16
NOPU-GR - Grommet right; add \$16
NOPU-GC - Grommet center; add \$16

NOPU-GB - Grommet left and right; add \$36

INFORMATION

Wood Color Variations

High quality wood table edges and surfaces are characterized by distinctive natural colors and grain patterns. Due to natural variations of fine wood, it is impossible to exactly match colors and grains with consistency.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.

Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

INFORMATION

Wood Color Variations

High quality wood table edges and surfaces are characterized by distinctive natural colors and grain patterns. Due to natural variations of fine wood, it is impossible to exactly match colors and grains with consistency.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.

Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model number, including options. See "How To Build a Model Number".
- Any special service required.

Note: • The □ indicates that a choice is required.

- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

A Select basic model/power option.
NP=No Power

- B** Select edge style.
- BN** - Flat vinyl T-edge
 - 74P** - 74P edge
 - PL** - Postformed edge
 - ME** - Urethane edge
 - 34S** - 3/8" Wood band edge

C Select PowerUp/power module or grommet location.
Location is from the seated side of the table. "Center" is not available on folding tables.

- NOPU-NOGR** - No PowerUp/no grommet
- NOPU-GL** - Grommet left; add \$16
- NOPU-GR** - Grommet right; add \$16
- NOPU-GC** - Grommet center; add \$16
- NOPU-GB** - Grommet left and right; add \$36

- NOGR-ML** - PowerUp left; add \$112
- NOGR-MR** - PowerUp right; add \$112
- NOGR-MC** - PowerUp center; add \$112
- NOGR-MB** - PowerUp left and right; add \$220
- CCTL-NOGR** - Activ8 hole left
- CCTR-NOGR** - Activ8 hole right
- CCTC-NOGR** - Activ8 hole center
- CCTB-NOGR** - Activ8 hole both
- NOPU-VL** - Villa Grommet left; add \$64
- NOPU-VR** - Villa Grommet right; add \$64
- NOPU-VC** - Villa Grommet center; add \$64
- NOPU-VB** - Villa Grommet left and right; add \$128
- NOGR-VPL** - Villa Power Module left; add \$231
- NOGR-VPR** - Villa Power Module right; add \$231
- NOGR-VPC** - Villa Power Module center; add \$231

NOGR-VPB - Villa Power Module left and right; add \$461

D Select PowerUp module/grommet color.
Refer to color addendum at ki.com or KI Fabrics & Finishes binder.

E Select base finish.
Refer to color addendum at ki.com or KI Fabrics & Finishes binder.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

- Formica - LF/supplier's color pattern code
- Nevamar - LN/supplier's color pattern code
- Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.

Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

INFORMATION

Wood Color Variations

High quality wood table edges and surfaces are characterized by distinctive natural colors and grain patterns. Due to natural variations of fine wood, it is impossible to exactly match colors and grains with consistency.

INFORMATION

Wood Color Variations

High quality wood table edges and surfaces are characterized by distinctive natural colors and grain patterns. Due to natural variations of fine wood, it is impossible to exactly match colors and grains with consistency.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

- Formica - LF/supplier's color pattern code
- Nevamar - LN/supplier's color pattern code
- Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.

Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

Flat Screen Garage®

General Information

Flat Screen Garage®

Features

Standard size cutout area

19-3/8" x 7-1/2"

FLAT SCREEN GARAGE® CONSTRUCTION

Flat Screen Garage® Worksurfaces

Horizontal worksurfaces are constructed of 1-1/8" thick 45# density particleboard with .030 thick high-pressure laminate and .030 thick high-pressure backing sheet. Post-formed (PL) edge worksurfaces have elliptical front edge. Rear and side edges are covered in matching flat .024" edge banding. Urethane (ME) edge worksurfaces have elliptical molded front edge. Rear and side edges molded in 1/4" flat urethane. Worksurfaces have one or two cutouts, which accept Flat Screen Garage® unit(s). Garage units included in price for worksurface. Edges are sealed and painted black. A single grommet or PowerUp® module may be placed in most worksurfaces. Grommets are standard 5-3/4" x 2-1/4" and have a flip-up receding door. Grommets are the same size as PowerUp® modules to allow for retrofitting. The grommet or PowerUp® will be placed in the upper left corner for worksurface widths of 42", 48", and 54" or centered between the

doors for double units.

ADA Tables

Single unit ADA tables may be ordered. Specify a 32" deep worksurface, ADA legs with locking casters, and a non-powered beam of chosen width. Finished height with casters, 32". Knee clearance with 32" deep worksurface, 19". ME edge not available on ADA tables.

Beam Assembly

Beam door is constructed of a .06" thick dual-durometer extrusion joined to the steel lower rail by a tongue and groove fit. The door has a continuous flexible hinge allowing it to pivot at the bottom. The beam allows all cords to be stored within. The front side of the beam is partially covered by the garage and its components with minimum accessibility from the user side. Beams for the Flat Screen Garage® must be specified as "standalone," "end-of-run left," "middle," or "end-of-run right." Standalone beams will be shipped with two end caps; end-of-run beams will be shipped with one. Middle

beams will not include any end caps.

Legs

Vertical leg tube measures 2" x 5" and is constructed of 14-gauge formed steel. All legs have vertical wire management capabilities. A reversible vertical wireway is standard with each leg. Steel trim and liquid-tight fittings are available for power infeeds at the bottom of any leg. All "C" legs can be used as either end legs or shared legs. Flat Screen Garage® legs are not interchangeable with InTandem® "C" legs. Nylon glide under toe casting can be adjusted vertically up to 1-1/4".

Garage Unit and Motor

The garage is fabricated from 16-gauge steel front and back panels and a 14-gauge steel bottom with matching powder-coated finishes. The shelf is raised to the preferred height by an electric motor enclosed in extruded aluminum. The main shelf features two holding brackets to vertically support a keyboard, and a storage area for a mouse.

Flat Screen Garage® Operation

The Flat Screen Garage® unit can be accessed with either a remote control device or by a simple push of the up button on the up/down electric switch located on the under side of the worksurface corner. The door will automatically open and the monitor, keyboard and mouse will rise to the preferred height by an enclosed electric motor. Internally stored keyboard and mouse are manually removed for use. The monitor is secured to a support bracket that can be manually adjusted to minimize glare. To limit abuse and maximize motor life, the unit is designed to shut off if it is kept moving for longer than two minutes in a ten minute span.

Infrared Receiver

Works with and must be ordered with an infrared remote control unit to lock down or unlock a room of tables featuring flatscreen garage units. One receiver is attached to each table, and can receive a signal for up to two garage units.

Infrared Remote Control Unit

Sends locking and unlocking signals to receivers and can also be used to raise and lower multiple units at once.

PowerUp®

PowerUp® is a UL Listed, relocatable power tap, which mounts flush into the table top. When flipped up, (cover open), one duplex receptacle and two data ports are exposed. PowerUp® is UL Listed (UL1363) as a Temporary Power Tap. The PowerUp® module is 7" long x 3-1/2" wide x 2-1/2" high and fits securely into a 6-1/4" x 3" cutout, still allowing removal without tools. The module is constructed of polycarbonate with a textured finish, meeting UL-V0 minimum requirements. The module has two receptacles, rated at 15 Amps/125 Volts and two locations for data connectors. Snap-in data plates hold data connectors and allow the standard module to accommodate most manufacturers. The data connectors are not supplied with the module and are purchased by the customer. The module has a dampened spring-loaded mechanism allowing the

unit to open for use and close when not in use. The power receptacles open above the plane of the worksurface to avoid accidental spills into the receptacle. Data jacks remain stationary to avoid excess wear and tear on the wire connections and promote transmission of data communication. Data ports are molded to accept RJ45 jacks, but can be modified to accept various brands of jacks. The module comes standard with a 22" cord and a 3-prong plug.

10-Wire Pre-wired Harness

UL listed the wiring configurations of the 810-wire systems are as follows: 622-Six hot conductors (12-gauge), two neutral conductors (10-gauge) and two grounds (12-gauge). System provides four 20 amp, 125 volt capacity circuits. All receptacles are rated at 15 amps, 125 volt capacity. Connection diagrams are available. Pre-wired harness plugs into the adjacent table harness for table reconfiguration.

Communications Circuitry

Data connectors and wiring must be ordered

separately by the customer.

Privacy Screens

Standard 3/4" thick core material. Both sides are laminated with .030" thick high-pressure laminate as standard. All edges are banded with edging. Available in three heights with a straight top edge.

Divider Screens

Standard 3/4" thick core material. Both sides are laminated with .030" thick high-pressure laminate as standard. All edges are banded with edging. Available in three heights with a curved top. Dividers are available only in conjunction with privacy screens.

Note

New York City and Chicago installations will require a special order to be written. Contact your CSR.

Smart Lift®

General Information

Smart Lift™

Features

Standard size cutout area

20-3/4" x 5-3/4"

SMART LIFT® CONSTRUCTION

Worksurfaces

Horizontal worksurfaces are constructed of 1-1/8" thick 45# density particleboard with .030 thick high-pressure laminate and .030 thick high-pressure backing sheet. Post-formed (PL) edge worksurfaces have elliptical front edge. Rear and side edges are covered in matching flat .024" edge banding. Urethane (ME) edge worksurfaces have elliptical molded front edge. Rear and side edges molded in 1/4" flat urethane. 74P (74P) edge is 2mm thick and bonded to all 4 sides of the surface. Worksurfaces have one or two 6" x 21" cutouts which accept Smart Lift™ unit(s). Smart Lift® price is included in the price shown for worksurface. Smart Lift® cutouts in the worksurface are sealed and painted black. A single grommet or PowerUp® module may be placed in most worksurfaces. Grommets are standard 5-3/4" x 2-1/4" and have a flip-up receding door. Grommets are the same size as PowerUp® modules to allow for retrofitting.

The grommet or PowerUp® will be placed in the upper right corner for worksurface widths of 48" and 54" or centered between the doors for the 66" and 72" double units. The door is fabricated from 5/8" thick 45# density with .030" high-pressure laminate on both faces. The door edges are sealed and painted black.

Smart Lift® Beam Assembly

Beam door is constructed of a .06" thick dual-durometer extrusion joined to the steel lower rail by a tongue and groove fit. The door has a continuous flexible hinge allowing it to pivot at the bottom. The beam allows all cords to be stored within. The front side of the beam is partially covered by the garage and its components with minimum accessibility from the user side. Beams for the Smart Lift® must be specified as "standalone," "end-of-run left," "middle," or "end-of-run right." Standalone beams will be shipped with two end caps; end-of-run beams will be shipped with either a left or right end cap; middle beams will not include any end caps.

Smart Lift® Legs

Vertical leg tube measures 2" x 5" and is constructed of 14-gauge formed steel. All legs have vertical wire management capabilities. A reversible vertical wireway is standard with each leg. Steel trim and liquid-tight fittings are available for power infeeds at the bottom of any leg. All "C" legs can be used as either end legs or shared legs. Flat Screen Garage® legs are not interchangeable with InTandem® "C" legs. Nylon glide can be adjusted vertically up to 1-1/4".

Smart Lift® Unit

The garage housing and front panel is fabricated from 16-gauge steel with matching powder-coated finishes. Internal components and wiring for the monitor, keyboard, and mouse can be accessed by removal of seven screws attaching the front panel. The lift bar is fabricated from 11-gauge steel with a 14-gauge steel keyboard/mouse tray and is available in black powder-coat finish. The lift bar and rising door is guided by four, maintenance-free V-groove roller bearings attached to an 11-gauge roller bracket also

available in black powder-coat finish. The lift bar is raised pneumatically via a cable/pulley mechanism that is mounted inside the unit. The keyboard/mouse tray features a 3/16" diameter wire rod to hold the keyboard vertically in place for storage and provides for an area under the monitor for mouse storage. The garage unit can be specified with a keyed lock that allows every cover to be locked individually or a remote locking option that allows multiple-unit locking via control of 1- 5 remote key fobs. Wire management within the unit is accomplished with a corrugated polyethylene hose and grommet/clamp arrangement. The hose is split lengthwise to allow for easier insertion of cords with large plugs. An optional monitor tilt kit can be specified to allow up to 10 degrees of tilt and reduce glare. Smart Lift™ units without monitor tilt can accommodate a VESA compliant monitor with a maximum size of 3.6" deep x 19.0" high x 21.0" wide and maximum weight of 15#. The combined keyboard and monitor thickness must be less than 4.8" thick. The maximum depth of monitor with the monitor tilt option is

reduced by .6" to 3.0".

Smart Lift® Operation

Monitor and peripherals can be accessed by lightly depressing the center, front of door and releasing. The unit will automatically raise fully allowing access to the monitor, keyboard and mouse. Internally stored keyboard and mouse may be removed manually for use. After use, the keyboard, mouse, and associated wiring can be restowed below the monitor. Storage of monitor and peripherals is accomplished by pushing down firmly on the top, center of door until slightly below worksurface height and releasing.

Remote Control Unit

Sends locking and unlocking signals to receivers. Remote must be specified separately if electric lock option (ELK) is selected.

PowerUp®

PowerUp® is a UL Listed, relocatable power tap, which mounts flush into the table top. When flipped up, (cover open), one duplex

receptacle and two data ports are exposed. PowerUp® is UL Listed (UL1363) as a Temporary Power Tap. The PowerUp® module is 7" long x 3-1/2" wide x 2-1/2" high and fits securely into a 6-1/4" x 3" cutout, still allowing removal without tools. The module is constructed of polycarbonate with a textured finish, meeting UL-VO minimum requirements. The module has two receptacles, rated at 15 Amps/125 Volts and two locations for data connectors. Snap-in data plates hold data connectors and allow the standard module to accommodate most manufacturers. The data connectors are not supplied with the module and are purchased by the customer. The module has a dampened spring-loaded mechanism allowing the unit to open for use and close when not in use. The power receptacles open above the plane of the worksurface to avoid accidental spills into the receptacle. Data jacks remain stationary to avoid excess wear and tear on the wire connections and promote transmission of data communication. Data ports are molded to accept RJ45 jacks, but can be modified to accept various brands of jacks.

The module comes standard with a 22" cord and a 3-prong plug.

10-Wire Pre-wired Harness

UL listed the wiring configurations of the 810-wire systems are as follows: 622-Six hot conductors (12-gauge), two neutral conductors (10-gauge) and two grounds (12-gauge). System provides four 20 amp, 125 volt capacity circuits. All receptacles are rated at 15 amps, 125 volt capacity. Connection diagrams are available. Pre-wired harness plugs into the adjacent table harness for table reconfiguration.

Communications Circuitry

Data connectors and wiring must be ordered separately by the customer.

Note

New York City and Chicago installations will require a special order to be written. Contact KI.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

- Formica - LF/supplier's color pattern code
- Nevamar - LN/supplier's color pattern code
- Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.

Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model number, including options. See "How To Build a Model Number".
- Any special service required.

Note: • The indicates that a choice is required.

- The absence of the indicates that no choice is required.
- Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select paint color.
Refer to color addendum at ki.com or KI Fabrics & Finishes binder.

INFORMATION

Infrared Receiver

Works with, and must be ordered with an Infrared Remote Control Unit to lock down or unlock a room of tables featuring flatscreen garage units. One receiver is attached to each table and can receive a signal for up to two garage units.

Infrared Remote Control

Sends locking and unlocking signals to receivers and can also be used to raise and lower multiple units at once.

Floor Infeed (10-Wire)

Two 90° connectors. Flexible steel conduit with eight 12-gauge conductors in the leg. Includes steel trim plate with dual holes for electrical and data entry and six feet of liquid-tight flexible conduit .8315 diameter.

Overhead Infeed Circuit Pre-wired

Aluminum pole is 10ft. in length. Flexible steel conduit with ten 12-gauge conductors. Includes ceiling trim plate.

"C" legs in 27", 29", and 38" worksurface heights	•	•	•
10-wire, 6-circuit pre-wired electrical system	•	•	•
Floor or overhead power infeeds available in 8-wire or hard wire	•	•	•
Keyboards, CPU holders, security kits and wheelchair kits available	•	•	•

SPECIFICATIONS

Worksurfaces

Horizontal worksurfaces are constructed of 1-1/8" thick 45# density particleboard with .030 thick high-pressure laminate and .030 thick high-pressure backing sheet. Overall thickness is 1-1/4".

There are three choices of edges offered for InTandem®: (74P); Urethane (ME); and Postformed (PL).

Grommets are standard 5-3/4" x 2-1/4" and have a flip-up receding door. Grommets are the same size as PowerUp® modules to allow for retrofitting.

Dual-Door Beam

Lay-in access to data cables from the back side of the desk. Access to power and data cables is also available from the front. Beam doors are constructed of .06" thick dual durometer extrusion and pivot at the bottom. Electrical trough is constructed of 16-gauge

formed steel. Openings on the back have a 16-gauge steel removable outlet cover. With hard-wire power, the top raceway is covered by a 20-gauge formed steel cover with holes for simplex receptacles. Wiring and connections are supplied by the electrician.

Data trough is constructed of 16-gauge steel. Terminated end of data cables snap into prepunched holes in the data trough. Multiple data plates also snap into the data trough. The customer provides data jacks and data plates. An optional data cover can be specified to cover the data trough. Data cover is constructed of 24-gauge steel. Standard ABS plastic beam end caps enclose the wires on end-of-run and stand-alone beams. Middle and corner middle beam assemblies do not include end caps.

Legs

All legs have vertical wire management capabilities. A reversible vertical wireway is standard on each leg. Steel trim with liquid-tight fittings are available for power infeeds at the bottom of any leg. All legs can

be retrofitted in the field. All "C" legs can be used as either end legs or shared legs. "C" legs are used when connecting tables in a row. Vertical leg tube is 2" x 5", 14-gauge formed steel. Nylon glide under toe casting can be adjusted vertically 1-1/4".

Corner Worksurface Support Leg

Square-shaped leg for transitional corner surface is 2" x 2", 14-gauge steel. One leg is required per worksurface. Wire management is not available on this leg.

Freestanding Frames with Casters

Available on 30" depth worksurfaces only. Model number includes a stand-alone beam with right and left end caps, two "C" legs and four 2-3/4" diameter dual wheel locking, black, carpet casters. The stand-alone beam is not available with 10-Wire, hard-wire, communications outlets or data raceway covers. An optional surge protected six-outlet, 110 volt electrical strip with a six foot cord is available to lay in the beam. Freestanding frames with casters are not UL listed.

PowerUp®

PowerUp® is a UL Listed, relocatable power tap, which mounts flush into the table top. When flipped up, (cover open), one duplex receptacle and two data ports are exposed. PowerUp® is UL Listed (UL1363) as a Temporary Power Tap.

The PowerUp® module is 7" long x 3-1/2" wide x 2-1/2" high and fits securely into a 6-1/4" x 3" cutout, still allowing removal without tools. The module is constructed of polycarbonate with a textured finish, meeting UL-V0 minimum requirements. The module has two receptacles, rated at 15 Amps/125 Volts and two locations for data connectors. Snap-in data plates hold data connectors and allow the standard module to accommodate most manufacturers. The data connectors are not supplied with the module and are purchased by the customer.

The module has a dampened spring-loaded mechanism allowing the unit to open for use and close when not in use. The power receptacles open above the plane of the

Wheelchair Kit

worksurface to avoid accidental spills into the receptacle. Data jacks remain stationary to avoid excess wear and tear on the wire connections and promote transmission of data communication. Data ports are molded to accept RJ45 jacks, but can be modified to accept various brands of jacks. The module comes standard with either a 22", 108", or 180" cord and 3-prong plug.

10-Wire Pre-wired Harness

The wiring configurations of the 810-wire systems are as follows: 622-Six hot conductors (12-gauge), two neutral conductors (10-gauge) and two grounds (12-gauge). System provides four 20 amp, 125 volt capacity circuits. All receptacles are rated at 15 amps, 125 volt capacity. Connection diagrams are available. Pre-wired harness plugs into the adjacent table harness for table reconfiguration.

10-Wire Harness - T-Shaped

10-Wire electrical harness of galvanized steel is available for T-shaped configurations. Available for 24", 30" deep worksur-

faces.

10-Wire Harness - Back-To-Back

10-Wire electrical harness of galvanized steel is available for back-to-back configurations. Available for all width tables.

End-of-Run Beam - NY 10-Wire Infeed

The City of New York 10-Wire Infeed uses a power infeed table beam supplied with a service entry box. Box is 2.25 cubic inches for each of the 10 wires entering from source and leaving to pre-wired harness system. Includes steel trim plate with dual holes for electrical and data entry and six feet of liquid-tight flexible conduit .83 diameter.

Communications Circuitry

Data connectors and wiring must be ordered separately by the customer.

Privacy Screens

Standard 3/4" thick core material. Both sides are laminated with .030" thick high-pressure laminate as standard. All edges are banded with edging. Available in three heights with a

straight top edge.

Divider Screens

Standard 3/4" thick core material. Both sides are laminated with .030" thick high-pressure laminate as standard. All edges are banded with edging. Available in three heights with a curved top. Dividers are available only in conjunction with privacy screens.

Wheelchair Accessible Kit

Made of 11-gauge steel. Designed for easy retrofit of existing InTandem® units. Available in widths of 42" through 72" and in 29" height to make the overall surface height 32". Standard to fit 30" deep worksurface and the support arms.

*Note: Wheelchair kits for 42" wide tables can only be used when at least one of the legs of the ADA table are in the shared position (one leg shared with an adjoining table).

INFORMATION

Warranty

Refer to KI Terms & Conditions document or visit ki.com

UL Listing

The InTandem Table System is Listed to applicable UL Standards and requirements by Underwriters Laboratories, Inc. Two of the Standards used to evaluate InTandem Table Units are UL 1286, Office Furnishings and UL 723, Standard for Test for Surface Burning Characteristics of Building Materials. The freestanding frames with casters are not included in the Listed System.

InTandem® Table System

General Information

Laptop Garage®

Features

Inside usable laptop area	•
Standard size	16-1/2" x 12" x 2-1/4"
Large size	18-1/2" x 12" x 2-1/4"

TECHNICAL SPECIFICATIONS

Garage Construction

The two-piece Laptop Garage® enclosure and shelf shall be fabricated from 16-gauge steel and have a black powder-coated finish. The door shall be constructed from 5/8" thick MDF board and be covered with .040" thick high-pressure laminate on both sides. The edges shall be painted black. The door when opened by pressing a steel latch and catch assembly shall automatically rise by the force stored in two gas cylinders. These cylinders shall also provide the variable length linkage used to raise the pivot rod which shall activate dual scissors mechanisms hidden beneath a shelf. Each scissors mechanism shall be made from two 14-gauge x 5/8" wide straps, which are punched to accept plastic wear bushings. Upon reaching the maximum open position the cover shall automatically be fixed in that position by an 11-gauge steel gravity activated lock bracket. The unit shall allow access to the underside of the shelf if neces-

sary due to the spillage of liquid or for cleaning or retrieval of a lost item in this position only. This shall be accomplished by lifting the shelf. Two sizes of garages are available—standard and large.

Optional Lock Mechanism

Locking units shall be equipped with an 110/120v keyless operated solenoid. The solenoid shall allow the locking sequence to begin with the unit's cover in any position. Locks shall be programmable to lock and unlock all units within a room at the same time, or individually. Keyless remotes ordered separately.

Note

Laptop Garages must be specified and ordered as part of an InTandem®, or DataLink® table. They cannot be ordered as a separate unit.

ADA Requirements

27", 29", and 30" high tables with Laptop Garages do NOT meet ADA requirements. Must specify wheelchair kit or 32" high legs.

Table width restrictions may apply.

UL Listing

The InTandem Table System is Listed to applicable UL Standards and requirements by Underwriters Laboratories, Inc. Two of the Standards used to evaluate InTandem Table Units are UL 1286, Office Furnishings and UL 723, Standard for Test for Surface Burning Characteristics of Building Materials. The freestanding frames with casters are not included in the Listed System.

HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model number, including options. See "How To Build a Model Number".
- Any special service required.

Note:

- The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
 - 74P - 74P edge
 - PL - Postformed edge
 - ME - Urethane edge
- B** Select edge style.
 - N - No power
 - L - Left power
 - R - Right power
- C** Select top power feed.
 - 0 - No PowerUp module
 - 1 - One PowerUp module; add \$97
 - 2 - Two PowerUp modules; add \$193
- D** Select number of PowerUp modules.
 - 0 - No PowerUp module
 - 1 - One PowerUp module; add \$97
 - 2 - Two PowerUp modules; add \$193
- E** Select PowerUp module/grommet color. Refer to color addendum at ki.com or KI Fabrics & Finishes binder.

- F** Select surface finish. Refer to color addendum at ki.com or KI Fabrics & Finishes binder. Surface finish offerings are based on edge style selections.
- G** Select edge color. Refer to color addendum at ki.com or KI Fabrics & Finishes binder. Edge color offerings are based on edge style selections.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
 Nevamar - LN/supplier's color pattern code
 Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern. Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model number, including options. See "How To Build a Model Number".
- Any special service required.

Note: • The □ indicates that a choice is required.

- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

A Select basic model.

B Select edge style.

74P - 74P edge
PL - Postformed edge
ME - Urethane edge

C Select top power feed.

N - No power
L - Left power
R - Right power

D Select number of PowerUp modules. No Villa Modules on 24" wide worksurfaces (grommets only)

0V - No Power Module (two metal Villa grommets only); add \$128
1V - One Villa Module w/Grommet and One Villa Grommet; add \$294
2V - Two Villa Modules w/Grommets; add \$461
0C - Cutouts Only (for Single Circuit use)

E Select PowerUp module/grommet color.

Refer to color addendum at ki.com or KI Fabrics & Finishes binder.

F Select surface finish.

Refer to color addendum at ki.com or KI Fabrics & Finishes binder. Surface finish offerings are based on edge style selections.

G Select edge color.

Refer to color addendum at ki.com or KI Fabrics & Finishes binder. Edge color offerings are based on edge style selections.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
 Nevamar - LN/supplier's color pattern code
 Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.

Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

- Formica - LF/supplier's color pattern code
- Nevamar - LN/supplier's color pattern code
- Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.

Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

Corner Middle Beams

	MODEL	W	MODEL NUMBER		Approx. Packaged Weight
			Basic Model	Beam Color	
 <p>ITCB</p>	Corner Middle Beam - 10-Wire (T6) - With Data Cover (DC) • Does not include beam end caps • Data jacks/connectors, connection plates and wiring are not included. Beams are pre-punched to accept most data plates • Support legs are required for corner beams and must be ordered separately • Duplex receptacles, infeeds and connectors must be ordered separately • Corner beams with 10-wire electrical include a pass through cable on the right side. This eliminates the need for a worksurface to worksurface connector on the right • Data covers conceal data wires in trough	24"	ITCB24/T6/DC	<input type="checkbox"/>	17.0#
		30"	ITCB30/T6/DC	<input type="checkbox"/>	20.0#
		36"	ITCB36/T6/DC	<input type="checkbox"/>	23.0#
		42"	ITCB42/T6/DC	<input type="checkbox"/>	26.0#
 <p>ITCB</p>	Corner Middle Beam - Hard-Wire (HC) - With Data Cover (DC) • Does not include beam end caps • Hard wire beams include simplex receptacles • Must specify hard-wire infeed separately • Electrician to supply wires and connectors • Data covers conceal data wires in trough • Support legs are required for corner beams and must be ordered separately	24"	ITCB24/HC/DC	<input type="checkbox"/>	13.0#
		30"	ITCB30/HC/DC	<input type="checkbox"/>	16.0#
		36"	ITCB36/HC/DC	<input type="checkbox"/>	19.0#

HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model number, including options. See "How To Build a Model Number".
- Any special service required.

Note: • The □ indicates that a choice is required.

- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

A Select basic model.

B Select surface finish.

Refer to color addendum at ki.com or KI Fabrics & Finishes binder. Surface finish offerings are based on edge style selections.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
 Nevamar - LN/supplier's color pattern code
 Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.

Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model number, including options. See "How To Build a Model Number".
- Any special service required.

Note:

- The indicates that a choice is required.
- The absence of the indicates that no choice is required.
- Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
B Select surface finish.
 Refer to color addendum at ki.com or KI Fabrics & Finishes binder.
 Surface finish offerings are based on edge style selections.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
 Nevamar - LN/supplier's color pattern code
 Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.

Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

Wharton™ Lectern

General Information

Wharton™ Lectern with Keyboard Drawer
(WLECT.KBD)

Wharton™ Lectern w/out Keyboard Drawer
(WLECT.NKBD)

Features		
Electrically-adjusted height	•	•
Perforated metal shrouds	•	•
Slide-open frosted Plexiglas	•	•
Technology well with simplex power outlet	•	•
Light	•	•
Microphone	•	•
2 additional external power outlets	•	•
Swing-out drink caddies	•	•
Pencil rail	•	•
Sliding keyboard drawer with mouse pad	•	
Drop-in black plastic storage tray	•	•
Frosted Plexiglas filler panel	•	•
General Dimensions		
Adjustable height	37-1/2" - 47"	37-1/2" - 47"
Top	21.6"D x 31.8"W - 47.8"W	21.6"D x 31.8"W - 47.8"W
Technology well	3"D x 12"W x 12"H	3"D x 12"W x 12"H
Drop-in storage tray	12"D x 13.5"W	12"D x 13.5"W
Acrylic insert	13.7"D x 14.5"W	13.7"D x 14.5"W

SPECIFICATIONS

Note: Pictures shown above with Creston Monitor which is purchased separately.

Metal components of the lectern are powder coated for superior appearance and durability. All plastic and fiberglass components are color matched in accordance with the KI color program.

Height Adjustment

Lecterns are height adjustable through a range of 37.5" to 47". Adjustment is accomplished by the push of a button, conveniently located on the presenter side.

Lectern Top

Tops are constructed of 1" thick frosted acrylic (Plexiglas). Organic top shape is 21.6" deep by 31.8" wide. Flush-mounted into the top are two 1/4"-thick recessed sliding surfaces. When the surfaces are open, top measures 47.8" wide. Sculpted aluminum pencil rail is located at the bottom

of each surface.

Lectern Basin

The basin is constructed of 3/16" thick fiberglass and painted to match metal components. The basin supports the acrylic top and houses the control panel or storage tray. It also houses the optional keyboard tray, the technology well, and the adjustment motor and controller.

Lectern Column

Outermost shrouds of column are formed from 18-gauge perforated sheet steel. Bottom shroud can be slid upward to allow limited access to wiring. Shrouds can be completely removed to allow wiring of additional technology. Power module with two simplex plugs is located on the front shroud (speaker side). Inside the shrouds is a telescoping frame assembly, comprised of two 3" diameter x 14-gauge steel tubes that are welded to a steel foot. Two 2-5/8" x 16-gauge steel tubes telescope inside the 3" outer tubes. Nylon bushings ensure a smooth, telescopic action between the

tubes.

Lectern Base

The base is machined out of 5/8" plate thick steel. The crescent shape provides excellent stability and clearance for the speaker's feet.

Technology Well

The technology well is a 3" deep x 12" wide x 12" high tapered repository for management of power and data cables. The well is accessible via a hinged door in the acrylic top, featuring one simplex power outlet and room to store a laptop cord, including the power transformer. The well is constructed of 16-gauge sheet steel. The door is machined of 1"-thick acrylic, and matches the top in material and finish. The door has a steel lip, which engages a magnetic latch. A 1/2" relief allows the cords to be routed from the well while the door is closed.

Drink Caddies

Two caddies store below the basin and swing out for use. Caddies are made of aluminum and powder coated for durability. The

right caddy has a recessed pocket for holding mugs or miscellaneous items. The left caddy has a cupholder with a formed wire basket for holding large drink containers.

Microphone

The microphone is a high-quality gooseneck microphone from Shure (model MX412/C). The microphone is installed into the acrylic top and isolated via a shock mount. The microphone supplied with the Wharton™ Lectern includes a standard XLR connection. Audio speakers and amplification are required to project sound. Audio speakers and amplification are not supplied by KI.

Light

The light is a high-quality, low voltage gooseneck lamp from Littlite (model MX412/C). This model features a 5W dimmable halogen bulb on a 12" gooseneck. The light is factory installed to the acrylic top and wired into the powerstrip inside the lectern. For replacement purposes, the bulb is a Q5 tungsten-halogen bulb rated 12V, 380mA (AC or DC). 5 watt.

**Drop-In Storage Tray**

The storage tray is used when a Crestron monitor is not purchased, and simply drops into the opening beneath the sliding doors. The storage tray is made of vacuum-formed ABS sheet, 3/16" thick and measures 12" deep x 13.5" wide. The depth varies from 1" to 2.8" so that a laptop placed in the tray will rest at a comfortable keying angle.

Acrylic Insert

The insert is used when the presenter wants the maximum amount of surface space instead of a Crestron monitor or the storage tray. The acrylic insert measures 13.7" deep x 14.5" wide and is 1/4" thick.

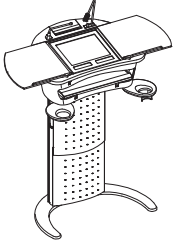

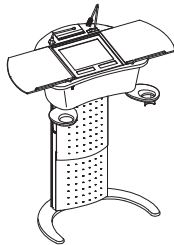

Crestron Control Panel

The lectern top is designed to accept a separately purchased Crestron touchpanel control system. Crestron can be reached at 1-800-237-2041 or visit their website (www.crestron.com) to find the dealer nearest you.

INFORMATION**Warranty**

INTCPUSM	Legs and CPU Clamps: CPU Clamp - Small	134			
ISMT3036	Worksurfaces - Poly Grommet/PowerUp: Single Unit	52			
ISMT3060	Worksurfaces - Poly Grommet/PowerUp: Double Unit	54			
ITBBT6.30	Electrical: 10-Wire Harness for Back-to-Back Configurations	142			
ITCB24/HC/DC	Corner Middle Beams: Corner Middle Beam - Hard-Wire (HC) - With Data Cover (DC)	132			
ITCB24/HC/ND	Corner Middle Beams: Corner Middle Beam - Hard-Wire (HC) - Without Data Cover (ND)	130			

Model No.	Description	Page	Model No.	Description	Page
ITFPA1736	Stand Alone Privacy Screen: Rectangular Stand Alone Privacy Screens - 17" Height	76	ITSB24/NN/ND	End-of-Run/Stand Alone Beams: End-of-Run Stand Alone Beam - No Power (NN) - Without Data Cover (ND)	116
ITFW3036	Worksurface w/Flat Screen Garage® - Poly Grommet/PowerUp: Single Unit	48	ITSB24/T6/DC	End-of-Run/Stand Alone Beams: End-of-Run Stand Alone Beam - 10-Wire (T6) - With Data Cover (DC)	118
ITFW3060	Worksurface w/Flat Screen Garage® - Poly Grommet/PowerUp: Double Unit	48	ITSB24/T6/ND	End-of-Run/Stand Alone Beams: End-of-Run Stand Alone Beam - 10-Wire (T6) - Without Data Cover (ND)	114
ITFW3236	Worksurface w/Flat Screen Garage® - Poly Grommet/PowerUp: Single Unit - ADA Tops	48	ITSB36/NYLT6/DC	End-of-Run/Stand Alone Beams: End-of-Run Stand Alone Beam - NY Infeed (NYL) - With Data Cover (DC)	120
ITHK.27	Electrical: Floor Infeed Hard-Wire Kit	140	ITSB36/NYLT6/ND	End-of-Run/Stand Alone Beams: End-of-Run Stand Alone Beam - Hard-Wire (HC) - Without Data Cover (ND)	116
ITLT3030/NB	Worksurface with Laptop Garage® - Poly Grommet/PowerUp: Single Unit (Non-Powered Beam) - Standard or Large Size	102	ITSC2424/NB	Worksurfaces - Poly Grommet/PowerUp: Corner (Non-Powered Beam) Square	90
ITLT3030/PB	Worksurface with Laptop Garage® - Poly Grommet/PowerUp: Single Unit (Powered Beam) - Standard or Large Size	108	ITTC2436/NB	Worksurfaces - Poly Grommet/PowerUp: Corner (Non-Powered Beam) Transitional	90
ITLT3060/NB	Worksurface with Laptop Garage® - Poly Grommet/PowerUp: Double Unit (Non-Powered Beam) - Standard or Large Size	102	ITTC2436/PB	Worksurfaces - Poly Grommet/PowerUp: Corner (Powered Beam) Transitional	92
ITLT3060/PB	Worksurface with Laptop Garage® - Poly Grommet/PowerUp: Double Unit (Powered Beam) - Standard or Large Size	108	ITTT6.24	Electrical: 10-Wire Harness for T-Shaped Configurations	142
ITMB24/HC/DC	Middle Beams: Middle Beam - Hard-Wire (HC) - With Data Cover (DC)	126	ITWK.4229	Freestanding Frames with Casters: Wheelchair Accessible Kit	138
ITMB24/HC/ND	Middle Beams: Middle Beam - Hard-Wire (HC) - Without Data Cover (ND)	122	ITWQ2460/NB	Worksurfaces - Poly Grommet/PowerUp: Rectangular (Non-Powered Beam)-Four Grommets	86
ITMB24/NN/DC	Middle Beams: Middle Beam - No Power (NN) - With Data Cover (DC)	128	ITWQ2460/PB	Worksurfaces - Poly Grommet/PowerUp: Rectangular (Powered Beam)-Four Grommets	88
ITMB24/NN/ND	Middle Beams: Middle Beam - No Power (NN) - Without Data Cover (ND)	124	ITWS2424/NB	Worksurfaces - Poly Grommet/PowerUp: Rectangular (Non-Powered Beam)-Two Grommets	86
ITMB24/T6/DC	Middle Beams: Middle Beam - 10-Wire (T6) - With Data Cover (DC)	126	ITWS2424/PB	Worksurfaces - Poly Grommet/PowerUp: Rectangular (Powered Beam)-Two Grommets	88
ITMB24/T6/ND	Middle Beams: Middle Beam - 10-Wire (T6) - Without Data Cover (ND)	122	IVFW3042	Worksurface w/Flat Screen Garage® - Villa Metal Grommet/Power Module: Single Unit	50
ITPCC1524	Corner Curved Privacy Screen: Corner Curved Privacy Screens - 15" Height	166	IVFW3066	Worksurface w/Flat Screen Garage® - Villa Metal Grommet/Power Module: Double Unit	50
ITPCC924	Corner Curved Privacy Screen: Corner Curved Privacy Screens - 9" Height	166	IVFW3242	Worksurface w/Flat Screen Garage® - Villa Metal Grommet/Power Module: Single Unit - ADA Tops	50
ITPS1124	Rectangular Privacy Screens: Rectangular Privacy Screens - 11" Height	152	IVLT3030/NB	Worksurface with Laptop Garage® - Villa Metal Grommet/Power Module: Single Unit (Non-Powered Beam) - Standard or Large Size	104
ITPS1724	Rectangular Privacy Screens: Rectangular Privacy Screens - 17" Height	152	IVLT3030/PB	Worksurface with Laptop Garage® - Villa Metal Grommet/Power Module: Single Unit (Powered Beam) - Standard or Large Size	110
ITPS2324	Rectangular Privacy Screens: Rectangular Privacy Screens - 23" Height	152	IVLT3060/NB	Worksurface with Laptop Garage® - Villa Metal Grommet/Power Module: Double Unit (Non-Powered Beam) - Standard or Large Size	104
ITPSA1124	Stand Alone Privacy Screens: Rectangular Stand Alone Privacy Screens - 11" Height	154	IVLT3060/PB	Worksurface with Laptop Garage® - Villa Metal Grommet/Power Module: Double Unit (Powered Beam) - Standard or Large Size	110
ITPSA1724	Stand Alone Privacy Screens: Rectangular Stand Alone Privacy Screens - 17" Height	154	IVMT3048	Worksurfaces - Villa Metal Grommet/Power Module: Single Unit	56
ITPSAC1524	Stand Alone Curved Privacy Screen: Rectangular Stand Alone Curved Privacy Screens - 15" Height	164	IVMT3066	Worksurfaces - Villa Metal Grommet/Power Module: Double Unit	58
ITPSAC924	Stand Alone Curved Privacy Screen: Rectangular Stand Alone Curved Privacy Screens - 9" Height	164	IVTC2436/NB	Worksurfaces - Villa Metal Grommet/Power Module: Corner (Non-Powered Beam) Transitional	98
ITPSC1524	Rectangular Curved Privacy Screens: Rectangular Curved Privacy Screens - 15" Height	162	IVTC2436/PB	Worksurfaces - Villa Metal Grommet/Power Module: Corner (Powered Beam) Transitional	100
ITPSC924	Rectangular Curved Privacy Screens: Rectangular Curved Privacy Screens - 9" Height	162	IVWS2424/NB	Worksurfaces - Villa Metal Grommet/Power Module: Rectangular (Non-Powered Beam)-Two Grommets	94
ITSB24/HC/DC	End-of-Run/Stand Alone Beams: End-of-Run Stand Alone Beam - Hard-Wire (HC) - With Data Cover (DC)	118	IVWS2424/PB	Worksurfaces - Villa Metal Grommet/Power Module: Rectangular (Powered Beam)-Two Grommets	96
ITSB24/HC/ND	End-of-Run/Stand Alone Beams: End-of-Run Stand Alone Beam - Hard-Wire (HC) - Without Data Cover (ND)	114	LTLOCK115	Worksurface with Laptop Garage®: Laptop Lock 1 Unit Control Box	20
ITSB24/NN/DC	End-of-Run/Stand Alone Beams: End-of-Run Stand Alone Beam - No Power (NN) - With Data Cover (DC)	120	LTLOCK215	Worksurface with Laptop Garage®: Laptop Lock 2 Unit
