Sort Modules
Sort module exterior and vertical dividers constructed of 3/4 inch 45-50 lb. substrate (particle board) with thermally fused laminate finish and matching or complimentary 3/8" PVC on front edges.

Shelves and shelf standards constructed of steel. Shelves adjust in one-inch increments and have 90 degree 1/2” label lip. All steel parts are thoroughly cleaned using a three-stage iron phosphate washer and then coated with an Epoxy-Hybrid powder coat finish using a state-of-the-art electrostatic paint system. Powder coating provides a superior, attractive, uniform finish that is more durable, scratch and corrosion resistant, and environmentally friendly than liquid paint.

Open Back Modules
All Mail Master™ sort modules are available with open backs for pass-through sorting. Just add “OB” suffix to model number. Open back models feature 1/2” label area on front and back shelf edge. Plexiglas doors are an optional accessory for open back modules, see page 9.

Stacking Modules
Any Mail Master™ sort module may be stacked with module of equal width and depth. When ordering, specify which modules will be stacked. Factory will pre-drill and provide screws for secure stacking.

Wall Mounted Modules
Any Mail Master™ sort module may be factory-modified for wall mounting. Add -WM to the end of your part number to denote wall mounting and add 25% to list price for modification. Factory provides steel mounting brackets which must be field-installed to mount at wall studs.

Tabletop Corner Filler

In L or U-shaped configurations, Tabletop Corner Fillers are an economical alternative to full corner tables. Before choosing this option, take into consideration that layout may not be re-configured at a later date, because the corner filler must be attached to adjacent tables for support.

Select paint finish for front filler panel.
