Ordering C.O.M., C.O.L., and C.O.V.

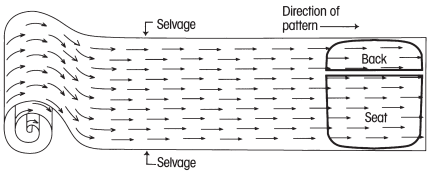
Bonduel, Green Bay, Ontario, and Tupelo and Shipping Location

How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing
For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive, Gate 3
Green Bay, WI 54302

For products shipped from Tupelo, MS facility ship material to:

KI Tupelo
Attn: C.O.M. Storage
2112 South Green Street
Tupelo, MS 38801

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility, ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

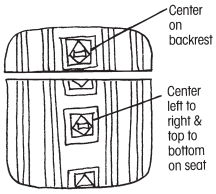


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

General Information

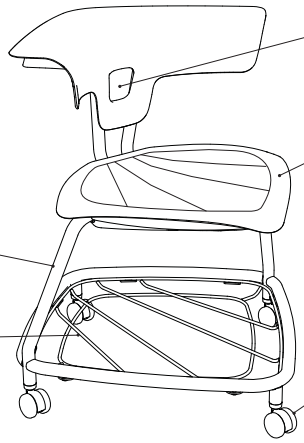
Ruckus™ Seating

Ruckus Seating



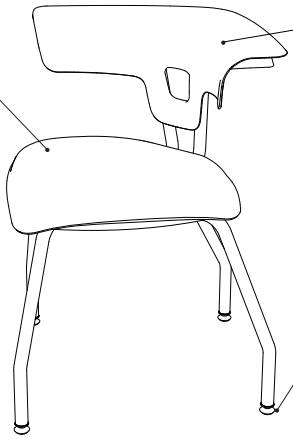
Integrated back handle for easy movement and stacking.

Seat and backrest are mechanically fastened, allowing easy field-replacement.

Unique frame design allows chairs to be stacked with or without a bookrack.

Optional bookrack is mechanically fastened, allowing easy field replacement.

Dual wheel hard casters allow for ease of movement on carpet. Soft casters available for hard floors.



The chair back shape includes integral armrests, which are also engineered to function as a support surface.

Optional upholstered seat pad allows for added comfort and endless design possibilities.

Swivel glides available in nylon, steel, or felt solo to accomodate a variety of floor materials.

RUCKUS SEATING

Description
Ruckus promotes student movement through its unique design. Its generously sized seating encourages an "as you like it" sitting experience. The chair back shape includes integral armrests, which are also engineered to function as a support surface.

Seat and Backrest
Both the seat and backrest shell shall be made of static-free high-impact 7% fiberglass reinforced polypropylene. Colorfastness is ensured through complete color impregnation throughout the molded part. Textured on both sides with a contrasting texture pattern on the seat. Ergonomic handle molded into the chair backrest for ease of mobility. Seat and backrest fasten to the frame with six 1/4-20 x 3/4" Hi-Lo screws.

Optional Upholstered Seat
Upholstered seats have partially exposed polypropylene surfaces. Molded Urethane foam is attached to an injection-molded polypropylene liner board, then upholstered using a draw-string process and fastened to an inner shell with screws. Seat foam is molded nominal 1" thickness.

Frames
Four Leg, Stack, Stool and Task frames are constructed with 1" outside diameter 13-gauge steel tubing, welded to 13-gauge steel plates and 1/4" wire. Frame shall be nickel-chrome plated or finished in powdercoat paint after all welding processes are complete.

Glides
Stack, Stool & Four Leg Chairs - Swivel-type polished zinc-plated steel, nylon plastic, or felt glides. KI recommends consulting with the floor manufacturer for specific glide recommendations.
Note: Felt glides add 1/4" to the overall height range.

Task Chair - Optional Bell glides (2" high) made of high impact plastic also available. Black only.
Note: Bell glides add 1/4" to the overall height range.

Casters
Carpet Casters Option - 50mm double wheels of high-impact thermoplastic. High-impact plastic frame. Black finish only.

Hard Floor Casters Option - 50mm double wheels of soft plastic. High-impact plastic frame. Black finish only.
NOTE: Casters not available on stool models.

Task Chair
Pneumatic Height Adjustment
Lever-activated pneumatic cylinder enables seat-height adjustment from 16-1/2" to 21-1/4".

Five Blade Base
28" injection molded, 30% fiberglass reinforced nylon 5-blade base. Available in Black or Warm Gray.

Bookrack
Stack Chair Frame - Optional bookrack is a welded framework of 1/4" diameter solid wire welded to eight 1/8" thick plates. Fastened to stackable chair frame with eight #10 screws. Bookrack will be nickel-chrome plated or finished in powdercoat paint after all welding processes are complete

Testing
Ruckus chair components shall originate from ISO 9000, ISO 9001 or ISO 9002 registered facilities. Ruckus chairs are designed and manufactured to meet or exceed required ANSI/BIFMA X6.1-2012 Education Seating and ANSI/BIFMA X5.1-2011 General Purpose Office Chairs.

General Guideline for Glide Selection

The following information is based on a combination of testing and experience. Due to factors beyond our control, KI is presenting this information strictly as a general guideline to assist our customers in selecting the best glide for their situation. It is up to the customer to determine which glide will perform best for their application based upon their site conditions, requirements, and the direction of the flooring manufacturer. Sample glides are available upon request to aid the customer in their selection (contact Customer Service).

Price list glide choice of: Nylon, Steel or Felt

Nylon

Steel

Felt - Solo Glide®

PERFORMANCE GUIDE (clean and properly finished floors)

GLIDE MATERIAL	CARPET	RESILIENT FLOORING			HARD FLOORING		
		Vinyl Sheet	VCT	Rubber	Ceramic Tile	Concrete	Hardwood
Nylon	★★	★★	★★	★★	★★	★★	NR
Steel	★★	★	★	★	NR	NR	NR
Felt	NR	★	NR	NR	NR	NR	★★

★★ = Best Performance ★ = Acceptable Performance NR = Not Recommended

Steel glides are not recommended for light colored floors.

The following factors affect the performance of any glide:

- Floor Quality – Materials and manufacturing processes for a specific floor type can vary considerably depending upon the manufacturer and product grade. Floor grades with higher stain and abrasion resistance will typically perform better.
- Floor Preparation – The quality and frequency of application of the floor finish will significantly affect the amount of wear. A high quality finish will act as a lubricant between the chair and floor to minimize wear.
- Floor Maintenance – Any glide material will leave marks if the floor is not properly cleaned. The use of walk-off rugs near entrances, along with frequent cleaning of the floors, will significantly reduce damage to floors. Steel glides should not be exposed to wet or damp floors.
- Damaged Glides – Periodic inspection of glides is critical to preventing floor damage. Glides that are damaged, worn or have embedded debris should be replaced immediately. Felt caps wear faster and should be replaced frequently.

General Information

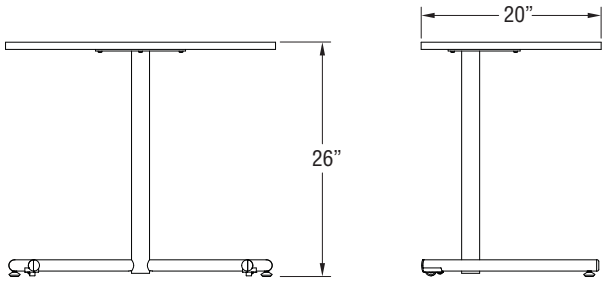
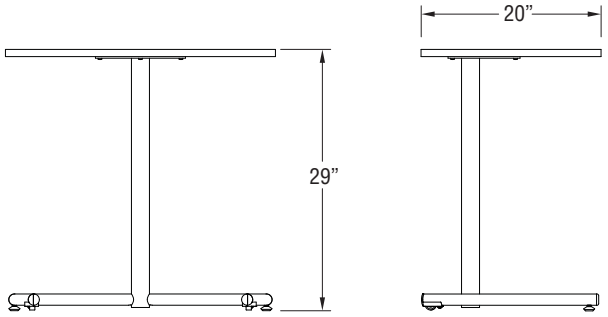
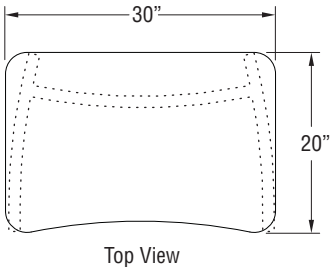
Ruckus™ Desking







RUCKUS DESKING

Fixed-Height Desk – Single-Post Cantilever
Frames are constructed with 2" and 1-1/4" by 14-gauge steel tubing welded to a 7-gauge steel plate. Frame shall be nickel-chrome plated or finished in powder-coat paint after all welding processes are complete.

Rolling Base Model (wheelbarrow)
Rolling base model includes two rollers located on the non-user side of the frame with two swivel glides located on the user side for ease or mobility. Roller will be constructed of two piece molded polycarbonate housing with steel axle supporting a 1-1/4" diameter wheel constructed of high impact styrene and secured to base frame with a 1/4-20 x 5/8" screw . Cantilever frame shall include cutouts to encapsulate roller assembly.

Swivel-type polished zinc-plated steel, nylon plastic, or felt glides. KI recommends consulting with the floor manufacturer for specific glide recommendations.
Note: Felt glides increase product height by 1/4".

Top
Top consists of high-density particleboard core covered with .030" high-pressure laminate top and a 0.02" phenolic backing sheet and 73P polypropylene edge with a finished top thickness of 3/4". Worksurface includes a curved front comfort curve on user side and 2-3/8" radius corners. Worksurface measures 20" x 30".

Glides
Swivel-type polished zinc-plated steel, nylon plastic, or felt glides. KI recommends consulting with the floor manufacturer for specific glide recommendations.
Note: Felt glides increase product height by 1/4". (See Seating General Information for General Guideline for Glide Selection.)

Book Bag Hook
Optional book bag hook is formed from 1/4" solid wire rod. Chrome finish provides long lasting wear resistance. Hook fastens to underside of laminate top with two #12 x 3/4" Phillips pan-head screws.

Testing
Ruckus desking components originate from ISO 9000, ISO 9001 or ISO 9002 registered facilities. Ruckus desking is designed and manufactured to meet or exceed required ANSI/BIFMA X5.5-2014 Desking.

Ruckus Desking

General Information

Ruckus™ Storage

RUCKUS STORAGE

Assembly
All units are shipped fully assembled with the exception of casters or glides. Casters or glides are shipped loose and are assembled in the field. Units are shipped upside down for ease of end user to install casters or glides.

Shell Unit
The shell is made up of one common laminate top, mounted to the underside are vertical steel panels consisting of two outer end panels and one or two center panel(s). One center divider is screw mounted in each section to separate the front and back sides. All panel bottoms are mounted on one common steel base.

Overall size with casters or glides included:
Nominal vs. Actual
36w x 24d x 36h units:
36-1/8" wide x 24-3/8" deep x 36" high
36w x 24d x 42h units:
36-1/8" wide x 24-3/8" deep x 42" high
54w x 24d x 36h units:
53-5/8" wide x 24-3/8" deep x 36" high
54w x 24d x 42h units:
53-5/8" wide x 24-3/8" deep x 42" high

Laminate Worksurfaces
The laminate worksurfaces shall be 1-1/4" thick and shall consist of a particleboard core with a HPL surface. 74P (2mm PVC-free) banding is applied to the edges. All tops are pre-drilled for mounting of end panels, center panel(s) & center dividers and assembled in the factory.

Panels
Each 1" thick panel shall feature a double-wall steel construction. The outer panel shall be 20-gauge material with double flanges formed on both vertical edges and single flanges formed on the top and bottom. The vertical edges of the outer panel shall have an 18-gauge reinforcing member welded in place to provide structural integrity. The inner panel shall be 18-gauge with double flanges formed on the vertical edges and single flanges formed on the top and bottom edges. Two keyhole pads of 16-gauge shall be welded into the top of the end panel to interface with shoulder screws for mounting to the laminate top. The outer and inner panels shall be spot welded together, as well as fastened together at the bottom with the threaded inserts that accept the mounting bolt for the base. Bonded to both surfaces within the panel shall be a lightweight honeycomb core material to improve panel rigidity. All panels shall feature pre-punched holes for connecting the center dividers, shelves, coat hook, hinge mounts and slot for lock engagement.

Center Divider
One center divider is screw mounted in each section to separate the front and back sides. This is constructed of 20-gauge material with 3/4" side flanges for mounting. The divider is designed to not allow removal unless access is available on both sides. This acts as a security feature when locker doors are used.

Bases
The 1 1/8" thick base ties together the panels creating the bottom and complete structure. Bases are 18-gauge steel. Each base consist of an 18-gauge reinforcement strip on the front and back side of the base bottom. Each reinforcement strip is spot welded in place. Each strip consists of two 1/2" weld nuts on each end to except the caster or glide stem.

Casters or Glides
The unit can be specified with casters or glides. Casters or glides do not extend out from below the unit shell. Both caster and glides have 1/2" diameter threaded stud to mount to the bottom of the base and are interchangeable.

Casters:
All caster bodies are twin wheel hooded design with 2-3/4" diameter wheels. Two casters will have a lock and two will freely swivel. Casters will be black.

Glides:
All glides are 2-3/4" telescoping adjustable glides. Glides shall be made of two-piece construction. Both pieces shall be made of durable nylon. Each glide has a white base with a black body.

Hooks
Utility hooks are made of metal with a grey finish. Each hook is attached to the interior sides of the opening using two #10 tapping screws.

Doors
The doors are single wall construction with a structural hinge channel running the length of the door. Self-closing European style hinges with 110-degree opening, provide 3-way adjustment of door to ensure consistent gapping and operation. The steel door is standard with a lock and is specified with one of the lock options (see lock section below). If left or right designation is noted left or right specifies which side it is hinged on. All doors are inset.

Door Pulls
A door pull is only available when the **standard key lock** is chosen. One pull type is available.

Beveled pull: made from cast zinc. It mounts by use of 2 machine screws to a steel door. It is available in a brushed zinc or painted black finish.

Shelves
All fixed shelves are 3/4" thick with flanges, front and back, constructed of 22-gauge material. Each shelf is screw mounted in four places with # 10 screws into the outer panel and center panel to create separation between modules.

Locker - Open Units
Each open locker unit includes two hooks per opening.

Interior clearance:
36" high unit:
16-1/2"wide x 11-3/4"deep x 30-1/2"high
42" high unit:
16-1/2"wide x 11-3/4"deep x 36-1/2"high

Locker - With Doors
Each locker with door unit includes one locking door and 2 hooks in each section.
Interior clearance:

36" high unit:
16-1/2" wide x 10-7/8"deep x 30-1/2"high
42" high unit:
16-1/2" wide x 10-7/8"deep x 36-1/2"high

Cubbies
Each cubby unit includes two fixed shelves per section.

Interior clearance:
36" high unit:
16-1/2" wide x 10-7/8"deep x 9-5/8"high
42" high unit:
16-1/2" wide x 10-7/8"deep x 11-5/8"high

Cubbies - With Doors
Each cubby with door includes one locking door and two fixed shelves per section.

Interior clearance:
36" high unit:
16-1/2" wide x 10-7/8"deep x 9-5/8"high
42" high unit:
16-1/2" wide x 10-7/8"deep x 11-5/8"high

Bookshelves
Each bookshelf unit features two fixed shelves per section.

Interior clearance:
36" high unit:
34" wide x 10-7/8"deep x 9-5/8"high
42" high unit:
34" wide x 10-7/8"deep x 11-5/8"high

Locks
Locks are available anywhere a door is used, with four locking options for Ruckus Storage:

1. **Standard key lock** (comes with pull option only) - The standard lock is a high-security double-bit lock. The double-bit lock offers superior security when compared to a single-bit lock. Units are standard with random keys in a range of 994 different numbers. Specific keying combinations are available at no additional charge (this information must be included with order). Locks can be master keyed.

Please see the Accessories section of this price list for order information on master keys, extractor (core removal) keys, key blanks, cut keys, core sets and key sets. All standard locks have removable and interchangeable plugs. This feature allows for onsite custom keying. Units can be supplied with lock plugs installed or shipped separately. To install or remove lock plugs, a unique key is required. This key is the extractor (core removal) key and can be found in the Accessories section. Contact KI Customer Service to order lock accessories. To order plugs for field installation, specify "lock plugs not installed" on order. Order must specify total quantity of specific key-number locks.

Example: 30 plugs
3 keyed alike
10 keyed alike
17 keyed alike

2. **Padlock** - Robust zinc housing allows the end user to apply their own combination lock. Lock is backed with a stainless steel escutcheon plate to protect the paint finish.
3. **Combination lock** - A 4-dial combination lock that allows user to access locker without the need of a key. All locks are shipped with a factory set code 3333, combination is set by the end user or facility manager. In the case of lost or forgotten codes, a master key override will unlock the unit and allow the lock to be recoded. Combination lock features solid zinc construction. And a four digit combination allows up to 10,000 unique codes.
4. **Digital lock** – Stand-alone battery operated lock allows user immediate and simple keypad access without the need of a key. All locks are shipped with a factory set code 2244, the new access code is set by the end user or facility manager. Users have the flexibility to set and change a personal entry code, while a preset master code ensures that supervisor access is always available, or in an emergency, the key code can be overridden.

Features:
•Up to 80,000 operating cycle's battery life
•Low battery warning
•Battery failure key override
•8-digit master code and 6-digit sub-master codes
•4-digit user code (10,000 unique codes)
•6-digit technician code
•Code changeable
•Not suitable for chlorinated environments
•Can be programed for single use set at time of use or fixed combination mode

Finish
Units are offered in numerous powder-coat colors. Powder-coat application is a hybrid epoxy. Paint is baked on to provide a scratch and stain resistant finish. Shells and doors may be specified in separate colors for no upcharge. Mechanical components are plated or finished with other protective coatings.

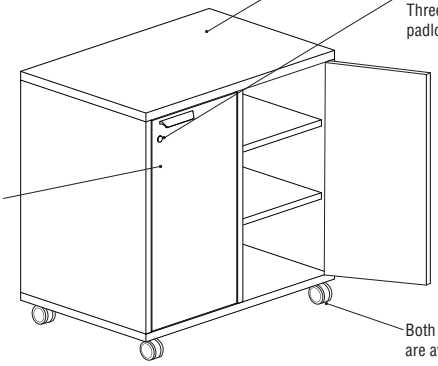
Ruckus Storage

All steel design allows for greater durability and cleaning.

Laminate worksurfaces comes standard on all storage units. Available in all KI laminates.

Key locks come standard on doored storage. Three additional locks available, combination, padlock, and digital.

Door finish can be specified independently of shell to allow for greater brand identification.



Both casters and glide options are available.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern. Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
• The absence of the □ indicates that no choice is required.
• Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select base option.

4CW	- 4 black casters
4GB	- 4 black glides

Ⓒ Select top laminate surface.
Refer to color addendum at ki.com or KI Fabrics & Finishes binder.

Ⓓ Select edge color.
Refer to color addendum at ki.com or KI Fabrics & Finishes binder.

Ⓔ Select shell color.
Refer to color addendum at ki.com or KI Fabrics & Finishes binder.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern. Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern. Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.
