We furnish libraries!

Being a special manufacturer for library furniture, we are also competent for the workmanlike planning and exclusive furnishing of libraries, regardless of type or size or location.

Whether complete furnishing or supplementary items, whether public or scientific libraries – we are always the right partner for all kinds of library-specific questions for furnishings.

Contents

Get inspired, too, by our enthusiasm for libraries! We are already thinking about tomorrow's libraries. With new ideas for presenting and integrating new media. Make your media supply a show. Point out what is important for you! Library media are usually small. Use prominent furniture to give them the perfect frame and to attract the desired attention. Smart design ideas will also fill your users with enthusiasm. Today, a library is much more than shelves and boards.

The Counter

This is and remains the eye-catcher of your library. You welcome your users here and also say goodbye. In future library concepts, too, the counter will play a central role. A counter has high functional, ergonomic and design demands and thereby underlines the statement of a modern workbench in the information age: this is a place from people for people.

Our new System Counter INFORM is informative: not only through friendly personnel, but also with the help of integrated presentation modules. Folder cabinets enable an organized presentation of event tips, presentation cabinets show new acquisitions.

INFORM is on form: its modular construction allows a very individual adaptation to functional and design requirements, as well as to architectural conditions. You will be able to reconstruct and add on, today and in years to come. You may sit or stand, can electrically adjust your ideal working height, and can book via RFID.

INFORM is fit for a new generation of service-oriented libraries.

System Counter INFORM

INFORM is a modular piece of furniture. Straight and rounded elements can be used as single counters or may be randomly combined. The special design of the table tops and side walls create a continuous surrounding frame which unites the single elements into an expressive optical unit. You can combine modules in seating height (740 mm) and standing height (1000 mm). Elements with electro-engine provide continuous height-adjustment.

Table tops 800 mm deep and 40 mm thick as well as side walls frame the back-leaning wooden fronts with closed base boards. Alternatively, there are wooden fronts with bag trays available or acrylic glass fronts with indirect light upon request. Stability is gained under the counter by reset metal feet with special consideration of the required legroom.

Your individual scope of design and functional requirements is well supported by accessory options such as counter screens, counter top parts, bag trays, cabinet and presentation modules, office containers, computer consoles, cable channels and monitor arms.

Counter working tops, side walls and fronts from wood, veneered/plastic coated. **1 2 3**
Base boards height-adjustable in the middle, wood with stainless steel appearance, reset metal feet, lacquered. ●

Rectangular Counter

INFORM's rectangular modules form the basis for a straight design. A single counter itself is already an ideal solution for small rooms. Our rectangular counter can be combined with corner counter, circle segment counter, advisory counter, lift counter and the complete accessory programme. Combining different heights for seating and standing is possible with our step counter from page 11.

2 x rectangular counter in combination with folder cabinet; see page 14

Corner Counter

True comfort and more freedom of move

The monitor is a central part of the booking counter. A monitor arm definitely improves the required functions at the counter. You will have more freedom to work and will gain space on the working top. The monitor is easily adjustable and can also be turned towards the client.

A special drilling for the cable conduct will be made to ensure a reliable installation. Thereby all cables will run under the counter top, and if required, the monitor arm can also be removed and exchanged against our standard cable conduct outlet.

Timo Mildenberger, product development

In combination with the corner counter we create an appealing angle-shaped system. There is no optical interruption of the front, and the integral design with the continuous frame will be kept.
For combination with rectangular counter, advisory counter.

Circle Segment Counter

90° Circle Segment Counter

You are looking for an angle-shaped counter in L-shape and want to use the corner space between the two sides for a complete and ergonomic workstation? This is the perfect application for the 90° circle segment and its qualities! Also in combination with other circle segment counters, rectangular counters, advisory counters, lift counters and cabinet modules.

Combining different heights for seating and standing is possible with our step counter from page 11

45° Circle Segment Counter

Make a profit from the verve of your furniture. The 45° circle segments can be easily combined and each offers a spacious workplace, but they can additionally be supplemented by rectangular counters, advisory counters, lift counters and cabinet modules. Adding several elements in a row creates a large, bent arc which will put a remarkable, formal emphasis even in large rooms. Combining different heights for seating and standing is possible with our step counter from page 11.

Advisory Counter

Your focus on advice requires people which exude openness and who show communicative skills. Also does this apply for furniture. Our advisory counter enlarges your work area by a short table element. This will support you when inviting to small discussion groups and will convey the visual impression that you are deeply involved in your users' questions and wishes.

2 x 45° circle segment counter combined with folder cabinet; see page 14

Lift Counter

Changing from seating to standing while your work is good for your health. Both ways have their advantages: We are comfortable and concentrated while sitting. Standing discharges our back, we are at eye level with our customers, keep eye contact and are much flexible to move in physical work and when handling books.

With our electro-driven lift counter and its continuous height adjustment, it is now up to you to decide how you want to work and to simply push the button for the desired height between 680 mm and 1180 mm. Even if you decided for a complete standing counter, our lift counter modules will give you the advantage to adjust the individual working height for each workstation separately. This will also apply for a counter at seating height.

Besides all these general ergonomic features, our lift counter is particularly distinguished by its very safe and customer-oriented functional design. It comes as a double construction with a closed, height-adjustable body which is framed by a second ground-touching enclosure and thereby excludes possible safety risks such as squashes or bruises in a reliable manner.

A customer-oriented attachment which is integrated into the module can be used as bag tray or as prominent presentation for folders and media.

Combination examples

Step Counter

Why not vary your working heights? INFORM offers the possibility of combining seated and standing work in one counter system. Through this change option, these variations offer a standard seated workplace on the one hand and on the other, the employee will be at eye level with the user while booking or advising.

Order No. **Standing 1000 mm**

Counter Top Part

When you are interested in concentrated work and where the handling of media is secondary, a counter top part is the perfect and sensible supplement to a rectangular counter. The top part was designed for single use as well as for additions. An additional height of 260 mm adds up to a standing counter height of 1000 mm.

This is the perfect way of connecting counter top parts on seating counters to standing counters (see pic.).

Variable Furnishings

Counter Screen

A screen structures the counter, shows you where to go and can also hide cables. The picture shows a width of 600 mm, but there are also larger screens available which have more effect and offer a larger labeling area. The screens can be individually attached to the wooden fronts of rectangular counters, but cannot be combined with bag trays. SchulzLabelingService upon request, H 430 mm.

Veneered wood/
Plastic coated 1 2 3

A- 600 mm / T- 800 mm
Acrylic, Frost white glazed B 6951 0[.]0 IN 0- 1000 mm / 2- 1200 mm

Counter Top Part with Screen

Comparable to the counter screen, the counter top part also structures the counter system and points directly to the point of contact. Additionally this practical solution offers a surface at standing height where you can make notes. And here is one essential advantage for those who like experiments: this counter top part will be fixed to the counter by double-sided tape and can be varied individually later. The picture shows a width of 600 mm, but there are also larger screens available which have more effect and offer a larger labeling area. The screens can be individually attached to the wooden fronts of rectangular counters, but cannot be combined with bag trays. Veneered wood/plastic coated, 1 2 3 SchulzLabelingService upon request, H 490 mm, insert height 235 mm.

0- 1000 mm / 2- 1200 mm
4- 1400 mm / 6- 1600 mm

Counter Top Part with Bag Tray

One top part – three functions: screen, top part, bag tray!
The presented width of 1000 mm is variable. Using wider or smaller top parts will create totally different effects. The counter top part with bag tray can be individually attached to the fronts of rectangular counters. It will be firmly screwed to the counter board and cannot be combined with front bag trays. Veneered wood/plastic coated, 1 2 3 SchulzLabelingService upon request, H 490 mm, insert height 235 mm.

Order No. B 6921 0[.]0 IN [.] Width

Showtime!

We believe in the future of libraries as a place of encounters. Also books will continue to play an important role there. New books have to stand out – that's what makes a library. And of course, the perfect place would be near the booking counter. Why not directly on the counter? And your users are curious to learn in your library what goes on in their town and country. Show it by using the integrated folder cabinets of INFORM. And the best about it: space which you use for presentation towards the front is available as additional storage space or work area at the back.

Hartmut Michalke, product management

Book Trolley Garage

Clear up behind your counter and give your book trolley its own parking space. You will not even lose space when applying the double function with additional media presentation towards the customer.

The front-side shelf boards are flexible in adjustment as with the RATIO shelves, and can also be slanted for presenting your new acquisitions. DVDs, too, can be placed in the multimedia tub or multimedia manger.

Our book trolley garage can be directly combined with rectangular counters, circle segment counters and lift counters. The body is open at the back for parking a book trolley. Insert height max. W 920 mm, D 585 mm, H 1080 mm. Veneered wood/plastic coated. **1 2 3**

Seek and ye shall find it.

Changing from a production to an information and service society has had a lasting effect on our working environment. More and more knowledge and information are available from electronic sources and have to be made accessible to the user in addition to printed media.

We offer you the suitable research furniture. Working stands with signal effects: here I am, ask me! Proven media furniture and table shapes which optically underline what they can. Single pieces of furniture which invite and table combinations which close off.

Whatever you're looking for, we have it!

OPAC Working-Stand CLASSIC-LINE

Demanding design, absolute stability and high functionality are combined into one unit with this short-time research workstation. Regardless if you retrieve your data via cable from a central computer, or if you want to grant access to this computer, or if you want to protect you PC from unauthorized access, this working stand adapts optimally to all challenges.

An alternative version in seating height is available instead of the working stand.

OPAC Working-Stand makes library history.

With several thousand successful applications it is now asserting itself under the name CLASSIC-LINE over its competitors from our own house – see also next pages. Our CLASSIC-LINE working-stand series is a synonym for stability and signal effect in the true sense of the word; and it offers this tad more of function with its generous, ergonomically shaped keyboard level.

OPAC Working-Stand FLAT-LINE

The clear line of the solid bottom plate with integrated kick-strip as well as the functional and ergonomic division of keyboard and monitor level determine the objective, modern design of this timeless series.

In order to adapt this piece of furniture to the respective system requirements, different variants are available with cable covers in stainless steel, computer console, lockable computer case or special shelves for mini PCs (e.g. Thin Client).

The monitor is free-standing, alternatively with a console for attachment to the stand.

Top part for stand and computer case from veneered wood/plastic coated. **1 2 3**

Frame, computer console, case door, shelf board from lacquered metal. ●

W 700 mm, D 590 mm,

Keyboard height 965 mm,

Monitor height 1065 mm

That's alright!
 CLASSIC-LINE on the previous page and our FLAT-LINE series are not that far apart. FLAT-LINE comes along a bit slimmer, stricter, more modern. Unfortunately we cannot show you the essential common ground of both programmes in pictures: it is the absolute stability of the solid bottom plate which will raise your enthusiasm for both models. Quality is the deciding argument for both series.
 Markus Münch, sales office

The FLAT-LINE working-stand series is also available with height adjustment. The stand top can be easily lifted to the desired height just like an office chair. As the height of the keyboard level can also be adjusted from 670 mm to 1105 mm, this piece of furniture is suitable for usage while you are standing or seated. In accordance with the individual system requirements we can provide you variants with flexible cable conducts, lockable CPU cases as well as shelves for mini PCs (p.e Thin Client). The monitor is free-standing, alternatively with a console for attachment to the stand.

OPAC Working-Stand INFORM

Its name is its bond. Not only does our furniture inform, it is also in-form. While matching the successful design of the new system counter INFORM, this high desk also offers attractive options for research, combined with the ergonomics of offset keyboard and monitor levels. A lockable case hosts the CPU for which sufficient ventilation is provided by the recoiling base and the sophisticated air and cable conduct. The monitor may be placed at random; alternatively a console is available for mounting on the furniture (see page 21). This piece of furniture can be placed free-standing as it can be equipped with a back in a different colour.

PC-Terminal GEMINI

Economic usage of space and central cable conducts stand for this principle of opposite, laterally moved workstations. Varying table depths and optional blinds give this table series all possible requirement profiles from a short-time research to a concentrated job at a computer workstation.

The tables can be permanently combined by combination sets; small printer tables or generous half-round tables may easily be attached.

PC Terminal GEMINI with CPU cases

I want to see it, too,

An oval table combination as shown on the left with a total of 4 monitors does not only offer two opposite individual workstations but also two places at the end sides where several people can have access at the same time.

Anja Vetter, purchase office

Simply universal

There is nothing as simple as a table. But today's library table can do a lot more than you will notice at first glance. It is no longer a simple "reading table". Electricity and data have to be delivered, cables hidden, computers installed and above all, it has to stay flexible.

There have been hardly any lasting revolutions in the last years when it comes to table shapes. Proven designs have remained and are currently very update with geometric forms and clear lines which have always been defined by the tables' functions.

The special functionality of our system tables is represented by the numerous combination options and also by the large accessory programme for individual specifications.

Therefore: simply universal.

Why System Tables?

A table is a table. But a system table is a table which can be combined with other table shapes.
Loose arrangement or fixed combination, now or later.
And the accessories, too, such as hidden cable conducts or pre-installed table lamps as well as socket units make this table series a system.

Reading Desk Series INFORM

Of course, we cannot re-invent the reading desk, but we can re-design it! Usually a table has four legs but not in this case. That's what makes it remarkable and extraordinary. The design of the frame strictly follows the clear lines of our new system counter INFORM. The surrounding design of table surface and side panels as well as the offset front fulfil all constructional requirements of a desk and have been reduced to the fundamentals. That's what makes it beautiful. You have many accessory options for your individual demands, such as office containers, computer consoles, cable conducts, cable outlets or monitor arms (see page 16/17). The table can also be combined with the modules of the system counter INFORM.

Made for the user – and considering the employees!

Of course, our office furnishings such as desks or organizing containers are also highlights in employee offices. They match the shelving systems perfectly in colour and shapes. Even table legs are available in two variants as are the shelves.
Sight protectors can be installed at the sides or longitudinally at the tables.
And the best about it: when mounted upright these blinds make a visible optical division between the workstations; and if mounted downright they convert your table into a small counter.

Order-No. B 8452 003 XX

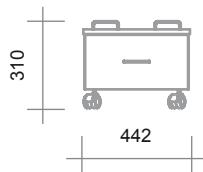

Our light doesn't bend.

There are numerous table lamps on the market. Also in DIY superstores. And it can happen that the bulbs you need will be more expensive than the lamp itself. Crazy! But definitely not suitable for libraries because constantly broken. Therefore we created and designed our own lamps. Stable lamps for the library! And they have the correct light which ophthalmologists recommend and they come with an energy-saving technology which has proven for years. In our showroom we like to lift the whole table by the lamp-arm in order to show what makes our lamps so special: our light doesn't bend!

Made for Sitting, Lying and Inspiring...!

The library of the future will not be recognized by its shelves. But it will be noted for its areas where the quality of your stay plays the important role. There is a demand for lounge furniture; "a library like a living room" says the specialist press. You can underline this statement with smart seating furniture in your library. Coloured easy chairs are 'eye-catchers', optical highlights and represent your invitation to have a seat and feel like home.

Beanbag chairs are good, old friends in libraries. However, this innovative collection creates something new and exciting from something very familiar. Soft and caressing surfaces provide for totally opposite materials and lead to a true, haptic surprise effect.

Beanbag chair MOON

Stylish floor island in moon look and shape. A true 'eye-catcher' – not only next to the reading rocket on page 59. It has generous dimensions which are suitable for children and grown-ups. Soft, washable fabric cover from polyester, separate cover and interior cushion, Ø 1060 mm, H 500 mm

Order No. B 9660 000 XX 1 each

Beanbag chair TRUNK

Attention, this is no firewood! But that's what one could think when looking at this deceptively genuine-looking collection and will be surprised by a comfortable lounge cushion.

Its generous dimensions make it suitable for both children and grown-ups. Soft, washable fabric cover from polyester, separate cover and interior cushion, Ø 1060 mm, H 500 mm

Order No. B 9652 000 XX 1 each

Couchroll TRUNK-SPOT

Furniture for sitting and lying with high decoration value. A complete trunk for resting, relaxing, reading..... Its large dimensions make it suitable for both children and grown-ups. Soft, washable fabric cover from polyester, separate cover and interior cushion, Ø 600 mm, L 1200 mm

Order No. B 9651 000 XX 1 each

Stool TRUNK

Original seating furniture with surprise effect – you sit very softly. Soft, washable fabric cover from polyester, separate cover and interior cushion, Ø 400 mm, H 450 mm; this makes it comfortable for grown-ups when in the children's area.

Order No. B 9650 000 XX 1 each

Kids learn when playing

Or in other words:

Playing means learning for a child! You can support the development of your youngest readers and offer them suitable worlds where they easily unfold their fantasy.

We toyed with a lot of ideas for that. Enchanting furniture: for pilots, captains, pirates, princesses, knights and astronauts. See what happens in our thematic worlds and find out about the reactions of tomorrow's visitors – the children.

Nominated for the German Design Award 2011.

Above the Clouds

Kids are curious and want to discover the world in their own way. Send them on a discovery trip with the reading plane. The more playful this trip in your library is the better. It is fantastic to dive into unknown worlds with a plane and to bury oneself endlessly above the clouds.

The divided fuselage allows the little pilots an easy access. The dashboard serves as comfortable book rest. The rear, flat back gives you room for the books of your youngest readers whereas the books for the older kids can be placed in the high front body.

The direct assignment of two reading tables in the shape of the wings is extremely practical. This creates exciting selection and reading options while standing or sitting, with a direct relation to the storing furniture.

For safety reasons the propeller is fixed.

The plane can be placed free-standing and be randomly combined with supplementing accessories such as seat pillars or additional picture book boxes.

Picture Book Box

With 4 shelves 330/330 mm
for approx. 110 children's books.
Wooden body, plastic coated,
incl. grooved rubber mat.
W 720 mm, D 720 mm

Order-No.

Height 320 mm	B 9620 100 [-]
Height 520 mm	B 9620 000 [-]
Height 720 mm	B 9620 200 [-]

Available colours and design on wheels on page 58.

Voyage of Discovery or Children's Corner?

There is not much room for your kids' library? Well, you don't need much. The airplane itself offers already 10 shelves for picture books, 2 tables, 6 seats, a pilot seat with tray and a lot of fun to go on a voyage of discovery instead of sitting in a shelving corner for children!

Timo Mildenberger, product development

Summer, Sun, Beach and a nice Picture Book

Design your kids' area like a beach and your youngest readers will feel like on vacation there. The prominent picture book boxes are shaped like sailing boats and have a signal effect. The hull is ascending to the front and underlines the dynamics of ships giving you the option to place the books by age: the flat rear for the very young ones – the bow for the older ones. The reading ships are available with either 6 shelves or with 4 shelves and an additional table board. The direct assignment of the reading tables to the storing furniture creates optimum exciting selection and reading options while standing or sitting.

The reading ships can be placed free-standing and be randomly combined with additional beach accessories. Wooden landing stages for sitting underline the outdoor character of this water world and invite to immediate reading. Square picture book boxes in various heights and round seat pillars add to the combination options, too.

My library is my castle!

Princesses, knights, castles and fairy palaces haven't lost their attraction in the age of games consoles. And amongst us grown-ups: Such a castle tower is also perfect for storing books, from both sides! The castle will look great from the front as well as from the back. The shelf boards are height adjustable so that various media formats can be placed there.

A sturdy drawbridge in the shape of a table creates knightly, generous reading, play and work options from both sides for this thematic world. The shelf itself is integrated into this overall concept through side panels with theme-related motives.

Have you ever built a castle?

Castle tower and archway can be combined in numerous ways, also diagonally. Let the displayed combination options inspire you and become an architect yourself for your individual reading castle. The open archway can be combined with seat pillars, seat cushions or picture book boxes in different heights for the various age groups. 4 archways form a closed castle (see combination option 5).

Attention: Pirates ahead!

In the wink of an eye pirates have captured kids' hearts and their symbols entered our kids' rooms. You will definitely see bright eyes when children discover the pirate fleet in your kids' area.

The pirate nest unites the product variety of the beach landscape on pages 42 and 43 with the combination options of the castle world on the previous pages to a true adventure world in your library.

Imagine what treasures can be discovered!

three, two, one- ignition!

Reading and research place for young explorers and their brilliant ideas. Pull up and go round with this eye-catcher in your kids' library. The 3 circular workstations are separated from one another by the rocket body and each has a sufficient size for two persons to work on it at the same time.

The rocket can be placed free-standing and be randomly equipped with thought-out accessories for each individual mission. As an example, you can create suitable internet research workstations for kids by using integrated computer boxes, or build a significant reading landscape with a central table through combining it with picture book boxes.

Combination sample Reading Rocket

Traffic white [1]

Flame red [2]

Ice blue [3]

Olive wood decor [4]

Please add selected code to the last digit of the Order No.

Reading Rocket

Free-standing or random combination with the shown accessories. With 3 table boards W 1385 mm, D 600 mm, table height 580 mm, metal table feet silver-grey lacquered, wood plastic coated, H 2285 mm, diameter 1900 mm

Modular Boxes

Modular box system from durable, laminated birch wood, multiplex 15 mm. The modules can be used individually or be combined with each other into a creative book landscape. The easy installation of the elements also leaves enough room for later changes and add-ons. The boxes can be placed upright, but also on their side. Be creative and invent your own book sculpture. Don't be afraid: if you don't like it anymore, you can disassemble it very easily and build something different.

Presenting your books means portraying your library

Make a stage for your books. Show what is important for you! Most of the media in a library are fairly small. Noticeable furniture creates a perfect frame and attracts the desired attention. Make your users enthusiasts with these smart design ideas. Your readers expect books and shelves. Surprise them with our presentation towers. Today's library is much more than shelf boards and long shelves. Create an inviting atmosphere through friendly furniture. This will support the number of visitors as well as the working climate.

Book Tower LABYRINTH

Usually books are placed in shelves. But „normal“ is not always desired and therefore we invented a special eye-catcher for your novels, paperbacks and mangas in a tower-shape concept:

The design of this brand-new presentation furniture is thought outside the box, but quite obvious and natural. Boards and niches are arranged in a logical and exciting relation and make the tower a perfect example for the often quoted design theory:

Form follows function!

Book Tower LABYRINTH

Wooden body, plastic coated. outside traffic white, inside flame red. With a total of 12/20 boards.

W 370 mm, D 170 mm, H 305 mm for approx. 180/300 paperbacks.

Total width W 580 mm, D 580 mm, H 1100/1750 mm, on steerable wheels, 2 with stops

Base: stainless steel decor

Order No. B 7490 003 XX with 3 height units

WOW! Presentation Table

This multiple table series is the perfect marketing for your library. Three table heights compose the flexibly playable stage for your presentation. Two-step combinations can be placed at the wall; double-sided steps can be arranged free-standing (see picture). We staggered the table lengths of this modular system in steps of 10cm and adapted them for each other so that the lower table is 10cm shorter and can be inserted underneath the larger table. The partition walls can be contrasted in colour, and can also be equipped with graphics or lettering for accentuating the piece of furniture as can the frontal sides. There is also the option to combine the WOW! presentation table with book stands on a presentation board at the frontal side (see picture).

Presentation System WOW!

A library is life, a real world with encounters, communication, events and culture – with a special architectonic aspiration as decisive factor for an inspiring location. It is inviting, shows what it has and does not only offer the possibility to read and learn, but at the same time is the meeting point of the community or school: a library is life!

Get your inspiration from our enthusiasm for libraries. Because we already think about the functions of tomorrow's libraries. Discover new ideas for presenting your media. Give your media stock a stage. Show what is important to you and advertise your novelties. Media in a library are usually small. We have new presentation furniture to make it big with....

Mobile Seating and Presentation System MIKADO

A sculpture, generous presentation space, variable seating accommodation, and all that in one piece of furniture?

MIKADO is surprising on several levels. It attracts the views, but does not block the overview which is similarly important for the room impression of your users.

The three-part system consists of two boxes which are combined through swivel joints via a stacked frame. The boxes on wheels serve for presenting media and can also be used for sitting and cross-reading.

The frame offers additional presentation options for media or graphics and labelling.

In case you need this piece of furniture for an event, simply turn the frame onto one of the two boxes and move it piggy-back with the box.

Partition and Exhibition System FLEXUS

FLEXUS brings life into your furniture. And organization and information, too. This exhibition system has been particularly designed for the higher demands of libraries and is partition and presentation area at the same time. With FLEXUS you can realize such projects as free-standing advertising columns, covered pillars and large-size poster hoardings, as well as protective partitions, separation of the copy machine or a designated guidance system. The curved wall from perforated sheet metal communicates to both sides and can be installed without any tools. Accessories and various presentation options as noted below.

Found it?

The entrance of a library is comparable to the cash desk zone in a supermarket. It creates waiting times; one starts looking around and grabs for what is available although you actually didn't look for it. Whatever you present here, someone will definitely be interested in. And this exactly what many of the users like about your library: they will always find something exciting even if they were looking for something totally different!

Barbara Hohm, librarian

Combination samples Presentation Grid

Compatible to your shelf!

Presentation grids are timeless companions in a library. They come with an insensitive, chromium-plated surface which has a neutral colour and can be randomly combined with other existing furniture. And the accessory programme, too, is flexible for the face fronts of our round-steel shelving systems. This is our offer to you for highest possible flexibility in order to present your highlights.

Display Stands

We are offering you these mobile display stands which match our shelving systems and give you the option of strictly keeping the design of your furniture and furnishings.

The display stands have been designed for double-sided, individual equipping with accessories for shelf front sides such as hanging cages, newspaper holders, book stands, front side shelf boards; slanted boards etc. (see page 67 and our **SchulzShelvingSystems Accessories Catalogue**).

This makes equipping the display stands absolutely compatible with the corresponding shelving systems, and it can be randomly composed as well as changed.

- Lacquered metal with 4 lockable wheels, W 568 mm, D 460 mm

Please see our product planners for **SchulzShelvingSystems** for more models and designs besides these examples.

For large books and great speeches

In practice, our atlas stand is often re-designated to a lectern. And in fact it is beautiful from all sides, front and back. Clear lines mark clear statements and in order to avoid waving your hands about, you can express inner peace by safely grabbing the handles on the stand top.

Tanja Fährdrich, planning

Atlas stand

Over-size formats such as atlases or books of pictures require special solutions for their presentation and storage. Our atlas stand has a slanted top with book stop for a comfortable and careful presentation of books with large formats. 4 adjustable shelf boards provide organization on all levels. This representative piece of furniture has a visible back and can also be placed free-standing. Thematic Towers

Our mobile thematic towers are showing through the broad field of standard shelf furnishings just like proud lighthouses. The spectrum of use for this unique furniture series is also outstanding. The towers can be arranged with the most different areas of the library. They provide the perfect place for your recent acquisitions as well as for particular thematic areas or simply a new poster.

Magazines and newspapers can be individually presented and stored, CDs can be easily seen and chosen.

Also your cloakroom will find a new, open and tidy solution with the respective tower.

Book Stand

Order No.

B 8210 000 XX metal, chrome-plated, for standing or hanging in perforated metal plates
Size 45 mm, W 90 mm, H 140 mm

B 8208 000 XX acrylic glass, for standing
Size 35 mm, W 100 mm, H 150 mm

Flexible furniture is the key!

We are very proud of our idea with the towers. Today's library, this is not just shelves and tables anymore. The towers have proven for quite a number of years. They are large enough to attract attention, but not too big to block your way. They aren't fixed either – they roll and this function underlines their original and true purpose: they want to attract attention and to surprise. Here and there, today and tomorrow.

Bernadette Hempel, planning

Presentation podium

Curtains up for your new values! Show your readers all the new acquisitions you have. Or give a special subject a special area. Podium is available as double-sided version for free placement in **1 2** any room, but also as single-sided item for wall-oriented presentation. Podium boards: wood veneered/plastic coated, **1 2 3** perforated sheet metal, lacquered. ● Optional put-on sign; additional presentation accessories see page 65 top..

Presentation and Information

LED presentation board

You are very proud of your new acquisitions or would like to present different media for one special subject? Our LED presentation board offers you the appropriate frame. It has a perforated metal front which can be equipped and individually combined with all kinds of presentation accessories. State-of-the-art LED technology will definitely attract the visitors' attention, with a minimum of electricity consumption and extreme durability. This LED presentation board is also well suitable to brighten up some less frequented dark corners, niches and hallways.

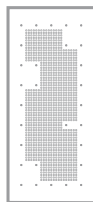

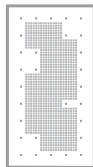

- Comes with 29 LEDs, ready for operation, incl. plug and cable for 250V socket.
- Perforated sheet metal, lacquered; with put-on sign for lettering upon request, presentation accessories see top of page 65

A cabinet for all cases

For decades already, libraries have worked with organizing and storing systems for newspapers, magazines, brochures, music books and sheets and other printed media. There are, however, numerous applications. Our magazine systems, for example, are used far beyond libraries in large companies, firms, chancelleries, medical practices, travel offices, banks, insurances, and clubs and also by tidy-minded private individuals.

Birgitt Fink, accounting office

Newspaper Cabinet

Newspapers or magazines will be stored lying in the open shelves with height-adjustable boards.

A large, easily exchangeable inscription at the individual shelves provides overview and organization.

Wooden body, veneered/plastic coated **1 2 3**

Inner shelf size: W 516 mm, D 415 mm, stacking height 300 mm

Newspapers don't like standing.

They prefer lying. Newspapers have a large format and are not very stable. The more you fold them, the more room they need. Only folding them once and placing them in an open, lettered shelf, is the best way of storing. This gives you an easy overview and if you are lucky, last week's culture pages will fit in there, too.

Spare Parts and Accessories

This is how it works:
 A copy of the magazine front-page is placed underneath the transparent foil of the front flap. The current magazine is placed on the bent edge of the front flap (not under the foil). Open front flap and push in. Now you have both hands free for access to the magazine shelf. And if the front flap is closed, the front-page copy under the foil unequivocally indicates the correct storage location.

Newspaper and Magazine Walls

Newspaper, magazine and brochure wall

Open and inviting presentation aids, too, can be suitable for organizing and for getting an overview. A presentation wall does not only want to archive these media, it does also want to encourage the user to access the existing range of products.

This presenter is available as separate model for wall-mounting as well as several models mounted on a wall board. Using an attachable sign will definitely increase the signal effect of the wall board.

Newspaper and Magazine Towers

Newspaper and magazine towers

Our mobile towers have an open and inviting effect, and they are available in different designs for the presentation and storing of magazines, brochures and newspapers.

The towers are accessible from two sides and are equipped with functional accessories on the sides.

Inner shelf size:

W 480 mm, D 300 mm, H 380 mm

The signal effect of the towers can be further increased by using a flag with inscription.

1 2 3 Wooden body, veneered/plastic coated, W 520 mm, D 640 mm, H 1750 mm upon wheels, two with stops.

Flexible furniture is the key!

We are very proud of our idea with the towers. Today's library, this is not just shelves and tables anymore. The towers have proven for quite a number of years. They are large enough to attract attention, but not too big to block your way. They aren't fixed either – they roll and this function underlines their original and true purpose: they want to attract attention and to surprise. Here and there, today and tomorrow.

Bernadette Hempel, planning

QUERBOX[®], Magazine Flaps in Shelves

Querbox[®] for magazines in the shelf, model ZQB

Our flexible alternative to presenting and storing magazines in a magazine cabinet. The metal magazine box can be placed in any location in a book shelf with at least 250 mm shelf board depth. Minimum space between the shelf boards 325 mm. Fixing comes through stops at the front and back edges for shelf boards with a board depth of 250 mm. The front flap is used for presenting the current issue of the magazine. A non-reflective transparent foil covers a front page of the magazine (not the magazine itself) and is an easy-tracking organizing aid. This system of opening the magazine flap and inserting the medium into the case makes the shelf accessible for both hands. Magazines are stored broadside; printed backs are facing the user.

Stacking height 140 mm, max. magazine size W 230 mm, H 315 mm
 ● Box and flap, lacquered metal, max. three each per shelf board with axle size 1000 mm. W 320 mm, D 260 mm, H 320 mm

Order No. B 8311 000 XX

Other Designs:

Magazine box, Model ZBV, no picture

Magazines are stored standing upright on shelf boards with 250 mm depth. With adjustable back. Stacking depth 140 mm, max. magazine size W 230 mm, H 310 mm. Box and flap, lacquered metal, max. four each per shelf board with axle size 1000 mm. W 238 mm, D 260 mm, H 320 mm

● **Order No.** B 8310 000 XX

Magazine box, Model ZBL, no picture

Magazines are stored lying on shelf boards of at least D 300 mm. Stacking height 140 mm, max. magazine size W 230 mm, H 310 mm. Box and flap, lacquered metal, max. four each on shelf boards with axle size 1000 mm. W 238 mm, D 340 mm, H 320 mm

● **Order No.** 0 3016 010

Shelf with magazine flaps

Magazine flap with bent edge as handle and for presenting current issues of the magazines. The flap itself has a lever mechanism which helps to insert it and also stops it automatically.

Magazines will be stored broadside on extended shelf boards with D 250 mm; printed backs are facing the user.

Max. six magazine flaps high, for shelf axle size 1000 mm. Stacking height 160 mm for shelf board depth 250 mm with DIN A4 format. Flap height 340 mm

● Flap and side pieces, lacquered metal.

one flap with two side pieces without shelf and shelf board

Digital Media

AV Media tray

AV media have become a standard item in the media stock of a modern library. The integration of these media is a highly demanding task for presentation furniture.

Our free-standing media trays offer the correct size and shape for every capacity and keep you independent from shelving systems.

Our two design options, either straight or rounded, underline the individual scope of this furniture series.

An exciting colour and material combination is created by the metal tub and the wooden sides and give the user the option of leafing through the media with simultaneous front presentation. Variable management through mobile dividers, can also be used for videos and DVDs. Additional threading bars will hold the media even if the rows are not completely filled. Basic and add-on units allow an optimum combination of various media trays.

Two-storey media tray RADIX

Simply show the way.

A survey among library users about their idea of a good library has revealed that an easy orientation is most important for all. We have created simple systems which will help you in your library. And it is really not that difficult: a large sign at the entrance or in the stairwell, foyer, etc. with all necessary information on floors, subjects, areas. And the same again on every other floor if desired. All areas have smaller signs or standing info-boards with arrows respectively indications to hidden areas. The shelves themselves have front-side lettering or show the subject on the covering shelf board and a last hint on the board itself. Easy, isn't it?

Wolfgang Fischer, graphic arts

Where to put jackets,

bags, backpacks, suitcases, umbrellas? If your library was ever visited by a large school class during winter time and maybe it was raining, too, you will know what it looked like then.

We have addable wardrobe boards which will prepare you well for this type of rush.

It is the requirements of your library for which we particularly designed this board. It comes with 27 rounded and safe hooks and takes about half a meter of room. They are totally from thick metal and therefore no cheap plastic will ever break. And we didn't use sheet metal but finest, polished stainless steel so that neither lacquer will chip off nor will rust occur. The complete board is fixed on the wall with only two holes – there are systems on the market which wear out your walls and your caretaker by requiring two holes per hook.

Hans-Günther Pielmann, sales office

Books to travel

Book trolleys belong to the most important working tools in a library. We have taken a closer look at the working processes with existing book trolleys and wanted to make a change:

It was our goal to create a book trolley which avoids the strenuous sideward bend in order to reach for the books. We built a trolley where books are placed safely and stable on slanted boards, with clear indications which are not distributed on two different sides and for which you do not have to turn your head to the side. The books are easy to access and can be placed in the shelf with only a short turn of your body. This trolley is not clumsy at all when moving fully loaded from one shelf row to the other and it can be easily turned on the spot and it has the handle at the perfect for small as well as tall employees. It's a truly ergonomic trolley!

Hartmut Michalke, product design

Book and Presentation Trolley CROSSRUNNER

Ergonomic concept for book trolleys with side handles for varying the hand-reach height of the individual employees. The slanted corpus guarantees a safe stand of the media on four different levels in a user-friendly height. The media are facing towards the employee and be easily stored in the book shelves to the left and right. Besides transporting books this trolley can also be used for presentation purposes. An additional add-on sign is available for lettering.

Mini-CROSSRUNNER, WE 12M
Same description as its big brother but W 610 mm, D 540 mm, H 1220 mm, insert height 325 mm, and therefore also suitable for binder height, board depth 250 mm

Book Trolleys CLASSIC-LINE

This is the book trolley classic by SCHULZ SPEYER.

The appeal of our extremely reliable and robust concept lies in its clear form language. Few geometrical elements can be combined to new convincing solutions again and again. A multitude of offered models opens up to new forms of use and above that to the unconditional orientation towards special demands and requirements. Frame from square tube, 25/25 mm, lacquered metal, side panels from veneered wood/plastic coated, four wheels, 100 mm diameter with all-purpose treads from grey rubber.

Book Trolleys ERGO-LINE

As a book trolley can become one of the most important tools of a library employee, it is very important to integrate aspects of industrial medicine into the design. Particular attention was directed to the handle of this series.

In order to keep the limits of so-called joint limiting angles of hand and shoulder joints, our Ergo-Line handle was designed as continuous curved handle and fosters a dynamic hand-reach through changing positions.

- Frames from round tubes, 25 mm diameter, and four wheels with 100 mm diameter and with all-purpose treads from grey rubber.

Ergo-Line Book Trolley with three Wooden Boards, WE 1
Boards and side panels from veneered wood/plastic coated, 1 2 3

Book Coolie, WE 10/11

Very mobile and manoeuvrable book trolleys with steering wheel technology and Ergo-handle. The slanted corpus guarantees a safe stand of the media on three different levels. Available in two designs with different depths. WE 11 is suitable for binders.

- Frames from round tubes, 25 mm diameter,
- 1 2 3 corpus from veneered wood/plastic coated,
- two wheels with 200 mm diameter with all-purpose treads from grey rubber, two steering wheels with 50 mm diameter.

W 540 mm, D 270/325 mm, H 1090 mm

WE 10, Order-No. B 7835 000 BW
Shelving depth 250 mm, Shelving height 285 mm

WE 11, Order-No. B 7835 001 BW
Shelving depth 300 mm,
Shelving height 330 mm

Side Containers, Workstation Container

Side containers are practical helpers as mobile storage or for personal pieces of equipment next to the workplace. With an overall height of 650 mm they can also be placed under Schulz desks and the INFORM System-Counter.

Side Container, WA 3, WA 4
 Corpus and one adjustable board from 1 2 3 veneered wood/plastic coated, four wheels with 50 mm diameter, two with stop. W 400 mm, H 650 mm, L 750 mm

Side Container, WA 3
 Open to the front

Order-No. B 7841 000 BW

Side Container with Lockable Doors, WA 4

Order-No. B 7841 00T BW

Workstation Container with Ergo-Handle, WA 1
 With cabinet insert for binder height. Single-sided lockable swivel doors, transparent back from acrylic glass. Cabinet corpus and doors from veneered wood/plastic coated, 1 2 3 frame from lacquered metal. ● Four wheels with 100 mm diameter, W 460 mm, H 1145 mm, L 890 mm Shelving height 350 mm

Order-No. B 7842 .D0 BW
 0 without,
 Z with protection rings

Wooden Workstation Container, WA 2
 Single-sided lockable swivel doors, transparent back from acrylic glass. Corpus and doors from veneered wood/plastic coated. 1 2 3 Besides the lockable part there is also a board on top and an open, flat shelf at the bottom. Four wheels with 75 mm diameter, two with stop, W 460 mm, H 850 mm, L 715 mm Shelving height 350 mm

Order-No. B 7843 0D0 BW

Workstation containers were designed for a safe storing of required paperwork and documents, p.e. for project work. They have a lockable wooden corpus with a transparent back from acrylic glass.

Compact Container, WA 5

Multi-talent for transporting books or can be used as side or filing container. Both shelves have binder height. The upper shelf is completely open (D 540 mm), the lower board has an asymmetrically separated back (D 298/219 mm).

Can be used from both sides.

Corpus from veneered wood/plastic coated, four wheels with 1 2 3

75 mm diameter, two with stop, treads from grey rubber.

W 540 mm, D 540 mm, H 915 mm, shelving height 350 mm

Order-No. B 7865 000 BW

Our Specialists

Removal Container, WU 1

Special container for moving books. Ergonomic handle-height and large wheel diameter for an easy handling. Available in two heights. For securing the books during the transport, we offer a version with additional tension straps. The media are facing towards the employee and can be easily stored in the shelves to the left or right.

A great advantage – particularly for narrow aisles as you do not have to bend to the side to reach into the container.

● Frame from round tubes, 28 mm diameter,
1 2 corpus from veneered wood/plastic coated,
four wheels with 150 mm diameter, two with stop,
treads from grey rubber.

W 600 mm, D 600 mm, H 1180/1500 mm,
shelving height 295 mm, board depth 250 mm

Order-No. B 7868 15M BW Höhe 1180 mm, with tension straps
B 7868 25M BW Höhe 1500 mm, with tension straps

Order-No. B 7869 15M BW Höhe 1180 mm, without tension straps
B 7869 25M BW Höhe 1500 mm, without tension straps

Heavyweight Transporter, WB 30

Sturdy special book trolley for extreme loads. Handling is facilitated by the large diameter of the wheels. Frame from square tubes 30x30 mm, lacquered, side panels and shelf boards from veneered wood/plastic coated, four wheels 1 2 ● with 200 mm diameter, and treads from grey rubber.

W 1000 mm, D 600 mm, H 1205 mm, shelving height 340 mm

Order-No. B 7867 0W0 BW

Book Return Container, WR 1

Mobile, lockable return container with removable book basket. The opening for posting is equipped with a security system to prevent unauthorized access or grabbing. The posted media slide along a slanted board into the book basket which is foam-lined. Corpus from veneered wood/plastic coated, grey-metallic, with variable edging in veneered wood/plastic coated. **1 2 3**
 W 780 mm, D 455 mm, H 870 mm
 Posting opening: B 300 mm, H 70 mm

Order-No. B 7870 00. BW _____ 0 without inscription
 1 (D), 2 (GB), 3 (F), 4 (I), 5 (NL)

Book basket:
 W 600 mm, D 400 mm, H 320 mm

Return Systems

Media Return Cabinet for Books and AV Media, WR 2

Stationed, lockable return system with double function:

On one side return of books which slide through the posting opening along a slanted board into a mobile stockroom container. The stockroom container can be removed by opening a lockable door. The opening for posting is closed by a special mechanism while the container is removed.

On the other side a separate posting opening for the return of CDs, DVDs, Videos, etc. The AV media, too, slide along a slanted board into a separate box which can be individually locked.

Corpus and stockroom container from veneered wood/plastic coated, grey-metallic, with **1 2 3** variable edging in veneered wood/plastic coated,
 W 620 mm, D 1150 mm, H 1240 mm
 Stockroom container W 465, D 1060 mm, H 875 mm
 Posting opening: W 380 mm, H 70 mm
 AV media opening: W 580 mm, H 35 mm,

Order-No. B 7871 00. BW _____ With wooden stockroom container and foam-lining

Alternative Model with Spring-Floor Container:

Order-No. B 7873 00. BW _____ Increased capacity through wooden spring-floor container with foam-lining
 0 without inscription,
 1 (D), 2 (GB), 3 (F), 4 (I), 5 (NL)

SCHULZ SPEYER Colour Range

Colours carry a large expressiveness and are effective at first sight. Particularly in architecture does colouring play an important role. We are offering you the possibility of individually combining different surfaces with an extensive colour programme in order to design your SCHULZ furniture.

Return Systems for the Interior and Exterior

Price group

A

Free-Standing Media Returning System CORBIS

Stationary, lockable returning system. It comes with a metal case which is suitable for interior and covered exterior use. Has a solid metal drawer on one side where media will be inserted. The bottom lowers when closed and the media slide over a slanted plane into the attached spring-floor container.

Once the container is full or has been removed for emptying, the drawer is automatically locked. The display indicates red. Attaching the empty container into the case will unlock the drawer. The display shows green. The system operates exclusively on a mechanical basis; no electricity required.

- Case: lacquered metal, incl. fastening material on the floor, W 600 mm, D 1200 mm, H 1330 mm. Reversible door hinges. Stainless steel version upon request.

Solid drawer runners with self-retraction and damping for soft closing. Vandalism-protected, inner recessed grip and perforated bottom as protection against misuse through liquids.

Interior size of drawer W 365 mm, D 310 mm, H 90 mm. Insert-height respectively upper edge of drawer 1240 mm..

Media Returning System CORBIS incl. drawer without spring-floor container

Order No. B 7890 000 XX

Price group

B

Spring-Floor Container

We recommend using at least two spring-floor containers for a more comfortable emptying. The container comes with a spring-floor with controlled floor lowering; this means: the more media there are in the container the more the floor lowers. With maximum floor lowering – when the container is full – a mechanism automatically blocks the drawer and the display turns red.

- 1 2 3 Wood plastic coated, light grey, W 440 mm, D 1060 mm, H 800 mm incl. 4 wheels, 2 with stops

Order No. B 7891 000 XX

Price group

We furnish libraries!

The centre of all our activities is you, our customer. Your satisfaction is our most important capital. In order to find your individual solution we already support you during the planning phase. If you are looking for competent consulting, SCHULZ SPEYER is there for you, also on the spot. Tell our specialists about your needs and use our know-how from many a thousand realised furnishing projects.

Our name stands for innovative product design and development. Furniture for today and tomorrow. And being an all-round equipper we offer a complete delivery programme for all kinds of libraries.

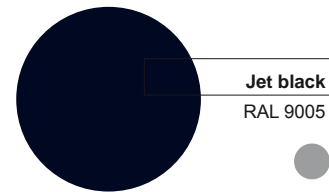

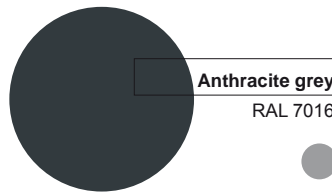

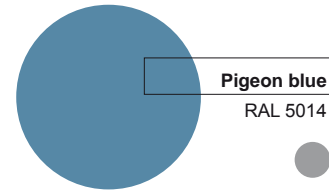

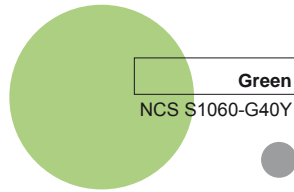

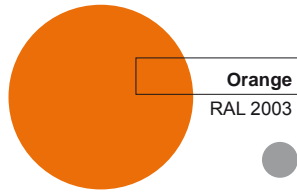

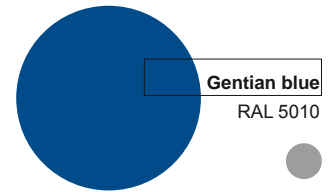

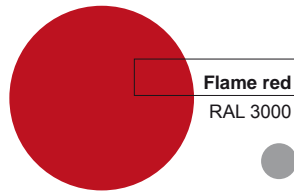

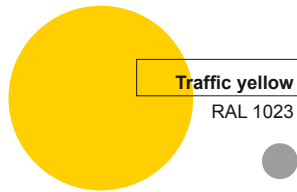

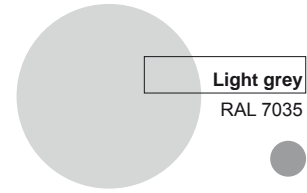

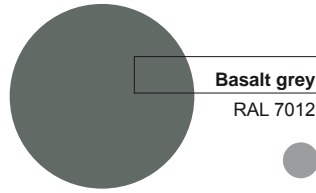

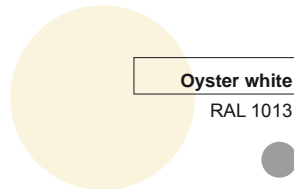

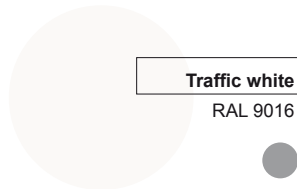

Besides the library furniture presented in this catalogue, you will find more product groups like shelving systems and shelving accessories as well as counter systems in separate catalogues or under www.schulzspeyer.de.

We are looking forward to your inquiries.

Colours for metal coatings

The coloration of the metal parts is made by a highly abrasion-proof and environmental-friendly baking powder-coating.
With reservation for colour deviations to original RAL register.
Antibacterial equipping of surfaces upon request.

RAL 5003 Sapphire blue
Fine structure (1)
RAL 9011 Graphite black
Fine structure (1)

DB 702 Iron mica light
Fine structure (1)
DB 703 Iron mica dark
Fine structure (1)

Other colours, fine structures and glimmer lacquerings upon request.

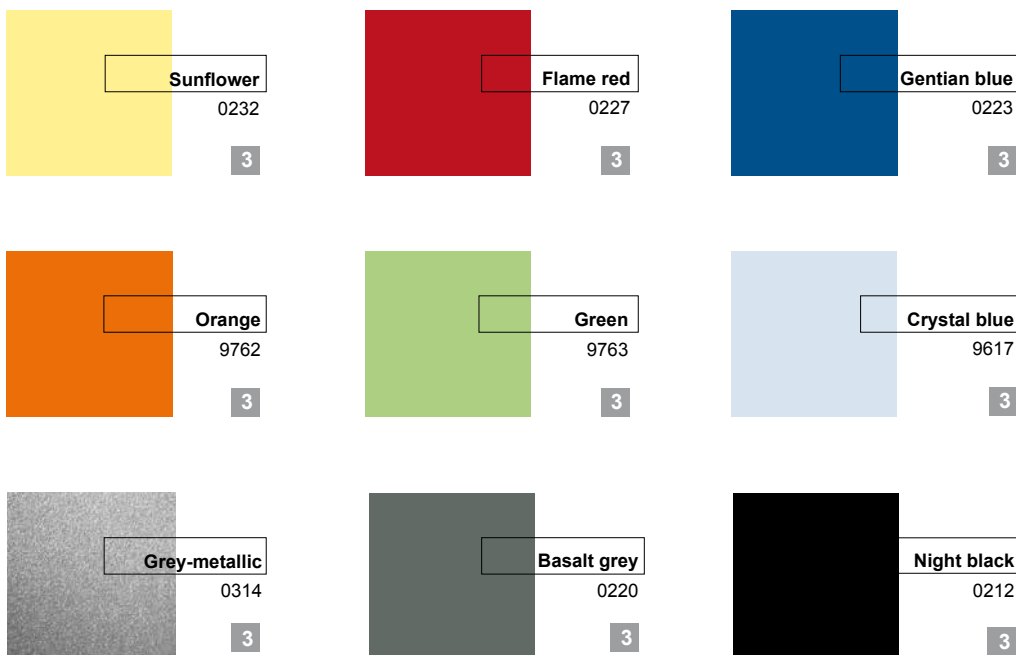

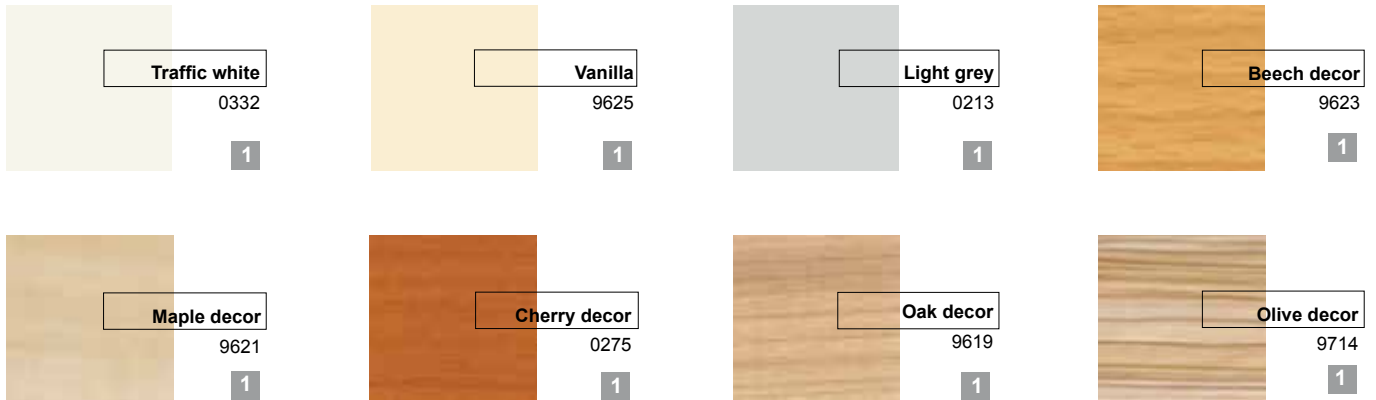

(1) We do not recommend fine-structured surfaces for shelf boards as the books will slip easily!

Surfaces

from solid wood veneer and plastic

Wooden surfaces are either directly plastic-coated or covered with an HPL laminated plastic, depending on their application. Differences in colour underline the characteristics of solid wood surfaces and cannot be avoided. Solid wood changes its colours under the influence of light. Table and work surfaces with solid wood veneer have only limited abrasion resistance. We recommend our highly resistant plastic decors for these types of surfaces. We use environmental-friendly lacquers for our solid wood surfaces.

Other surfaces and veneers upon request.
