# Fabric Panel -Tackable Acoustic (3/8" Thick Tiles)

## Face Styles

### Face Style: Monolithic/Glass/ Monolithic/Glass

### Basic Model: PMMGB

Monolithic/Glass/Monolithic/Glass panels consist of the following: 24" fabric tile on bottom; Remainder of panel consists of one glass tile utilizing a single pane of 1/4" thick tempered glass. Base is 6". Panel thickness: 3 1/2".

The 3/8" Tackable/Acoustic tile consists of one piece of 3/8" thick fiberglass board. Each tile has two steel rails, positioned near top and bottom of tile, to provide increased strength. Fabric is glued to the face, edges and back of the fiberglass board.

# Fabric Panel - Tackable Acoustic (3/4" Thick Tiles)

Face Styles

## Face Style: Fully Segmented

Basic Model: PFFA

Fully Segmented panels consist of the following: Fabric tiles in 12" increments on both sides.  
Quantity of 12" tiles is dependent upon panel height. Base is 6". Panel thickness: 3/2".  
\*84" high panels include one 18" tile on top.

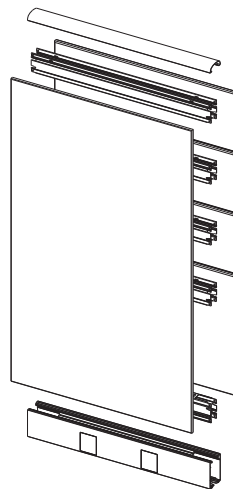

The 3/4" Tackable/Acoustic tile consists of a 1/2" thick mineral board core with a 1/4" thick fiberglass overlay.  
Each tile is framed on all four sides with steel. Fabric is glued to the steel frame on the back of the tile.

## Face Style: Monolithic/ Half Segmented

Basic Model: PMHA

Monolithic/Half Segmented panels consist of the following: Single tile on side one;  
a 24" fabric tile on the bottom and 12" segmented tiles on top of side two.  
Quantity of 12" segmented tiles is dependent upon panel height. Base is 6". Panel thickness: 3/2".  
\*84" high panels include one 18" tile on top.

The 3/4" Tackable/Acoustic tile consists of a 1/2" thick mineral board core with a 1/4" thick fiberglass overlay.  
Each tile is framed on all four sides with steel. Fabric is glued to the steel frame on the back of the tile.

## FINISH INFORMATION

### Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code  
Nevamar - LN/supplier's color pattern code  
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.

Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

## SPECIFICATIONS

### Cabinet Construction

The overhead cabinet shall be assembled complete and powder-coated in widths of 30", 36", 42", 48", 54" and 60". The overall dimensions of the end panels shall be 17" high and 16-1/2" deep. The shelf depth shall be 13-1/2". Inside height shall allow for oversize binders, such as Folscap and A4, to be stored vertically. The cabinet top, bottom, and shelf shall be fabricated from 18-gauge steel. Side panels shall be fabricated from 14-gauge steel and attached via resistance welding. Cabinet top, bottom, and shelf shall contain reinforcements fabricated from 18-gauge steel and attached via resistance welding. Pins for door and shroud attachment shall be fabricated from 3/8" diameter steel and attached via resistance welding. Shroud will be black only. All accessible or visible edges shall be smooth and rounded.

### Door Construction

The upper door shall be available in colored

or translucent extruded rigid polypropylene with spattercoat finish, fabric or laminate applied. The overall door thickness shall be 3/8" with a .075 wall thickness. The door shall be capped with polycarbonate endcaps and attached to the case with polycarbonate arms. A center lock mechanism will be utilized between the upper and lower doors for security. The lower door shall be an aluminum extrusion with a powder-coat finish. The lower door shall have a .075 thickness and be ergonomic in design. The door shall be capped and attached to the case with polycarbonate arms.

### Door Operation

The overhead cabinet doors shall be effortlessly operated from either a seated or standing position through use of the upper door or lower door. The upper door and lower door shall be synchronized in motion through the use of two 10-gauge linkages. The doors shall be assisted with two extension springs and require less than 5 pounds of force to operate. Either door shall be

opened or closed with a closed fist. The upper door shall open over the outside of case.

### Cabinet Installation

The overhead cabinet shall include separate mounting brackets that allow for assembly to panels or desk systems. The brackets shall be attached to the back of the overhead via a hook and groove system and two screw fasteners. The hook and groove system shall allow the installer to assemble brackets to a panel before attaching to overhead. The desk supports shall attach to the bottom of overhead via four screw fasteners.

### Task Lights

Task lights shall be available which suspend from the underside of the cabinet. The task light shall mount flush with the underside of the overhead cabinet via two cantilever brackets. Task light shall be offered fully assembled in black only. The task light shall have an 8' long cord with three-prong grounded plug, and be available in three versions: standard high-power factor ballast, variable (high/low) high-power factor ballast,

and electronic ballast. All three options shall include a cool white lamp. Chords shall be routed into and through wire trough located at rear underside of cabinet shelf. Installation and removal shall be accomplished without the use of tools or fasteners.

### Shelf Dividers

Shelf dividers shall be powder-coated, 18-gauge steel and offered in the same color as the overhead case. Installation and removal shall be accomplished without the use of tools or fasteners.

### Tackboard/Tool Rail Mounting Bar

A powder-coated, 14-gauge bracket shall be available for the attachment of a hanging tool rail or tackboard to the underside of the overhead. The bracket shall be specified in the same widths as the overhead and is offered in the same colors as the overhead case.

### Overhead Hanging Tackboard

Tackboards shall be available in 12" height

and in 24", 30", 36", 42", 48", 54", and 60" widths. The tackboard shall be constructed of 3/4" industrial insulation board covered with fabric. The mounting brackets shall be steel powder-coated and attached to the coreboard with T-nuts and machine screws. Fabric shall be attached to the coreboard with staples. A mounting bracket bar is required to attach the tackboard to the overhead cabinet.

#### Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code  
 Nevamar - LN/supplier's color pattern code  
 Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.

Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

#### Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code  
 Nevamar - LN/supplier's color pattern code  
 Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.

Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

### FINISH INFORMATION

#### Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code  
 Nevamar - LN/supplier's color pattern code  
 Wilsonart - LW/supplier's color pattern code

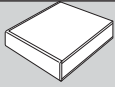

KI's standard finish is the supplier's recommended finish for that color/pattern.

Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.
