**Your Number One Source for Floor Pads, Maintenance Pads, Floor Matting and Related Products.**

From its beginnings over 45 years ago, Americo has prided itself on producing the highest quality products backed with fast, dependable service. Over the years, Americo has grown from a modest one room operation to over 350,000 square feet of manufacturing and distribution space in Georgia as well as a separate warehouse and distribution center in Los Angeles, California. We now distribute to all 50 states and over 70 foreign countries.

Americo manufactures a complete line of nonwoven abrasive products. Additionally, our matting division produces a wide selection of walk-off matting including: vinyl backed entrance mats, anti-fatigue matting and custom logo mats.

Today's marketplace demands quality products, superior service and competitive pricing. Americo has a rigorous quality control program which all of our products go through before they leave our plant. This includes, but is not limited to, testing on various products for durability, abrasiveness, weight, consistency, color and effectiveness of the products' intended purpose.

**100% of our Polyester Fiber Comes From Post Consumer and Industrial Recycled Waste**  
 All of the synthetic (polyester) fiber used in floor pads produced by Americo comes from recycled materials. Primary sources of these materials are recycled soda and water bottles.

**Water-Based Latex Resins**

No phenol-formaldehyde resins are used in our binding process. We only use water-based latex resins.

**Recycled Packaging**

All of our shipping cartons contain at least 45% recycled materials.

# Full Cycle® Eco-Friendly Floor Pads

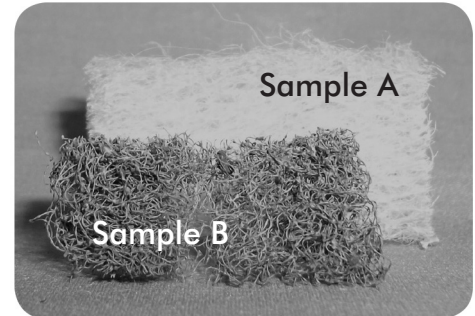

## Why Accept Anything Less?

- Made from 100% recycled PET plastic.
- Specially formulated to biodegrade in a fraction of the time that it takes conventional floor pads once discarded into an active landfill.
- Leaves no toxins or toxic remnants in the environment.
- Methane, a by-product that occurs during the biodegradation process, can be captured and converted into energy where facilities exist.\*

\* For a current listing of The U.S. Environmental Protection Agency's Landfill Methane Outreach Program (LMOP) visit <http://www.epa.gov/lmop>

**ENHANCED BIODEGRADATION**

Samples A and B, shown above, were both taken from the same Full Cycle® floor pad. While Sample A was left untouched, Sample B was placed in an ASTM D5511 simulated landfill test for 290 days. Note the significant mass reduction via enhanced biodegradation in Sample B. Photo courtesy of Eden Labs LLC.

## High Quality & Performance

With Americo floor pads, our customers don't have to sacrifice quality or product performance to leave a green footprint. Our innovative biotechnology does not modify Americo's core pad formulation. Our products have the same high quality, product performance and consistency that customers have come to expect from Americo.

## BIODEGRADATION

Full Cycle® Floor Pad

ASTM D5511 testing shows 92.5% biodegradation of Americo's Full Cycle® floor pad in 616 days as compared to 16.4% on our conventional pads. The ASTM D5511 test is a method that evaluates the biodegradability of plastic in anaerobic or oxygen-less conditions. These laboratory tests often show faster results than actual landfill conditions. The actual rate of biodegradation of Americo's Full Cycle® pads, as well as the rate of all plastic materials in landfills, will be slower and will vary, dependent upon actual landfill conditions.

California Notice: California law prohibits the sale of plastic packaging and plastic products that are labeled with the terms 'biodegradable', 'degradable', or 'decomposable', or any form of those terms, or that imply in any way that the item will break down, biodegrade, or decompose in a landfill or other environment. These restrictions apply to all sales in or into the State of California, including such sales over the internet.

# Twister™ diamond cleaning system

**Twister**™ is a revolutionary cleaning system consisting of floor pads containing billions of microscopic diamonds which clean and polish the floor mechanically instead of using chemicals. Twister™ can be used on most common floor surfaces such as terrazzo, natural stone, concrete, vinyl and epoxy. Twister™ transforms dull, worn floors into clean, glossy and brightly polished floors. Twister™ has unique advantages that benefit both the cleaning company and the floor owner.

Rectangular pad designed for use with oscillating machines.

## Twister™ WHITE

**800 Grit**

Step 1: The Twister™ White deep cleans and removes heavy scratches from the floor's surface. This leaves a clean, smooth floor that is ready for the next step.

Rectangular pad designed for use with oscillating machines..

## Twister™ YELLOW

**1500 Grit**

Step 2: The Twister™ Yellow begins the polishing process. The Yellow pad brings out the initial luster of the floor's surface and prepares the floor for the final step of high gloss maintenance.
